THE CIVIL AVIATION ACT

(No. 21 of 2013)

ESTABLISHMENT OF THE NATIONAL AIR TRANSPORT FACILITATION
COMMITTEE

IT IS notified for the information of the general public that pursuant to the provisions of the Convention on International Civil Aviation (Chicago, 1944) Article 37 and Annex 9 thereto, the Cabinet Secretary for Transport, Infrastructure, Housing, Urban Development and Public Works has established the National Air Transport Facilitation Committee consisting of the following:

- (a) Ministry responsible for Civil Aviation;
- (b) Kenya Civil Aviation Authority;
- (c) Secretariat to the National Civil Aviation Security Committee;
- (d) Kenya Airports Authority;
- (e) Kenya Plant Health Inspectorate Service (KEPHIS);
- (f) Directorate of Veterinary Services;
- (g) Kenya Revenue Authority (Customs and Border Control);
- (h) Department of Immigration Services;
- (i) Kenya Airports Police Unit;
- (j) Ministry of Foreign Affairs (Protocol Directorate);
- (k) Ministry of Health (Ports Health Services);
- (l) Kenya Tourism Board;
- (m) Ground Handling Agencies (Representative);
- (n) Airline Operators (Representative);
- (o) Directorate of Criminal Investigation; and
- (p) National Intelligence Service (Frontier Control).

Co-option of other members

The Committee may invite or co-opt any person it deems fit for the purposes of carrying out its functions to attend and take part in the proceedings of the Committee and that person may participate in any discussions at the meetings but shall not have a right to vote at such meetings.

Management of the Committee

The Committee shall be chaired by the Ministry responsible for Civil Aviation and the Kenya Civil Aviation Authority shall be the Secretariat.

Contact

Kenya Civil Aviation Authority, P.O. Box 30163 – 00100, Nairobi.

Tel.: +254 709 72500, Email: info@kcaa.or.ke,
facilitation@kcaa.or.ke

Terms of Reference of the Committee:

- (i) develop and review policies relating to clearance formalities applied to international air transport services;
- (ii) ensure the development and implementation of the National Air Transport Facilitation Programme;
- (iii) ensure that passengers, cargo and mail are cleared through airports in line with ICAO Standards and best international practices;
- (iv) consider recommendations made by Airport Facilitation Committees and, in turn, convey resolutions to Airport Facilitation Committees for implementation;
- (v) review the Standards and Recommended Practices contained in Annex 9 to the Chicago Convention, and make recommendations for their implementation in Kenya;
- (vi) keep departments, agencies and other concerned organisations informed of significant relevant facilitation developments in the field of civil aviation and seeking their

consideration or making recommendations to them regarding issues related to facilitation as appropriate;

- (vii) encourage the use of technology and integrate mechanisms to facilitate the smooth movement of aircraft, crew, passengers, cargo, mail and stores into and out of the country;
- (viii) carry out periodic inspections of airports and associated facilities to assess facilitation status;
- (ix) recommend the review and control of travel documents in line with ICAO guidance;
- (x) coordinate the development and amendment to facilitation regulations;
- (xi) recommend for the harmonization of standards on documentation related to passengers, cargo and mail with those of neighbouring states;
- (xii) explore the possibility of converging control processes of border agencies to achieve "one-stop" inspection;
- (xiii) recommend amendments to relevant regulations to permit the use of selective inspections or other risk management techniques;
- (xiv) recommend the development of national policies with regard to provision of services to persons with special needs;
- (xv) establish interrelations and liaison with similar agencies in other States within the region and organizing regional consultative meetings on facilitation matters;
- (xvi) oversee and provide guidance on functions of the Airport Facilitation Committees;
- (xvii) provide information and guidelines on the facilitation matters and situation within the country;
- (xviii) co-ordinate with the National Civil Aviation Security Committee on security-related elements of facilitation.

Reporting

- (a) The Committee shall report to the Cabinet Secretary; and
- (b) Shall regularly advise and keep the Cabinet Secretary apprised on the progress.

Mode of operation

In performance of its mandate, the Committee shall regulate its own procedure.

Duration

The duration of the Committee shall be a period of two (2) years with effect from publication date of this notice.

Costs

The costs incurred by the Committee, including but not restricted to facilitation and payment of allowances in respect of the members and secretariat of the Committee, shall be defrayed from voted funds of each represented Ministry or Government Agency.

Dated the 7th April, 2021.

THE ENVIRONMENTAL MANAGEMENT AND CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED RESIDENTIAL DEVELOPMENT ON PLOT L.R. NO. 330/349 ALONG RIARA RIDGE, DAGORETTI NORTH SUB-COUNTY, NAIROBI CITY COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Riara Delta Limited proposes to construct residential apartments comprising three Blocks A, B and C. The Basement will comprise 206 parking spaces. Block A will comprise a 9 floors with 17 No. one-bedroom units, 17 No. two-bedroom units, 31 No. studio units and a Terrace. Block B will comprise 14 floors with 28 No. one-bedroom units, 28 No. two-bedroom units, 52 No. Studio units and a terrace. Block C will comprise a 17 floors with 28 No. one-bedroom units, 30 No. two-bedroom units, 55 No. studio units and a terrace, all amounting to a total of 286 units on plot L.R. No. 330/349 along Riara road, Dagoretti North Sub-county in Nairobi City County.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impacts	Mitigation Measures
Air pollution	<ul style="list-style-type: none"> Regular monitoring of the quality of air throughout the construction period. Screening of the construction site to contain and arrest construction-related dust. Dust suppression with water-sprays during the construction phase on dusty areas. Exposed stockpiles of e.g. sand, shall be covered and watered daily. Regular and prompt maintenance of construction machinery and equipment to minimize generation of hazardous emissions. The above is to comply with EMCA (Air Quality) Regulations, 2014.
Increased water demand	<ul style="list-style-type: none"> Use water bowsers and tankers from external sources during construction. Encourage re-use of water where possible during construction and operation phase. Provide roof and underground water storage tanks. Provide alternative sources of water (borehole) and adequate storage facilities.
Storm water drainage	<ul style="list-style-type: none"> Levelling of the site to reduce pooling of water during the construction.

<i>Possible Impacts</i>	<i>Mitigation Measures</i>	<i>Possible Impacts</i>	<i>Mitigation Measures</i>
	<ul style="list-style-type: none"> • Semi permeable materials shall be used for construction of pavements. • Landscaping on the open areas shall be done to promote efficient management of storm water runoff. • Repair and maintenance of open drains within the site. 		<ul style="list-style-type: none"> • Use of an integrated solid waste management system through a hierarchy of options: source reduction, recycling, composting and reuse. • Comply with the Waste Management Regulations, 2006. • Channel all effluent to the sewer system.
Noise and excessive vibrations	<ul style="list-style-type: none"> • Construction works shall be carried out during the day. • Provide and enforce use of Personal Protective Equipment (PPEs) e.g. earmuffs and helmets during construction. • The use of noise shields on noisy equipment. • Monitor noise and excessive vibrations levels especially during excavation as per the regulations. • Working hours should be observed between 6.00 a.m. and 6.00 p.m. 		<ul style="list-style-type: none"> • Conduct routine inspection and monitoring of the internal sewer system to identify leakages and blockages. • As provided for by the Building Code, sanitary facilities shall be provided on site to be used by construction workers. • Provide oil interceptors in the parking areas of the development.
Traffic congestion	<ul style="list-style-type: none"> • Develop a traffic management plan to ensure smooth flow of traffic along access roads. • Employ traffic marshals to control traffic in and out of site. • Ferry building materials during off-peak hours. • Provide traffic control signs at the site/entrance to notify motorists and general public about the proposed development. • Enforce speed limits for the construction vehicles especially along the adjacent roads leading to the site. • Provide adequate entry and exit points for both motorized and non-motorized traffic to ease movement. • Expand the access road to accommodate more vehicular traffic introduced in the area. 	Increased energy demand	<ul style="list-style-type: none"> • Use energy efficient electrical appliances and fixtures such as bulbs. • Use of solar energy as alternative energy supply for the project. • Install water heating systems as per the Solar Water Heating Regulations, 2012.
		Fire outbreaks	<ul style="list-style-type: none"> • Install firefighting equipment. • Sensitize the occupants on fire risks i.e. conduct regular fire drills. • Provide escape routes/emergency exits in the buildings. • Provide fire assembly points to account for the occurrence. • Adapt effective emergency response plan. • Inspect firefighting equipment regularly. • Provide emergency numbers at strategic points for the Nairobi City County Fire Brigade.
Vegetation	<ul style="list-style-type: none"> • Design and implement an appropriate landscaping and tree planting program to help in re-vegetation of part of the project area after construction. • Introduction and maintenance of vegetation (trees, shrubs and grass) on open spaces and around the site. • Planting and grassing should be done just before the rains or irrigated on dry spells. 	Security	<ul style="list-style-type: none"> • Engage services of registered security guards. • Install and regular maintenance of the CCTV cameras. • Incorporate an electric fence along the existing perimeter wall. • Control of entry and exit to and from the facility. • Place hotline numbers on strategic places. • Sensitize residents on security precautions. • Sensitize the residents on the importance of Community policing e.g. the "Nyumba Kumi Initiative" in coordination with the local administration.
Increased solid and liquid waste	<ul style="list-style-type: none"> • Proper disposal of construction waste in designated and approved sites by the Nairobi City County Government. • Segregation of waste at the source by providing labeled bins for each kind of waste e.g. organic/biodegradable wastes, dry wastes, etc. • Provision of waste management facilities such waste bins on designated areas. • Engage the services of NEMA registered waste collectors to dispose the waste at designated areas approved by County Government of Nairobi in consultation with NEMA. 	Cultural differences	<ul style="list-style-type: none"> • Encourage social mobilization of the incoming residents. • Organize activities that benefit the whole community e.g. clean ups. • Choose leadership that incorporates all cultural groups in the communal activities.
		Conflict with neighbors	<ul style="list-style-type: none"> • Develop a grievance redress system for emerging issues with easy access to neighbors. • Continuous communication and consultation between the project proponent and the stakeholders. • Monitoring of the ESMMP throughout the project cycle.

The full report of the proposed project is available for inspection during working hours at:

- (a) Principal Secretary, Ministry of Environment and Forestry, NHIF Building, 12th Floor, Ragati Road, Upper Hill, P.O. Box 30126-00100, Nairobi.

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED WATER SUPPLY AND SANITATION
PROJECT FOR KISUMU CITY AND SATELLITE TOWNS,
KISUMU COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Lake Victoria South Water Works Development Agency proposes to rehabilitate existing problematic lines in lower CBD; extension along the bypass highway to connect Nyamasaria lines better from Kibuye reservoir; and reinforcement of existing lines in Kadero area. A total of five kilometres of water pipeline will be laid during the works. With regard to sanitation facilities, the general scope of works will involve rehabilitation of 11.962km of sewer line and extension of 20.927km of the line within Kisumu County.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impacts	Mitigation Measures
Disruption of socio-economic activities within the project alignment areas	<ul style="list-style-type: none"> • Resettlement Action Plan (RAP) shall be prepared. The plan shall take inventory of all properties likely to be affected due to project construction and recommend compensation for owners accordingly. • Owners of temporary structures located along project alignment areas shall be advised in advance excavation works to remove the structures to allow for work execution. • The structure owners shall be allowed to reconstruct their structures after the pipes have been laid and trenches backfilled. • Owners of private facilities and enterprises affected by the works shall be compensated as per provisions of World Bank Operational Policy (OP) 4.12 on Involuntary Resettlement and applicable Kenyan laws.

Possible Impacts	Mitigation Measures
Disruption of services within the project alignment area	<ul style="list-style-type: none"> • Loss of revenue from disrupted services e.g. business closure shall be mitigated through compensation as per provisions of World Bank OP 4.12 and applicable Kenyan laws • The contractor shall liaise with Kisumu Water and Sanitation Company (KIWASCO) and private water service providers to restore all disrupted water services as soon as pipe laying and backfilling of trenched areas are finalised. • The contractor shall liaise with Kenya Power Company to restore underground power cables cut during excavation activities as soon as pipe laying and backfilling of trenched areas are finalised. • All civil works shall be restricted to within project alignment areas.
Impacts of obtaining construction materials	<ul style="list-style-type: none"> • Re-use of excavated materials in the works as fill shall be maximised. • Quarries shall be sited away from residential areas and all quarry sites subjected to EIA before any material can be extracted from the sites. • All available topsoil from borrow pits and quarries shall be stripped and stored safely for use in site restoration. • All borrow pits and quarries shall be restored in accordance with an approved restoration plan to maximise their long-term biological productivity and minimise health and safety hazards.
Accidents and injuries to workers and residents	<ul style="list-style-type: none"> • The contractor shall prepare construction Environmental and Social Management Plan (C-ESMP) 30 days after signing the contract. The plan shall highlight specific measures recommended for management of environment, health and safety and social issues throughout construction period. • The contractor shall provide ample warning signs, guard rails, warning tape, etc., around open excavations, stacks of material, debris, etc. and shall be held liable for all claims as a result of neglect of such precautions and provisions. • Proper access control shall be enforced to ensure that no unauthorised persons enters construction site. • Material delivery vehicles shall be under the control of competent personnel. All persons handling equipment and materials shall be suitably trained, supervised and adequately instructed. • A confined spaces entry program that is consistent with applicable national requirements and internationally accepted standards shall be implemented. • The contractor to provide a standard first aid kit at the main office at the contractor's camp and at all work areas. • Use of requisite Personal Protective Equipment (PPE) at all times during construction works shall be enforced.

Possible Impacts	Mitigation Measures
Risks to local residents	<ul style="list-style-type: none"> • Strict code of conduct shall be established and enforced for all project drivers including outside suppliers delivering materials. The code shall focus on safety, especially speed, and loading, especially banning all carriage of staff, workers and passengers except in seats. • HIV/AIDS prevention programme specifically related to the project's construction phase shall be established and implemented. The programme shall include, at a minimum, the identification of specific risk groups (e.g. bar workers, truck drivers), specific AIDS awareness campaigns for these risk groups and HIV/AIDS tests for identified high risk groups and the provision of male condoms to construction workers.
Occupational accidents from machinery failures	<ul style="list-style-type: none"> • All vehicles, trucks, plants and general construction machinery shall be maintained in good condition to mitigate premature failure which may result to occupational injuries. • Only suitably qualified personnel shall operate construction vehicles and machinery. • Handling of equipment and materials to be supervised and adequately instructed.
Occurrence of workplace accidents during work executions	<ul style="list-style-type: none"> • The contractor shall prepare method statements covering procedures and response plan for the main activities which could generate emergency situations at the work areas including among others accidental fires, accidental leaks and spillages, vehicle and plant accidents, and blasting at the quarry site. • Construction workers shall be adequately insured against occupational injuries and illnesses and shall be treated accordingly in case of injury and/ or illness. • First Aid stations manned by competent personnel shall be established in all work areas. • All staff shall be provided with requisite PPEs including safety shoes, hand gloves eye shields, nose masks, ear muffs and reflector jackets
Solid waste generation	<ul style="list-style-type: none"> • Express condition shall be put in the contract that before the contractor is issued with a completion certificate, they will clear the site of all wastes and restore the site to a state acceptable to the Supervising Engineer and Environmental Specialist. • The contractor shall prepare and implement a waste management plan for all activities during the construction period. • Solid waste collection bins shall be placed in offices at the contractor's camp to serve as solid waste collection points. • Solid waste generated shall be segregated into various waste streams for easy disposal. • The contractor shall procure services of a NEMA registered waste handler to facilitate sound solid waste management throughout construction period.
Traffic impacts	<ul style="list-style-type: none"> • Signs shall be erected within work areas to warn motorists of the heavy/construction vehicles accessing the site.

Possible Impacts	Mitigation Measures
	<ul style="list-style-type: none"> • Speed limit signages shall be posted within construction areas to mitigate over speeding by construction and other vehicles. • Appropriate warning signs informing road users of presence of a construction site shall be posted in strategic areas. • Flagmen will be stationed at road intersessions to control traffic to and from the site. • Water will be regularly sprinkled along the haul roads to suppress dust. • Utmost care will be taken to prevent spillage of materials and spoils from trucks during transportation.
Dust pollution	<ul style="list-style-type: none"> • Appropriate speed limits shall be enforced in all areas within the site boundaries. • All access roads, haul roads and stockpile areas shall be sprinkled with water to suppress dust. • All vehicles transporting construction materials shall be covered with tarpaulins as mitigation against materials being blown away by wind during transportation. • Water shall always be sprinkled before undertaking dusty operations to mitigate dust pollution.
Noise pollution	<ul style="list-style-type: none"> • Construction traffic movements shall be scheduled to normal working hours (0800H -1700H). • Stationery equipments such as generators and compressors shall be fitted with silencers. • Construction equipment and machinery shall be routinely serviced to mitigate excessive noise. • Proper maintenance, oiling and greasing of machines at regular intervals will be done to reduce generation of noise. • Periodical monitoring of noise will be done. • Use of personal protective equipments/devices such as ear-muffs, ear plugs etc. will be strictly enforced for the workers engaged in high noise areas. • Periodic maintenance of site equipment and machinery shall be carried out. Worn out parts will be replaced and rotating parts will be lubricated to minimize noise pollution.
Water supply disruption	<ul style="list-style-type: none"> • Consumers will be given advance warning ahead of water disruptions to enable them store water that can last them for the period of disruption. • Kisumu Water and Sanitation Company (KIWASCO) shall be notified of any disruptions in writing to enable them disconnect water services ahead of excavation works. • Water services shall be restored within 24 hours
Hazardous chemicals from water treatment	<ul style="list-style-type: none"> • The amount of chlorination chemicals stored on site shall be minimised while a sufficient inventory to cover intermittent disruptions in supply shall be maintained.

Possible Impacts	Mitigation Measures
	<ul style="list-style-type: none"> A prevention program that includes identification of potential hazards, written operating procedures, training, maintenance, and accident investigation procedures shall be developed and implemented. A plan for responding to accidental releases shall be developed and implemented.
Water system leaks and loss of pressure	<ul style="list-style-type: none"> It shall be ensured that construction of project infrastructure meets applicable standards and industry practices. Regular inspection and maintenance of pipelines shall be implemented. Leak detection and repair program (including records of past leaks and unaccounted for water to identify potential problem areas) shall be implemented. All mains with a history of leaks or with a greater potential for leaks because of their location, pressure stresses, and other risk factors shall be replaced.
Chemical exposure and hazardous atmospheres	<ul style="list-style-type: none"> A training program for operators who work with chlorine and ammonia regarding safe handling practices and emergency response procedures shall be implemented. Appropriate personal protective equipment (including, for example, self-contained breathing apparatus) shall be provided and training on its proper use and maintenance carried out. Safety showers and eye wash stations shall be installed near Chlorine and ammonia equipment and other areas where hazardous chemicals are stored or used. Enclosed processing areas and equipment, such as pump stations shall be ventilated, prior to maintenance. Eating, smoking, and drinking shall be prohibited except in designated areas.
Deficiencies in water distribution system	<ul style="list-style-type: none"> The water distribution system shall be constructed, operated and managed in accordance with applicable national requirements and internationally accepted standards. Storage facilities shall be regularly inspected, rehabilitated and replaced when needed. This shall include draining and removing sediments, applying rust proofing, and repairing structures. Cross-connections with sewerage systems shall be avoided. Water lines and sewer pressure mains shall be separated (e.g., at least 10 ft apart or in separate trenches, with the sewer line at least 18 inches below the water line). Adequate water pressure and flow throughout the system shall be maintained by implementing a leak detection and repair program, reducing residence time in pipes and maintaining positive residual pressure of at least 20 pounds per square inch (psi). Monitoring hydraulic parameters, such as inflows, outflows, and water levels in all storage tanks, discharge flows and

Possible Impacts	Mitigation Measures
	pressures for pumps, flows and/or pressure for regulating valves, and pressure at critical points, and using system modeling to assess the hydraulic integrity of the system shall be implemented
De-mobilisation	<ul style="list-style-type: none"> The site shall be cleared of all construction materials, including litter prior to hand over. Fences, barriers and demarcations associated with the construction phase shall be removed from the site. A meeting shall be held on site between the Engineer, Environmentalist and the Contractor to approve all remediation activities and ensure that the site has been restored to a condition approved by the Engineer. Rehabilitation activities of Environmental Cases identified shall continue throughout the defect liability period

The full report of the proposed project is available for inspection during working hours at:

The following are the anticipated impacts and proposed mitigation measures:

Possible Impacts	Mitigation Measures
Exploitation of raw materials	<ul style="list-style-type: none"> The contractor will obtain raw materials for the construction from sources that are compliant with NEMA Regulations. The contractor will procure quantities that are sufficient for the intended works only and recycle as far as practical to curtail wastage. The contractor will commit to extensive use of recycled raw materials as will be appropriate and in a manner that does not compromise the safety of the development.
Increased demand water	<ul style="list-style-type: none"> Installation of flush toilets with low volume cisterns and high pressure. Waste water recycling and rain water harvesting. Immediate repair of water pipe and tank leaks. Install water conserving taps that turn-off automatically when water is not being used. Ensure taps are not running when not in use.
Air pollution	<ul style="list-style-type: none"> Spray water on exposed areas during dry weather to suppress dust. Cover loads of friable materials during transportation. Building under construction to be covered with adequate screens to contain dust particles. Stock piles to be covered with tarpaulins. Control speed of construction vehicles and switch off machines when not in use. Regularly service and maintain vehicles and mobile plants and machinery.
Noise and excessive vibrations	<ul style="list-style-type: none"> Workers working with machinery, vehicles and instruments that emit high levels of noise should be provided with ear plugs and ear muffs. Proper servicing of machinery and equipment (oiling, greasing etc.). Installation of portable barriers to shield compressors and other small stationary equipment where necessary. Construction activities to be carried out between 8:00 a.m. – 5:00 p.m. Monitor noise levels as per NEMA guidelines.
River protection	<ul style="list-style-type: none"> The proponent should obtain WRA pegging report for riparian reserve. The proponent shall observe 10 meters riparian reserve where no proscribed activities shall be done as per the Water Act, 2016.
Run off and soil erosion	<ul style="list-style-type: none"> Create storm water management practices, such as piping systems or retention ponds or tanks, which can be carried over after the building is complete.

Possible Impacts

Mitigation Measures

	<ul style="list-style-type: none"> Apply soil erosion control measures such as levelling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil. Ensure that any loose soil is compacted to reduce run-off. Ensure that construction vehicles are restricted to existing graded roads.
Site security	<ul style="list-style-type: none"> Security on a 24-hour basis by security guards. The proposed site should have a perimeter wall. Proponent and the contractor to vet all workers at the site. The workers should provide copies ID. Installation of security lighting and CCTV cameras. Hire security personnel from a reputable company and conduct security check on tenants and cars.
Solid generation waste	<ul style="list-style-type: none"> Order materials in the sizes and quantities they will be needed. Use excavated soil for backfilling and landscaping. Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure to the elements. Reuse materials such as cartons, cement bags, steel metals, and plastic containers to reduce waste Dispose the excess excavated soil and any other waste by use of a licensed waste hauling company. Provide solid waste handling facilities such as waste bins across the building and ensure that they are often emptied to enhance maximum cleanliness. Ensure that occupants manage their waste efficiently through recycling, reuse and proper disposal procedures. Donate redundant but serviceable equipment to charities and institutions. Use of an integrated solid waste management system through a hierarchy options i.e. source reduction, recycling, composting and reuse shall be encouraged.
Generation of liquid waste	<ul style="list-style-type: none"> Provide portable toilets for workers on site. Connect to the existing sewer line serving the area for handling toxic liquid waste from the building. Provide adequate and safe means of handling sewage generated within the building. The waste water from the premises will be connected to the existing sewer line that serves the area. Conduct regular inspections for waste water pipe blockages or damages and fix appropriately. Ensure regular monitoring of the waste water discharged from the project to ensure that the stipulated sewage/effluent discharge rules and standards are not violated.

<i>Possible Impacts</i>	<i>Mitigation Measures</i>
	<ul style="list-style-type: none"> • All drain pipes passing under the building, driveway or parking should be of heavy duty PVC pipe tube encased in 150mm concrete all round. • All manholes on drive ways and parking areas should have heavy duty covers set and sealed airtight as approved by specialists. • All waste pipes should be accessible from outside and free to every part of the system for inspection, cleaning and repair.
Fire hazards	<ul style="list-style-type: none"> • Installation of an automatic fire alarm system for the building. • Provision of firefighting equipment and hydrant points. • Display fire excavation procedures and emergency at strategic points in the building. • Regular maintenance of fire electrical and first aid equipment. • Provision of emergency exit and fire assembly points.
Privacy intrusion for neighboring properties	<ul style="list-style-type: none"> • The architectural design of the project is such that all windows and balconies face road buffer to the South and West of the property. • The target tenants for the premises are middle class population who are expected to conduct themselves with decorum.
Increased density	<p>traffic</p> <ul style="list-style-type: none"> • A traffic marshal to be stationed along the entry point within the project boundary to control vehicles during transportation of materials when need arises. • Planned deliveries to make sure they do not coincide with heavy traffic. • Security checks to be conducted inside the compound not at the entrance. • Provision of separate traffic routes for tenants and vehicles during operation phase. • Provision of designated entry and exit points.
Oil leaks and spills	<ul style="list-style-type: none"> • During construction phase, all machinery must be well maintained to avoid leakage of oils on the ground. • All oil products should be handled appropriately to avoid spills and leaks. • Car park areas must be well managed and the drains from these areas controlled. • Fats and oil interceptors must be installed along the drainage channels leading from kitchen and car park.

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the National or County Governments. Because of this they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly, Senate or County Assemblies.
- (4) *Act Supplement* contains Acts passed by the National Assembly, Senate or County Assemblies.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typed with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.

EXTRACT FROM THE HUMAN RESOURCE POLICIES AND PROCEDURES MANUAL FOR THE PUBLIC SERVICE —

Kenya Gazette

A.30 (1) All communication for publication in the *Kenya Gazette* should reach the Government Printer not later than Friday of the week before publication is desired.

(2) A State Department will be required to meet the cost of advertising in the *Kenya Gazette*.

It is emphasized that these notes are for guidance only, but it is requested that persons submitting copy for publication first satisfy themselves that such copy is complete in every respect.
