KFMA	-	Kenya Fish Marketing Authority

B: Definition of Key Terms

Fiduciary Management- Members of Management directly entrusted with the responsibility of financial resources of the organization.

Comparative Year- Means the prior period.

2. Key Entity Information and Management

Kenya Fish Marketing Authority was established under Section 198 of the Fisheries Management and Development Act, No. 35 of 2016, on 29th September 2016. The Entity is domiciled in Kenya and has its Head Office at Museum Hill Nairobi.

The Authority is represented by a Board of Directors whose responsibility is to ensure that there is proper and effective performance of the functions of Fish Marketing Authority.

The Authority was categorized as Parastatal Category 3C by the State Corporations Advisory Committee in March 2022 with 5 departments and 2 Divisions namely.

The departments are;

1. Marketing Development and Client Services Department
2. Marketing Research and Information Management Department
3. Corporate Services Department
4. Corporation Secretary and Legal Services Department
5. Internal Audit Department

The divisions are;

1. Strategy and Planning Division
2. Supply Chain Management Division.

Vision Statement

To be the leading agency in marketing of fish and fishery products globally.

Mission

To facilitate competitive marketing of fish and fisheries products locally and internationally to support the socio-economic development of Kenya.

Mandate

The Authority is mandated to Market Fish and Fisheries Products from Kenya.

Core Values

In order to fulfill its mandate and realize its vision and mission, the operation of the Kenya Fish Marketing Authority will be guided by the following principles: -

- i. Integrity.
- ii. Reliability.
- iii. Transparency.
- iv. Professionalism; and
- v. Accountability.

Core Functions

- a) Develop, implement and co-ordinate a national fish marketing strategy.
- b) Identify fish market needs and trends and advise fisheries stakeholders accordingly.
- c) Ensure that fish and fisheries products from Kenya enjoy market access at local, national, regional, and international levels as premier products and, to this end, that the products and markets are developed and diversified.
- d) Organize stakeholders to ensure smooth marketing of fish and fishery products.
- e) Collaborate with national and international trade related bodies.
- f) Advise the cabinet secretary on issues related to national and international trade trends; and
- g) Promote the sustainable use of fish by preventing, deterring, and eliminating to the extent possible trade in illegal, unreported and unregulated fishing.
- h) Enforce National Fisheries trade laws and international fisheries related trade rules; and
- i) Perform any other functions that are ancillary to the object and purpose for which the fish marketing authority is established.

b. Key Management

The Authority's day-to-day management is under the following key organs:

- The Board of Directors.
- The Chief Executive Officer.
- Department of Market Research and Information Management.
- Department of Market Development and Client Services.
- Corporate Services Department
- Corporation Secretary and Legal Services Department

c. Fiduciary Management

The key management personnel who held office during the financial year ended 30th June 2024 and who had direct fiduciary responsibility were:

No.	Designation	Name
1.	Ag. Chief Executive Officer	Charles C. O. Ogwang
2.	Head of Corporate Services	None
3.	Head of Finance (Senior Chief Finance Officer, State Department for the Blue Economy and Fisheries)	Martin Wamwea
4.	Chief Supply Chain Officer (State Department for the Blue Economy and Fisheries)	Sammy Okonji

d. Fiduciary Oversight Arrangements

a) Audit and Risk Committee, Finance Committee, Technical Committee and Human Resource Committee.

The Authority's Risk and Audit Committee, Finance Committee, Technical Committee and Human Resource Committee have been active vide the Mwongozo Code of Governance for State Corporations 2015.

b) Parliamentary Committee activities

The Authority handled various issues at the National Assembly of Parliament:

National Assembly – Departmental Committee on Blue Economy, Water and irrigation (confirm this)

- Statements
- Petitions
- Motions
- Workshops/Seminars
- Meetings with Departmental Committees

c) Authority's Headquarters

Oversee Preparation of annual budgets and establishment of proper internal monitoring and control systems and procedures vi. Strategic leadership. vii. Capacity Building and Performance Management viii. Ensure Compliance with relevant laws. ix. Promote Corporate Image and enhance collaboration.

5. Chairman's Statement

I am proud and enthusiastic to present the second Chairman's Report as part of the Kenya Fish Marketing Authority's Annual Report and Financial Statements for the Financial Year 2023/24. This report not only highlights our continued commitment to transparency and accountability but also underscores the importance of financial statements in guiding our strategic decisions. This document provides a comprehensive overview of our financial health, ensuring that we remain focused on our mission to drive competitive marketing of fish and fisheries products in the Blue Economy space. The financial statement serves as a vital tool for assessing our performance, identifying opportunities for improvement, and fostering trust among our stakeholders.

Strategic Implementation and Budget Allocation

In our unwavering commitment to advancing the marketing of Fish and Fisheries Products, we diligently pursued the objectives outlined in our Strategic Plan (2018-2022). Looking ahead, we took decisive action in the Financial Year 2023/24 by improving our budgetary processes. As a result, we fully absorbed the approved budget of Ksh 51 million, demonstrating our increased capacity to effectively utilize financial resources. This achievement reflects our ongoing efforts to align our financial management with our strategic goals, ensuring that every shilling is directed toward initiatives that drive growth and sustainability within the fish marketing sector. The detailed report provides a comprehensive account of these financial activities, reinforcing our commitment to transparency and accountability.

Annual Financial Statements (AFS)

The Annual Financial Statements (AFS) for the Financial Year 2024/25 serve as a detailed account of our financial activities, highlighting the allocation and utilization of funds. These statements also provide an evaluation of our target achievements and an analysis of the factors contributing to any shortfalls. Our dedication to transparency is demonstrated through the careful extraction and presentation of data from budget implementation records.

Major Achievements

The past fiscal year saw realization of key achievements which include;

- **Development of KFMA draft Strategic Plan.**

This vital document is designed to strengthen our market presence both locally and internationally by increasing the competitiveness of Kenyan fish and fisheries products. The Strategic Plan is not just a roadmap for the next five years; it is a cornerstone of our efforts at the Kenya Fish Marketing Authority. It provides guidance on resource utilization, and ensures that we are well-positioned to meet the challenges and opportunities in the global marketplace. Our goal is to successfully launch and implement this Strategic Plan, driving sustainable growth and elevating the standards of key value chain players in the Blue Economy. The **Strategic Goals are;** Improved capacity to market fish and fisheries products; Functional policy and legal frameworks; and Enhanced market access for fish and fisheries products locally and internationally.

- **Commercialization of Beach Management Units**

In line with the Kenya Kwanza Government's Bottom-Up Economic Transformation Agenda, we embarked on a pivotal transformation journey. 150 Beach Management Units were successfully restructured into Marketing Cooperatives. Working in partnership with the State Department for Blue

Economy and Fisheries and the State Department for Co-operatives, we have identified 445 Beach Management Units across our water bodies for this transformation.

The formation of Marketing Cooperatives is crucial as it not only enhances our supplier base but also significantly boosts earnings for local fishermen. By pooling resources and efforts, these cooperatives provide better access to financial services and shared cold storage facilities, thereby improving operational efficiencies and market competitiveness. This initiative is a key step towards empowering fishermen, increasing their profitability, and advancing the sustainability of the fisheries sector.

- **Promotional Activities**

We undertook extensive promotional activities across the country, utilizing both physical and digital platforms. Our goal was to raise awareness, drive demand, and encourage greater consumption of fish. Our outreach spanned local, regional, and international arenas, including a variety of exhibitions and trade shows. Notably, the Authority's participation in six local shows significantly enhanced the visibility and impact of our efforts.

- **Brand Identity**

In the year 2023/24, we finalized and adopted the KFMA Brand Identity Manual. This manual is crucial as it provides a clear and consistent framework for representing our organization. It underscores our commitment to trust, quality, and sustainability, aligning with our mission to promote responsible fishing practices and showcase our premier fish and fisheries products. By consolidating our various efforts into a unified brand identity, this manual strengthens our position and enhances our impact as a cohesive, influential entity.

Implementation Challenges and Steps Forward

Throughout the year, we faced some implementation challenges which include;

- Limited institutional capacity. Issues such as insufficient office space, a shortage of technical staff, and funding shortfalls impacted our progress. In response;

Way forward;

- Embarked on resource mobilization for sustainability, growth, mission fulfilment and financial stability.
- Prioritizing the development key policy documents to inform operationalization of KFMA
- We have launched capacity-building initiatives for Beach Management Units, concentrating on marketing, value addition, and investment in the fisheries sector
- Initiating strategic partnerships in implementation of organizational goals.

To further enhance our ability to meet our mandate, we recommend the following steps:

- i. Secure funding from the government and strategic partners for key projects and administrative functions;
- ii. Allocate a Development Budget by the National Treasury to improve the efficiency of programs and projects.
- iii. Obtain approval from the National Treasury for the recruitment of essential staff to address skill gaps
- iv. Fund the implementation of a comprehensive Fish Marketing Information System to boost market efficiency, transparency, and sustainable fisheries management

- v. Invest in containerized solar-powered mini fish processing and cold storage facilities, modernize fish landing sites, and support the commercialization of key value chain players to reduce post-harvest losses.

Future Focus

As we move forward, the Authority is committed to enhance capacity by recruiting a substantive Chief Executive Officer, essential staff, and securing appropriate office space. Our main goal is to commercialize the remaining 148 Beach Management Units and other fisheries value chain actors, transforming them into commercially viable fish Marketing Co-operatives. This effort is in line with the Bottom-Up Economic Transformation Agenda and aims to boost the fisheries sector's contribution to the GDP from Ksh.37 billion to Ksh.100 billion per year by providing the necessary facilities and infrastructure.

In closing, I extend my sincere gratitude to the dedicated members of the Kenya Fish Marketing Authority, the State Department for the Blue Economy and Fisheries, our stakeholders and the broader community for their steadfast support. Together, we will continue to promote the marketing of fish and fisheries products and contribute to the prosperity of our nation.

Thank you.

HON. MARTIN O. OGINDO
CHAIRMAN OF THE BOARD

6. Report of the Chief Executive Officer

I am honored to present Kenya Fish Marketing Authority report for the fiscal year 2023/24. Significant milestones have been accomplished while advancing the mission Kenya Fish marketing Authority to market fish and fish products from Kenya. Our commitment to address key challenges affect Kenya's fisheries value chain remains steadfast, and I am happy to share our achievements, strategies, and future prospects.

Our primary aim is to transform Kenya's fisheries sector by organizing value chain stakeholders into effective fish marketing co-operatives and further initiate a saving culture through savings and credit co-operatives for affordable credit and sustainable saving scheme for the fisher folk. We are also focused on strategic partnerships, promoting sustainable fish consumption, reducing post-harvest losses, improving the use of Management Information Systems (MIS) and driving value addition interventions. These efforts are intended to increase the sector's contribution to the GDP from KES 37 billion to KES 100 billion annually.

Achievements and Milestones

1. **Promotional Activities:** Kenya Fish Marketing Authority engaged in nationwide promotional activities to enhance visibility of the institution and promote products and services emanating from the blue economy space. These engagements were both physical and digital in nature. The objectives were to stimulate demand and increase consumption of fish and fisheries products. The outreach was through local, regional, and international platforms, including exhibitions and trade fairs.
2. **Development of Electronic Fish Marketing Systems (e-FMIS) design and KFMA Website:** We engaged a consultant and came up with a design for the development of an e-FMIS. We plan to implement an end-to-end Fish Marketing Information System to enhance market efficiency, promote transparency, and support sustainable fisheries management. Currently, the limited use of such systems poses challenges in tracking daily catches and linking producers with buyers, leading to transparency issues.
3. **Commercialization of Beach Management Units (BMUs):** In alignment with the Government's Bottom-Up Economic Transformation Agenda (BETA), we have mapped 445 BMUs nationwide for transformation into Fish Marketing Co-operatives. This year, we successfully transformed 75 BMUs and sensitized a total of 222 BMUs across the country. So far, we have transformed a total of 150 BMUs since we started the exercise.
4. **Development of KFMA Strategic Plan 2023/27:** This Strategic Plan has highlighted key challenges and serves as a roadmap to provide opportunities in addressing the identified challenges faced in effective marketing of fish and fisheries products. The Authority will provide avenues for; good governance, human capacity development, infrastructure improvement, financial linkages, and leverage on the digital space to support competitiveness in marketing of fish and fisheries products.
5. **Brand Identity:** In the FY 2023/24, we finalized and adopted the KFMA Brand Identity Manual. This manual is crucial as it provides a clear and consistent framework for representing our organization. It underscores our commitment to trust, quality, and sustainability, aligning with our

mission to promote responsible fishing practices and showcase our premier fish and fisheries products. By consolidating our various efforts into a unified brand identity, this manual strengthens our position and enhances our impact as a cohesive, influential entity.

6. Conducted trainings and meetings on for the Board and staff to address key operational and management performance;
7. Capacity building o fish value chain actors on business Management skills and marketing;
8. Development of productivity mainstreaming plan;
9. Finalization of National Fish Marketing strategy;
10. Development of Risk Management plan/ framework;
11. Participation in exhibitions, shows and trade fairs
12. Refurbishment of offices, repair of the water and sewerage systems to provide space and conducive environment for work
13. Engagement of interns and attachees to complement institutional staff;

Financial Highlights

During 2023/24, the Authority received an Exchequer grant of KES 51 million, a significant increase from the previous year's allocation of KES 31 million. This increase reflects our commitment to fiscal responsibility and transparency. We have implemented stringent cost control measures, resulting in improved operating margins and financial stability.

The main challenges which need to be addressed for effective marketing of fish and fisheries products from Kenya include;

- i. Low contribution of fisheries to the National GDP which currently stands at around 0.7 % due to limited capacity to competitively trade in fish and fisheries products. This can only be improved through enhanced capacity of fish traders to sell more at competitive prices.
- ii. High post-harvest losses in fisheries value chains due to limited infrastructure and knowledge in value proposition to support value addition and recovery of losses along the supply chain.
- iii. Low per capita consumption of fish in Kenya. In Kenya, the per capita fish consumption is 4.5kg as compared to the Africa average of 10kg and the global average 20kg. This affects the demand of fish locally and there is need for a catalytic engagement to spur more consumption.
- iv. Inadequate market data and information. The operators in the fisheries value chain are scattered and disjointed in the management of marketing functions and this makes it difficult to make informed decisions on where to source the products and where to sell competitively.
- v. Ineffective traceability systems. Due to challenges of pollution and contamination, consumers are more concerned about the source of fish and fish products that they intend to consume. This therefore requires a coordinated system to track the source and the distribution channels that provide assurance on quality and safety.

- vi. Failure to understand emerging markets. Certain markets are specific on certain attributes such as; carbon foot prints in production and distribution channels, conservation, organic production that meet requirements for certain markets. There is a need for capacity development to ensure compliance to certification schemes to meet such market requirements. KFMA is working to ensure conformity to increase market share in the international market and for premium pricing.
- vii. Weak intergovernmental relations between the National Government and the county Governments. It is critical to address the challenges that arise from fish marketing among county governments and also to harmonize the operations with national fish marketing policies. KFMA therefore provides linkages that facilitate policy implementation on matters relating to fish trade.
- viii. Limited access to international markets. Access to international markets is critical especially for marine products whose consumption locally are not adequate but fetch relatively higher price in the EU, Asia continent and the USA markets. KFMA is a facilitator in gathering relevant information and sharing with stakeholder to enhance trade volumes that contributes to increased foreign exchange.
- ix. Weak market research and lack of value chain analysis to inform market interventions. KFMA as an authority provides consultancy services and technical advice on research and value chain analysis to inform effective market operations.
- x. Disorganized small-scale fishers. Many small-scale fishers operate individually thus lack strong bargaining power and are therefore exploited by middlemen. To address this challenge, KFMA is undertaking a nationwide exercise to transform 445 BMUs into marketing organizations to streamline marketing in fisheries.

Outlook: As we look ahead, the Kenya Fish Marketing Authority remains dedicated to its mission. We have set ambitious goals for the upcoming year:

1. **Partnerships and Collaborations:** During the FY 2023/2024, the Authority initiated negotiations to enter into an MoU with the government of Spain for financial support to the tune of 959,400 Euros for feasibility study and 80,000,000 Euros for development of six ultra-modern fish markets, development of an electronic Fish Marketing Information Management System; and capacity building of fish value chain actors. On completion, these will be operated under Public Private Partnership and generate revenue for the government. The Authority is also pursuing other external funding from various partners including Australian Direct Aid Program.
2. **Expanded Market Access:** We will continue to explore new markets and partnerships, both locally and internationally, to further expand the reach of Kenyan fish and fish products.
3. **Innovation and Technology:** We will promote partnerships and investments in cutting- edge technology for processing, packaging, and distribution to ensure product quality and reduce post-harvest losses.

4. **Sustainability:** Environmental sustainability is a core value. We will work towards responsible fishing practices including deterring to the extent possible trade in Illegal, Unreported and Unregulated fish and environmental conservation.
5. **Capacity Building:** We will focus on strengthening the capacity of our workforce and fisher folk through training and skill development programs.

In conclusion, Kenya Fish Marketing Authority has made significant progress in addressing the challenges within the fisheries value chain. We are grateful for the support of the Board of Directors, our stakeholders, partners, and the staff. Together, we are poised to unlock the full potential of Kenya's fisheries sector and secure a prosperous future for all.

Thank you for your continued support.

CHARLES OGWANG

AG. CHIEF EXECUTIVE OFFICER

KENYA FISH MARKETING AUTHORITY

7. Statement of Performance against Predetermined Objectives for FY 2023/2024

Introduction

In accordance with Section 81 (2) (f) of the Public Finance Management Act, 2012, it is required that at the end of each financial year, the Accounting Officer of each National Government entity prepares financial statements that include a statement of the entity's performance against predetermined objectives. This is to be done following the standards and formats set by the Public Sector Accounting Standards Board.

The key development objectives outlined in the Kenya Fish Marketing Authority's 2018-2022 Strategic Plan are:

- a. To develop, implement and review policies, strategies, plans, regulations, guidelines, and operational standards on marketing of fish and fishery products.
- b. To diversify fish and fishery products and markets
- c. To ensure prevention, deterrence and elimination of trading and marketing of fish and fishery products from IUU fishing.
- d. To establish fish marketing information management system.
- e. To develop capacity of the KFMA and relevant stakeholders

Progress on attainment of Strategic development objectives

For purposes of implementing and cascading the above development objectives to specific sectors, all the development objectives were made specific, measurable, achievable, realistic, and time-bound (SMART) and converted into development outcomes. Attendant indicators were identified for reasons of tracking progress and performance measurement: Below we provide the progress on attaining the stated objectives:

MDA Program (Strategic Focus Area)	Objective	Outcome	Indicator	Performance
Policy and legal frameworks on marketing of fish and fishery products	To develop, implement and review policies, strategies, plans, regulations, guidelines and operational standards on marketing of fish and fishery products	Conducive environment for marketing of fish and fishery products	Percentage level of Developed national fish marketing strategy	A draft National Fish Marketing Strategy and the Strategic Plan 2023-2027 have been developed and await launching.

Diversification of fish and fishery products and markets	To diversify fish and fishery products and markets	Increased earnings from marketing of fish and fish products	Number of organized stakeholders to ensure smooth marketing of fish and fishery products	One hundred and fifty (150) Beach Management Units (BMU) have been transformed into Fish Marketing Co-operatives.
Fish marketing database and information management	To establish fish marketing information management system	Efficient Market Information Management	Percentage level of development of the Marketing Information System.	GPS coordinates, BMU details, Phone numbers, membership, species landed were collected which constitutes 10% level of development. A design for the development of electronic Marketing Information System (e-FMIS) was completed.
Capacity Development	To develop capacity of the KFMA and relevant stakeholders	Efficient and effective Marketing of fish and fishery products	Number of developed KFMA operational instruments. 8. Corporate Governance Statement

The Kenya Fish Marketing Authority (KFMA) is dedicated to maintaining the highest standards of corporate governance in its operations. This Corporate Governance Statement outlines the governance framework, policies, and practices for the year 2023/24, as well as the commitment of KFMA to responsible governance.

KFMA operates with a comprehensive and dynamic Board Work Plan that outlines strategic priorities, key tasks, and objectives for the Board of Directors, ensuring alignment with the organization's mission and vision.

The Board of Directors plays a crucial role in guiding KFMA's activities, with responsibilities including:

- i. Approving and overseeing the implementation of strategic plans
- ii. Monitoring financial performance and budgeting
- iii. Ensuring compliance with legal and regulatory requirements
- iv. Appointing, evaluating, and retaining senior management
- v. Safeguarding the interests of stakeholders

KFMA is dedicated to enhancing the skills and knowledge of its directors. A structured induction program is in place to familiarize new directors with the organization's operations and governance procedures. Furthermore, continuous education and training opportunities are provided to directors to keep them informed about industry trends, governance best practices, and evolving legal requirements.

Effective succession planning is recognized as vital for continuity and leadership development. KFMA has established a succession plan to identify potential future leaders and outline processes for their development and advancement.

Directors are appointed in strict compliance with the Fisheries Management and Development Act, 2016, and other relevant laws. The appointment process is thorough and transparent, involving nominations, vetting, and approval by the appropriate authorities to ensure directors possess the necessary skills, experience, and integrity.

The removal of directors is conducted in accordance with the Fisheries Management and Development Act and the Mwongozo Code of Conduct. Grounds for removal include breaches of fiduciary duties, conflicts of interest, or other misconduct that could harm the organization. Such decisions are made with careful consideration of the organization's interests and stakeholders.

KFMA conducts regular and rigorous performance evaluations of the Board, its committees, and individual directors. These evaluations are carried out annually by the State Corporations Advisory Committee to ensure impartiality and objectivity. Evaluation results are used to identify areas for improvement and to acknowledge exceptional contributions.

A robust Conflict of Interest register is maintained by KFMA, requiring directors to disclose any potential conflicts. Policies outline procedures for managing conflicts of interest, emphasizing transparency and accountability.

KFMA adheres to principles of fairness and transparency in determining board remuneration. Director compensation is set according to prevailing government rates, with the Chairperson receiving monthly honoraria as prescribed.

Under the period under review, the KFMA Board held four full board meetings, one special board meeting, eight committee meetings, and one retreat to review the National Fish Marketing Strategy and conduct a working tour of the Lake Victoria Fishery. These meetings addressed various strategic, financial, and governance matters.

Director attendance at board meetings is given significant importance. In 2023, the average attendance rate of board members at regular meetings was 90%, reflecting their commitment to their fiduciary duties.

The Kenya Fish Marketing Authority remains committed to the highest standards of corporate governance. Through transparency, accountability, and ethical conduct, we strive to effectively and responsibly fulfil our mandate of marketing fish and fisheries products from Kenya. This Corporate Governance Statement underscores our unwavering dedication to responsible governance practices.

9. Management Discussion and Analysis.

The Kenya Fish Marketing Authority (KFMA), established as a State corporation in 2016, plays a vital role in promoting and marketing fish and fisheries products from Kenya. This Management Discussion and Analysis provides a comprehensive overview of KFMA's performance and financial status for the fiscal year ending 2024, highlighting key developments and strategic goals.

The governance structure of KFMA is fundamental to its success. The initial Board of Directors was appointed in September 2018 and reappointed in 2021 for an additional three-year term, ensuring leadership continuity and stability. In April 2023, the Authority welcomed a new Chairperson to guide its endeavors over the next three years.

KFMA is committed to human resource development. A significant achievement occurred in March 2022 with the development and approval of Human Resources instruments. The planned hiring of an additional 60 staff members, pending approval from the National Treasury, is set to significantly boost KFMA's operational capacity. This strategic development will enhance the Authority's ability to fulfill its mandate and support the Kenyan fisheries sector more effectively.

Despite notable performance, KFMA continues to face challenges related to inadequate funding. Over the past three years, the Authority received Exchequer grants of KSh. 16 million in 2022, KSh. 31 million in 2023 and KSh. 51 million in 2024. However, the approved funding estimate for the financial year 2024/25 was KSh. 46 million which has been adversely affected by budget cuts due to the austerity measures that were issued by the government.

KFMA's strategic objectives are ambitious and forward-looking. The Authority aims to increase per capita fish consumption from 4.5 kilograms to 10 kilograms over the next five years, aligning with broader goals of enhancing nutrition and food security in Kenya. Additionally, KFMA seeks to boost the fisheries sector's contribution to the Gross National Product from KSh. 37 billion to KSh. 100 billion within the same period. These goals reflect KFMA's strong commitment to driving economic growth and development.

Over the last 5 years, the annual fish landing in tonnage and value has been as presented below.

Annual Fish Landings	2018		2019		2020		2021		2022	
	M. Tons	Value '000 KSh	M. Tons	Value '000 KSh	M. Tons	Value '000 KSh	M. Tons	Value '000 KSh	M. Tons	Value '000 KSh

***Kenya Fish Marketing Authority
Annual Report and Financial Statements
for the year ended June 30, 2024.***

KFMA recognizes the challenges it faces, including the need for consistent and increased funding. However, these challenges are viewed as opportunities for innovation and improvement. The Authority will actively seek alternative sources of revenue and explore partnerships to bolster its financial stability.

In conclusion, Kenya Fish Marketing Authority remains dedicated to its mission and strategic goals. Despite financial constraints, the organization is poised for growth, with a new Chairperson and a reinforced workforce on the horizon. KFMA's commitment to elevating fish consumption and its contribution to the nation's economy by uplifting the bottom of the pyramid fisher folk underscore its pivotal role in Kenya's development. As we move forward, the Authority remains steadfast in its pursuit of excellence and positive impact on the fisheries sector and the nation.

10. Environmental and Sustainability Reporting

The Authority is dedicated to enhancing food and nutritional security while improving the livelihoods and incomes of fisher folk and other stakeholders. To achieve its mandate of marketing fish and fisheries products, the Authority has prioritized three key strategic areas; Improved capacity to market fish and fisheries products; Functional policy and legal frameworks; and Enhanced market access for fish and fisheries products locally and internationally.

Our performances in the strategic areas are as outlined below:

a) Sustainability Strategy and Profile

The Kenya Fish Marketing Authority (KFMA) is committed to promoting sustainable fishing practices, ensuring the responsible use of aquatic resources, and contributing to the socio-economic development of Kenya's fishing communities. The fisheries sub-sector is currently facing numerous challenges, including a high prevalence of HIV and AIDS among fisher folk, the significant impact of the Covid-19 pandemic on both fish production and demand, Infrastructure gaps and the effects of climate change.

The government's commitment to the Blue Economy initiative, which emphasizes sustainable use of marine resources, provides a favorable policy environment. However, challenges such as corruption, inadequate enforcement of regulations, and political instability in some regions may hinder sustainability efforts. Global demand for fish and fisheries products continues to rise, offering opportunities for growth. However, fluctuating exchange rates, inflation, and global economic uncertainties pose risks. Climate change also significantly impacts fish stocks and marine ecosystems, necessitating adaptive strategies. Climate change has led to intermittent flooding and swamping of fish landing sites in our inland water bodies, undermining efforts for their construction and rehabilitation, among other issues.

KFMA aligns its sustainability strategy with international best practices by:

- **Adopting Ecosystem-Based Approach to Fisheries Management (EBM):** Ensuring that fishing activities are conducted in a way that maintains the health of marine ecosystems.
- **Promoting Certification Schemes:** Encouraging compliance with international standards such as the Marine Stewardship Council (MSC) certification, which assures consumers of the sustainability of fish products.
- **Engaging in Global Partnerships:** Collaborating with international organizations, such as the Food and Agriculture Organization (FAO), to share knowledge, resources, and best practices.

Despite these challenges, there is optimism within the sub-sector, particularly with the increase in per capita fish consumption. Resources have been allocated to upgrade fisheries infrastructure and operationalize institutions established by the Fisheries Development and Management Act, 2016. These efforts will be instrumental in achieving our mandate.

b) Environmental Performance

Climate change poses significant challenges to fisheries and aquaculture, affecting water bodies through acidification, shifts in sea temperatures, and alterations in circulation patterns. The increased frequency and intensity of extreme weather events, along with rising sea levels and related ecological changes, impact barrier islands, beaches, salt marshes, mangrove stands, and

***Kenya Fish Marketing Authority
Annual Report and Financial Statements
for the year ended June 30, 2024.***

floodplains. These changes have the potential to alter the physicochemical properties of fish habitats, directly influencing fish feeding, migration, and breeding behaviors, while indirectly affecting growth, mortality, and reproduction. Such impacts could hinder the achievement of development goals within the fisheries subsector.

Recognizing the strong link between climate and fish production, the Authority, in collaboration with the State Department, has initiated several environmental conservation efforts, including tree-planting initiatives. The State Department is also expediting the implementation of climate change mitigation and adaptation strategies in line with the Kenya Climate Smart Agriculture Strategy 2017-2026, the Kenya Climate Smart Agriculture Implementation Framework 2018-2027, the National Adaptation Plan 2015-2030, and the National Action Plan 2018-2022.

The increase in human population, high prices of fish and fishery products coupled with the open access of capture fisheries has led to over-fishing and the rise in Illegal, Unreported and Unregulated fishing. As a result, the Fisheries Management and Development Act, 2016 was enacted to protect, manage, use and develop the aquatic resources in a manner which is consistent with ecologically sustainable development, to uplift the living standards of the fishing communities and to introduce fishing to traditionally non-fishing communities to enhance food security.

c) Employee Welfare

The Authority is committed to a fair, transparent, and inclusive hiring process. The hiring policies are guided by principles of meritocracy, diversity, and equal opportunity, ensuring that all candidates are evaluated based on their qualifications, experience, and potential to contribute to the organization.

The recruitment process for both technical and non-technical staff within the Authority, from entry-level to senior positions, is managed by the Public Service Commission of Kenya. This process is strictly guided by the Commission's established guidelines, which are updated periodically. The Board of Management, in collaboration with the Commission, is responsible for overseeing promotions of junior and middle-level staff, following the delegated authority and guidelines.

The appointment of the Board Chair is made by the President, followed by vetting by the National Assembly and official gazetting. A critical consideration during recruitment and promotions is gender parity, as mandated by the Constitution of Kenya, 2010, and the Diversity Policy for the Public Service, 2016. The Authority is committed to aligning its practices with these principles to ensure they reflect the aspirations of the Kenyan people.

To support our development goals, the Authority places a strong emphasis on the performance of public service staff. Annual performance evaluations are conducted following the guidelines of the Staff Performance Appraisal System in the Public Service, 2016. Feedback is provided to employees to help them understand their strengths and areas for development. Appropriate sanctions or rewards are applied based on these evaluations.

In terms of training, the Authority prioritizes group training programs that support career advancement, motivate staff, foster teamwork, and maintain cost efficiency. KFMA has established clear career pathways for its employees, enabling them to progress within the organization based on their skills, performance, and aspirations. Career development plans are tailored to individual employees, ensuring that they receive the necessary support to achieve their professional goals. Additionally, the Authority is committed to providing a safe and healthy working environment for all its employees.

d) Market Place Practices

Kenya Fish Marketing Authority
Annual Report and Financial Statements
for the year ended June 30, 2024.

The Kenya Fish Marketing Authority (KFMA) is dedicated to upholding ethical standards and responsible practices in all its market-related activities. This includes fostering fair competition, maintaining strong supplier relationships, ensuring ethical marketing, and safeguarding consumer rights. It is committed to maintaining the highest standards of integrity and transparency in all its operations including zero tolerance for corruption and whistleblower protection.

To promote fair market practices, the Authority is currently implementing several initiatives aimed at reducing costs across the production, storage, distribution, and marketing of fish. This includes the modernization of fish landing sites at Lake Victoria and along the coastal strip, which will tackle storage issues that have contributed to high post-harvest losses and, consequently, elevated production costs. Additionally, we are constructing state-of-the-art markets in Kisumu, Mombasa, and Kilifi counties to resolve marketing challenges, alongside piloting digital and online marketing platforms.

The Authority recognizes the importance of providing both local and international markets with access to high-quality fish and fish products. To this end, we are planning the development of fish markets in the Coast, Western, and Rift Valley regions. Furthermore, we intend to establish containerized fish outlets nationwide to improve market accessibility and encourage increased fish consumption.

KFMA is committed to honoring all contractual agreements with its suppliers. The Authority ensures that all terms and conditions are clear and mutually agreed upon, and it adheres to these terms throughout the contract period. Besides, Timely payment is a cornerstone of KFMA's supplier relations. The Authority follows a strict payment schedule to ensure that suppliers are paid promptly and in full for their services or products. This fosters trust and reliability in its business relationships.

e) Corporate Social Responsibility / Community Engagements

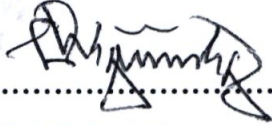

The Kenya Fish Marketing Authority (KFMA) is deeply committed to giving back to the communities it serves through a robust Corporate Social Responsibility (CSR) strategy. This strategy is aligned with the Authority's mission to promote sustainable fishing practices and improve the livelihoods of fishing communities across Kenya. KFMA's CSR initiatives focus on social investment, community development, environmental conservation, and education.

This has continued its support for community-led fisheries management initiatives. The Authority provided training to Beach Management units in coastal and inland regions, empowering them to manage their resources sustainably. This initiative has resulted in increased fish stocks and improved income for local fishers. The Authority held several stakeholder forums to engage with community leaders, fishers, and other stakeholders in L. Baringo, Naivasha and Lamu. These forums provided a platform for discussing community needs, receiving feedback on KFMA's initiatives, and co-creating solutions to local challenges.

In addition, KFMA has been actively involved in mangrove reforestation projects along Kenya's coast. In partnership with local communities and environmental organizations, the Authority supported the planting of thousands of mangrove seedlings Lamu and Tana River to restore degraded coastal ecosystems. These efforts have helped protect shorelines from erosion, enhance fish breeding grounds, and sequester carbon dioxide, contributing to climate change mitigation.

SECRETARY TO THE BOARD

11. Statement of Directors Responsibilities

Section 81 of the Public Finance Management Act, 2012 require the Directors to prepare financial statements in respect of the Authority, which gives a true and fair view of the state of affairs of the Authority at the end of the financial year/period and the operating results of the Authority for that period. The Directors are also required to ensure that the Authority keeps proper accounting records which disclose with reasonable accuracy the financial position. The Directors are also responsible for safeguarding the assets of the Authority.

The Directors are responsible for the preparation and presentation of the financial statements, which give a true and fair view of the state of affairs at the end of the financial year ended on June 30, 2024. This responsibility includes: (i) Maintaining adequate financial management arrangements and ensuring that these continue to be effective throughout the reporting period; (ii) Maintaining proper accounting records, which disclose with reasonable accuracy at any time the financial position (iii) Designing, implementing and maintaining internal controls relevant to the preparation and fair presentation of the financial statements, and ensuring that they are free from material misstatements, whether due to error or fraud; (iv) Safeguarding the assets of the Authority; (v) Selecting and applying appropriate accounting policies; and (vi) Making accounting estimates that are reasonable in the circumstances.

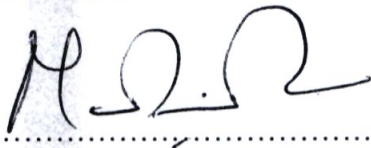

The Directors accept responsibility for the financial statements, which have been prepared using appropriate accounting policies supported by reasonable and prudent judgements and estimates, in conformity with International Public Sector Accounting Standards (IPSAS), and in the manner required by the PFM Act, 2012. The Directors are of the opinion that the Authority's financial statements give a true and fair view of the state of Authority's transactions during the financial year ended June 30, 2024, and of the Authority's financial position as at that date. The Directors further confirms the completeness of the accounting records maintained, which have been relied upon in the preparation of the Authority's financial statements as well as the adequacy of the systems of internal financial control.

***Kenya Fish Marketing Authority
Annual Report and Financial Statements
for the year ended June 30, 2024.***

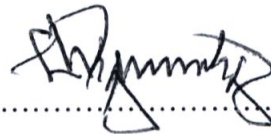

In preparing the financial statements, the Directors have assessed the entity's ability to continue as a going concern and nothing has come to the attention of the Directors to indicate that the Authority will not remain a going concern for at least the next twelve months from the date of this statement.

Approval of the financial statements

REPORT OF THE AUDITOR-GENERAL ON KENYA FISH MARKETING AUTHORITY FOR THE YEAR ENDED 30 JUNE, 2024

PREAMBLE

I draw your attention to the contents of my report which is in three parts:

- A. Report on Financial Statements that considers whether the financial statements are fairly presented in accordance with the applicable financial reporting framework, accounting standards and the relevant laws and regulations that have a direct effect on the financial statements.
- B. Report on Lawfulness and Effectiveness in the Use of Public Resources which considers compliance with applicable laws, regulations, policies, gazette notices, circulars, guidelines and manuals and whether public resources are applied in a prudent, efficient, economic, transparent and accountable manner to ensure Government achieves value for money and that such funds are applied for the intended purpose.
- C. Report on Effectiveness of Internal Controls, Risk Management and Governance which considers how the entity has instituted checks and balances to guide internal operations. This responds to the effectiveness of the governance structure, risk management environment and internal controls, developed and implemented by those charged with governance for orderly, efficient and effective operations of the entity.

An Unmodified Opinion is issued when the Auditor-General concludes that the financial statements are fairly presented in accordance with the applicable financial reporting framework. The Report on Financial Statements should be read together with the Report on Lawfulness and Effectiveness in the Use of Public Resources, and the Report on Effectiveness of Internal Controls, Risk Management, and Governance.

The three parts of the report aim to address the Auditor-General's statutory roles and responsibilities as provided by Article 229 of the Constitution, the Public Finance Management Act, 2012, and the Public Audit Act, 2015. The three parts of the report when read together constitute the report of the Auditor-General.

REPORT ON THE FINANCIAL STATEMENTS

Opinion

I have audited the accompanying financial statements of Kenya Fish Marketing Authority set out on pages 1 to 19, which comprise the statement of financial position as at

30 June, 2024 and the statement of changes in net assets, statement of cash flows and statement of comparison of budget and actual amounts for the year then ended and a summary of significant accounting policies and other explanatory information in accordance with the provisions of Article 229 of the Constitution of Kenya and Section 35 of the Public Audit Act, 2015. I have obtained all the information and explanations which to the best of my knowledge and belief, were necessary for the purpose of the audit.

In my opinion, the financial statements present fairly, in all material respects, the financial position of Kenya Fish Marketing Authority as at 30 June, 2024 and of its financial performance and its cash flows for the year then ended, in accordance with International Public Sector Accounting Standards (Accrual Basis) and comply with the Fisheries Management and Development Act, 2016 and the Public Finance Management Act, 2012.

Basis for Opinion

The audit was conducted in accordance with International Standards for Supreme Audit Institutions (ISSAIs). I am independent of the Kenya Fish Marketing Authority Management in accordance with ISSAI 130 on the Code of Ethics. I have fulfilled other ethical responsibilities in accordance with the ISSAI and in accordance with other ethical requirements applicable to performing audits of financial statements in Kenya. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Key Audit Matters

Key audit matters are those matters that, in my professional judgement, are of most significance in the audit of the financial statements. There were no key audit matters to report in the year under review.

Other Matter

Unresolved Prior Year Issues

In the audit of the previous year, various issues were raised under the Report on Lawlessness and Effectiveness in Use of Public Resources and Report on Effectiveness of Internal Controls, Risk Management and Governance. However, Management has not indicated whether the issues have been resolved.

Other Information

Management is responsible for the other information set out on page iv to xxxv which comprise of Key Entity Information and Management, Board of Directors, Key Management Team, Chairman's Statement, Report of the Chief Executive Officer, Corporate Governance Statement, Statement of Performance Against Predetermined Objectives, Management Discussion and Analysis, Environmental and Sustainability Reporting and the Statement of Directors Responsibilities. The Other Information does not include the financial statements and my audit report thereon.

In connection with my audit on the Authority's financial statements, my responsibility is to read the other information and in doing so, consider whether the other information is materially inconsistent with the financial statements or my knowledge obtained in the audit or otherwise appears to be materially misstated. If based on the work I have performed, I conclude that there is a material misstatement of this Other Information, I am required to report that fact. I have nothing to report in this regard.

My opinion on the financial statements does not cover the Other Information and accordingly, I do not express an audit opinion or any form of assurance thereon.

REPORT ON LAWFULNESS AND EFFECTIVENESS IN THE USE OF PUBLIC RESOURCES

Conclusion

As required by Article 229(6) of the Constitution, based on the audit procedures performed, except for the effect of the matters described in the Basis for Conclusion on Lawfulness and Effectiveness in the Use of Public Resources section of my report, I confirm that nothing else has come to my attention to cause me to believe that public resources have not been applied lawfully and in an effective way.

Conclusion

Basis for Conclusion

1. Under staffing in the Authority

The Kenya Fish Marketing Authority operates with five (5) employees including an acting Chief Executive Officer. However, review of documents provided revealed that in March, 2022 Management developed the Authority's Human Resource instruments to enable the employment of additional staff numbering sixty (60). However, the recruitment has been pending awaiting approval from The National Treasury. The shortfall of fifty-five (55) employees has impacted on the Authority's ability to effectively discharged its mandate.

In the circumstances, ability of the Authority to discharge its mandate effectively could not be confirmed.

2. Insufficient Budget

Review of documents provided revealed that the Authority's strategic goals during the year included improved capacity to market fish and fisheries products, functional policy and legal frameworks and enhanced market access for fish and fisheries products both locally and internationally.

However, as disclosed in Paragraph 4 in Management Discussion Analysis, the Authority received Kshs.51 million. However, the allocation during the year and in prior years has

not been sufficient to undertake activities of transforming 445 beach management units, identified nationally into marketing cooperatives.

In the circumstances, achievement of intended benefits to the fishing community through the Authority could not be confirmed.

The audit was conducted in accordance with ISSAI 3000 and ISSAI 4000. The standards require that I comply with ethical requirements and plan and perform the audit to obtain assurance about whether the activities, financial transactions and information reflected in the financial statements comply in all material respects, with the authorities that govern them. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my conclusion.

REPORT ON THE EFFECTIVENESS OF INTERNAL CONTROLS, RISK MANAGEMENT AND GOVERNANCE

Conclusion

As required by Section 7(1)(a) of the Public Audit Act, 2015 and based on the audit procedures performed, except for the effect of the matters described in the Basis for Conclusion on the Effectiveness of Internal Controls, Risk Management and Governance section of my report, I confirm that nothing else has come to my attention to cause me to believe that internal controls, risk management and governance were not effective.

Basis for Conclusion

1. Lack of an Approved Strategic Plan

During the year under review, the Authority operated without a Strategic Plan since an earlier one covering a period 2018 to 2022 had lapsed. A draft Strategic Plan developed by Management was awaiting approval of the Board. This was contrary to Regulation 32(5) of Public Finance (National Government) Regulations, 2015 which provides that all budget proposals should be supported by the National Government entity strategic plan.

In the circumstances, Management was in breach of the law.

2. Lack of an Approved Board Charter

During the year under review, the Authority's Board did not have an approved board charter to guide its activities. This is contrary to Section 1.11 of the Mwongozo Code of Conduct for State Corporations which require the Board to develop and adopt a Board Charter which should define the role, responsibilities and functions of the Board in the governance of the organization.

In the circumstances, the effectiveness of the Authority's governance structure could not be confirmed.

The audit was conducted in accordance with ISSAI 2315 and ISSAI 2330. The standards require that I plan and perform the audit to obtain assurance about whether effective processes and systems of internal controls, risk management and overall governance

were operating effectively in all material respects. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my conclusion.

Responsibilities of Management and the Board of Directors

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Public Sector Accounting Standards (Accrual Basis) and for maintaining effective internal controls as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error and for its assessment of the effectiveness of internal controls, risk management and governance.

In preparing the financial statements, Management is responsible for assessing the Authority's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless Management is aware of the intention to cease operations.

Management is also responsible for the submission of the financial statements to the Auditor-General in accordance with the provisions of Section 47 of the Public Audit Act, 2015.

In addition to the responsibility for the preparation and presentation of the financial statements described above, Management is also responsible for ensuring that the activities, financial transactions and information reflected in the financial statements comply with the authorities which govern them and that public resources are applied in an effective way.

The Board of Directors is responsible for overseeing the Authority's financial reporting process, reviewing the effectiveness of how Management monitors compliance with relevant legislative and regulatory requirements, ensuring that effective processes and systems are in place to address key roles and responsibilities in relation to governance and risk management, and ensuring the adequacy and effectiveness of the control environment.

Auditor-General's Responsibilities for the Audit

My responsibility is to conduct an audit of the financial statements in accordance with Article 229(4) of the Constitution, Section 35 of the Public Audit Act, 2015 and the International Standards for Supreme Audit Institutions (ISSAIs). The standards require that, in conducting the audit, I obtain reasonable assurance about whether the financial statements as a whole are free from material misstatements, whether due to fraud or error and to issue an auditor's report that includes my opinion in accordance with Section 48 of the Public Audit Act, 2015. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISSAIs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

In conducting the audit, Article 229(6) of the Constitution also requires that I express a conclusion on whether or not in all material respects, the activities, financial transactions and information reflected in the financial statements are in compliance with the authorities that govern them and that public resources are applied in an effective way. In addition, I consider the entity's control environment in order to give an assurance on the effectiveness of internal controls, risk management and governance processes and systems in accordance with the provisions of Section 7 (1) (a) of the Public Audit Act, 2015.

Further, I am required to submit the audit report in accordance with Article 229(7) of the Constitution.

Detailed description of my responsibilities for the audit is located at the Office of the Auditor-General's website at: <https://www.oagkenya.go.ke/auditor-generals-responsibilities-for-audit/>. This description forms part of my auditor's report.

FCPA Nancy Gathungu, CBS
AUDITOR-GENERAL

Nairobi

27 December, 2024

13. Statement of Financial Performance for the year ended 30 June 2024

Surplus for the period	1,706,337	-	1,706,337	1,706,337	-	100%

19. Notes to the Financial Statements

1. General Information

Kenya Fish Marketing Authority is established by and derives its authority and accountability from Fisheries Management and Development Act. The Entity is wholly owned by the Government of Kenya and is domiciled in Kenya. The Authority's principal activity is to market fish and fish products.

2. Statement of Compliance and Basis of Preparation

The financial statements have been prepared on a historical cost basis except for the measurement at re-valued amounts of certain items of property, plant and equipment, marketable securities and financial instruments at fair value, impaired assets at their estimated recoverable amounts and actuarially determined liabilities at their present value. The preparation of financial statements in conformity with International Public Sector Accounting Standards (IPSAS) allows the use of estimates and assumptions. It also requires management to exercise judgement in the process of applying the Authority's accounting policies. The areas involving a higher degree of judgement or complexity, or where assumptions and estimates are significant to the financial statements, are disclosed in Note 5 of these financial statements.

The financial statements have been prepared and presented in Kenya Shillings, which is the functional and reporting currency of the Authority. The financial statements have been prepared in accordance with the PFM Act, the State Corporations Act, and International Public Sector Accounting Standards (IPSAS). The accounting policies adopted have been consistently applied to all the years presented.

Notes to the Financial Statements (Continued)

3. Adoption of New and Revised Standards

- i. New and amended standards and interpretations in issue effective in the year ended 30 June 2024.*

There were no new and amended standards issued in the financial year.

- ii. Early adoption of standards*

The Entity did not early – adopt any new or amended standards in the financial year.

Notes to the financial statements (continued)

4. Summary of Significant Accounting Policies

a) Revenue recognition

i) Revenue from non-exchange transactions

Transfers from other government entities

Revenues from non-exchange transactions with other government entities are measured at fair value and recognized on obtaining control of the asset (cash, goods, services and property) if the transfer is free from conditions and it is probable that the economic benefits or service potential related to the asset will flow and can be measured reliably. To the extent that there is a related condition attached that would give rise to a liability to repay the amount, the amount is recorded in the statement of financial position and realised in the statement of financial performance over the useful life of the assets that has been acquired using such funds.

b) Budget information

The original budget for the Current FY was approved by the National Assembly on 30th June 2023. Subsequent revisions or additional appropriations were made to the approved budget in accordance with specific approvals from the appropriate authorities. The additional appropriations are added to the original budget by the Entity upon receiving the respective approvals in order to conclude the final budget. Accordingly, the Entity recorded no additional appropriations on the 2023/24 budget.

The Authority's budget is prepared on a different basis to the actual income and expenditure disclosed in the financial statements. The financial statements are prepared on accrual basis using a classification based on the nature of expenses in the statement of financial performance, whereas the budget is prepared on a cash basis. The amounts in the financial statements were recast from the accrual basis to the cash basis and reclassified by presentation to be on the same basis as the approved budget. A comparison of budget and actual amounts, prepared on a comparable basis to the approved budget, is then presented in the statement of comparison of budget and actual amounts. In addition to the Basis difference, adjustments to amounts in the financial statements are also made for differences in the formats and classification schemes adopted for the presentation of the financial statements and the approved budget.

Notes to the Financial Statements (Continued)

Summary of Significant Accounting Policies (Continued)

c) Taxes

Current income tax

Current income tax assets and liabilities for the current period are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in the area where the Authority operates and generates taxable income. Current income tax relating to items recognized directly in net assets is recognized in net assets and not in the statement of financial performance. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Notes to the Financial Statements (Continued)

Summary of Significant Accounting Policies (Continued)

d) Property, plant and equipment

All property, plant and equipment are stated at cost less accumulated depreciation and impairment losses. Cost includes expenditure that is directly attributable to the acquisition of the items. When significant parts of property, plant and equipment are required to be replaced at intervals, the Entity recognizes such parts as individual assets with specific useful lives and depreciates them accordingly. Likewise, when a major inspection is performed, its cost is recognized in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognized in surplus or deficit as incurred. Where an asset is acquired in a non-exchange transaction for nil or nominal consideration the asset is initially measured at its fair value. The estimated assets useful lives and rates are used as shown below:

Asset Description	Estimated useful life in years	Rate % or appportionment
Furniture, Fittings and Office Equipment	8	12.5%
Computers and Related Equipment	3.33	30%

e) Nature and purpose of reserves

The Entity creates and maintains reserves in terms of specific requirements.

f) Changes in accounting policies and estimates

The Entity recognizes the effects of changes in accounting policy retrospectively. The effects of changes in accounting policy are applied prospectively if retrospective application is impractical.

g) Related parties

The Authority regards a related party as a person or an Entity with the ability to exert control individually or jointly, or to exercise significant influence over the Authority, or vice versa.

***Kenya Fish Marketing Authority
Annual Report and Financial Statements
for the year ended June 30, 2024.***

Members of key management are regarded as related parties and comprise the directors, the CEO and senior managers.

h) Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and cash at bank, short-term deposits on call and highly liquid investments with an original maturity of three months or less, which are readily convertible to known amounts of cash and are subject to insignificant risk of changes in value. Bank account balances include amounts held at the Central Bank of Kenya and at various commercial banks at the end of the financial year. For the purposes of these financial statements, cash and cash equivalents also include short term cash imprests and advances to authorised public officers and/or institutions which were not surrendered or accounted for at the end of the financial year.

i) Comparative figures

Where necessary comparative figures for the previous financial year have been amended or reconfigured to conform to the required changes in presentation.

j) Subsequent events

There have been no events subsequent to the financial year end with a significant impact on the financial statements for the year ended June 30, 2024.

5. Significant Judgments and Sources of Estimation Uncertainty

The preparation of the Authority's financial statements in conformity with IPSAS requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities, at the end of the reporting period. However, uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in future periods. State all judgements, estimates and assumptions made:

Estimates and assumptions.

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Entity based its assumptions and estimates on parameters available when the consolidated financial statements were prepared. However, existing circumstances and assumptions about future developments may change

due to market changes or circumstances arising beyond the control of the Entity. Such changes are reflected in the assumptions when they occur. IPSAS 1.140

Useful lives and residual value

The useful lives and residual values of assets are assessed using the following indicators to inform potential future use and value from disposal:

- a) The condition of the asset based on the assessment of experts employed by the Entity.
- b) The nature of the asset, its susceptibility and adaptability to changes in technology and processes.
- c) The nature of the processes in which the asset is deployed.
- d) Availability of funding to replace the asset.
- e) Changes in the market in relation to the asset
