SISAL INDUSTRY REVIEW - 1999

(a) Sisal Production

There was a slight increase in sisal fibre and tow production in 1999 as compared to 1998. The 1998 production was 19,991 metric tonnes compared to 21,914 metric tonnes for 1999. This slight increase was as a result of increased leaf growth due to the excessive rainfall from El-NINO.

On regional basis production of all grades of sisal fibre and tow during the last two consecutive years was as follows:-

<u>Province</u>	<u>Production in 1998</u> <u>(Metric Tonnes)</u>	<u>Production in 1999</u> <u>(Metric Tonnes)</u>
Coast	9,286	8,944
Rift Valley	5,982	5,330
Eastern	3,350	6,587
Nyanza	973	620
Central	400	433
	<hr/>	<hr/>
	19,991	21,914
	<hr/>	<hr/>

b) Sisal Marketing

Between 80-90% of all sisal fibre and tow produced in Kenya is exported overseas to over 30 countries every year. The rest is sold locally. In 1999 out of the production of 21,914 metric tonnes, a total of 16,219 metric tonnes were exported, earning the country KShs. 608,157,763. In 1998 a total of 16,234 metric tonnes were exported earning the country an equivalent of KShs. 622,746, 403. In 1999 a total of 6,393 metric tonnes of sisal were sold locally earning farmers a total of KShs. 188,878,216.

Our sisal fibre is still in high demand since is being used on an increasing scale for the manufacture of higher added value end products, particularly pulp for speciality paper production and non woven products for reinforcement purposes. Currently the average price of the widely exported sisal grades UG and 3L stands at US\$ 630 per metric tonne f.o.b. Mombasa.

The top ten importers are:- Belgium, India, Italy, Portugal, Spain, United Kingdom, Australia, China, Japan and Jordan.

c) Sisal Board Operational Results

In spite of reduced revenue receipts resulting from low level of sisal prices, the Board continued to fully discharge its functions as required under the Sisal Industry Act (Cap 341). The Board realized a financial surplus from the 1998/99 operational budget.

The Board's inspection at Mombasa continued to intensify its inspection procedure and quality control checks on exported sisal. The welcome result of all this is the maintenance of steady demand of our premium sisal used for blending purposes in the world's sisal fibre markets.

As regards the Board's field activities, the product and Market Development of Sisal and

Henequen Products Project which took off towards the end of 1997 and is now in its fourth year of implementation and is expected to continue upto the end of the year 2001

The Report of the review of past Sisal Research and Current Cultivation Practices was carried out in Kenya and Tanzania and is in the process of editing for publishing as a hard copy and on the internet. It is expected this will be complete by end of year 2000.

The sisal variety performance trial were planted towards the end of 1997 at KARI substation in Malindi, Kibwezi and Nakuru. Data on the trials is being routinely collected and analysed.

The animal Feeds Trials based on feeding dairy and beef cows, goats and sheep on sisal decortication waste and boles, both fresh and ensiled started at Kilifi Plantations Ltd. Feeding trials commenced in October 1999 and are to be completed in July 2000. Data collected will be statistically analysed and technical and economic report on the viability, and applicability of the system released.

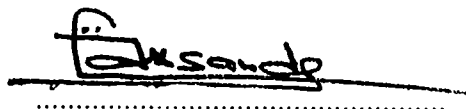

A component on development of an improved flume tow recovery technology and equipment was also started at Rea Vipingo Estate in Kilifi. The development and manufacture of the equipment is complete and tests are being carried to establish the efficiency of the plant. A techno/economic report will be released by the end of the year 2000.

The process of initiating a study into development of efficient and cost effective sisal fibre extraction technology is also at an advanced stage. Three experts (Mr. F. Opar, Kenya, Mr. G. Kisaka and A magaga, Tanzania) went to Netherlands for 5 months in 1999 to conduct trials to identify available technologies which can be adapted for efficient pulpable sisal fibre extraction and recommended to continue more tests on a crusher and sprout bauer.

A follow up visit to Brazil by the Tanzania experts in 2000 recommended more tests on a modified hammer mill which was successfully used in a sisal pulping mill in Brazil.

The process of developing sisal tissue culture technology has also been initiated at the Plant Quarantine Station. A scientist has already completed a one month training on Agave tissue culture in Mexico. Expansion and adapting the laboratory to accommodate sisal has been completed, and two local technicians have been trained at the laboratory. Tissue culture trials have also been commenced and over 1000 tissue culture plants are ready for field trials.

Preliminary results from the on going activities are expected to start flowing in mid of year 2000. In Tanzania, the project has also taken off and a number of activities are already underway.

K.S. Mukuna
Managing Director

**REPORT OF THE AUDITOR GENERAL (CORPORATIONS) ON THE ACCOUNTS
OF KENYA SISAL BOARD FOR THE YEAR ENDED 30 JUNE 1999**

I have examined the Accounts of Kenya Sisal Board for the year ended 30 June 1999 in accordance with the provisions of section 29 (2) of the Exchequer and Audit Act, (Cap 412). I have obtained all the information and explanations required for the purpose of the audit. Proper books of account have been kept by the Board and the Accounts are in agreement therewith and comply with the Sisal Board Act (Cap 341).

In my opinion, and except for the matters referred to here below, the Accounts, when read together with the Notes thereon, present a true and fair view of the Board's financial state of affairs as at 30 June 1999 and its surplus for the year then ended.

1. FIXED ASSETS

The Balance Sheet Fixed Assets figure of KShs. 20,019,234 excludes value of four (4) leasehold plots, numbers Mombasa/Block 1/88, 1/89, 1/187 and 1/251. Accordingly, the board's fixed assets of KShs. 20,019,234 as at 30th June, 1999 are understated to the extent of the value of the four (4) pieces of land not valued and entered in its books. I have, however, been informed that the assets have now been valued and that the values will be incorporated in the Accounts for 1999/2000.

2. DEBTORS AND PREPAYMENTS

As was the case in previous year, the Balance Sheet Debtors figure of KShs. 1,843,718 as at 30 June, 1999 includes cash advances and imprests made to the Board's Chief Executive totalling KShs. 383,979, which have remained outstanding for a period of over four years. The Board has not, however, explained why these advances and imprests still continue to be owed by its Chief Executive. Further the Board has not been able to recover advances totalling KShs. 77,690 made to two ex-staff who retired and whose pension funds are presently held by Kenya National Assurance Company, now in liquidation. During the year under review, the Board made further cash advances to two other retirees totalling KShs. 73,284; thus increasing total cash advances made to such retirees to KShs. 150,974. Although the Board has explained that the advances to ex-staff were made because the Insurance Company with which the Board was running its Staff Pension Scheme was under liquidation, the Board, has not, however, given any indications as to the arrangements made with the liquidators, if any, on how to recover the advances already made nor has it explained how the rest of the staff pensions held by the Insurance Company would be made available to the pensioners.

3. BOARD MEETINGS

During the year 1998/99, the Board held only two board meetings instead of the statutory minimum of four such meetings as provided for under Section 8(1) (a) of the State Corporations Act, (Cap 446). The Board's breach of this statutory requirement has not been explained or justified and in the absence of any such explanation it has not been possible to confirm how the functions of the board as regards over-all direction and management were carried out.

S.M. MALUKI
AUDITOR GENERAL (CORPORATIONS)

NOTE 7 PMDSHP PROJECT

The product and Market Development of Sisal and Henequen Products Project advanced the board one thousand nine hundred and nine dollars (KSh. 128,602.60) in April 1999 for transplanting of Nurseries and variety trials in Kibwezi and Nakuru. As at the end of 1998/99 financial year, there was a balance of KShs. 360/= on this account.

NOTE 8 GENERAL FUND

	<u>1998/99 KShs.</u>	<u>1997/98 KShs.</u>
Balance brought forward	7,386,765	7,884,923
Accumulated depreciation on ASK Stand	(337,715)	
Transfer from Income and Expenditure Account	599,858	(498,158)
Balance carried forward	7,648,908	7,386,765

NOTE 9 CESS INCOME

During the 1998/99 financial year, a total of 18,474.55 metric tons of sisal was levied cess earning the Board a sum of KShs. 554,237/= compared to 17,495 metric tons in 1997/98 when the board earned KShs. 524,849/= from this source. This represents a revenue increase of about 5% (KShs. 29,388). This meagre increase is attributable to depressed demand in the world markets.

NOTE 10 RENT INCOME

The rental income of KShs. 8,111,838/= reflects an increase of KShs. 1,314,476/= which represents 19% over the previous year when a sum of KShs. 6,797,362/= was realised from this source. This increase is as a result of the increased charge per square foot of godown No. 4 after completion of re-construction.

NOTE 11 INSPECTION SERVICE CHARGE

During the 1998/99 financial year, the Board earned a sum of KShs. 3,854,155/= from this source of revenue. This reflects a revenue drop of about (7%) (KShs. 263,289) from the previous years earnings when a sum of KShs. 4,117,444/= was received from this source. This is as a result of depressed demand in the world markets.

NOTE 12 LICENCE FEES.

During the 1998/99 financial year, the Board earned a sum of KShs. 65,800/= from this source of revenue. This reflects a drop of about 3.7 % (Ksh. 2,470/=) from the previous financial year when a sum of KShs. 68,270/= was received. This drop is due to the reduced export sales and hence fewer export licences.

NOTE 13 REBALING CHARGE

Revenue from this source increased by KShs. 25,080/= from KShs. 345,420/= in 1997/98 to KShs. 370,500 in 1998/99. This increase is attributed to more bales having been rebaled and thus more charges.
