THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT

(No. 8 of 1999)

NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED REHABILITATION AND IMPROVEMENT
OF DUNGA RAW WATER INTAKE AND WATER TREATMENT
PLANT, KISUMU COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to Regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The proponent, Lake Victoria South Water Works Development Agency (LVSWWDA), proposes to rehabilitate and improve structures and facilities at the Dunga Raw Water intake works, Transmissions Mains and Water Treatment Plant, including the decommission of 1958 and 1985 (option 2) pump stations, Kisumu county.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impacts	Mitigation Measures
Impacts of obtaining construction materials	<ul style="list-style-type: none"> • Re-use of excavated materials as fill in the works shall be maximised. • Borrow pits and quarry sites will be sited carefully so as to minimise impacts on existing land uses. • Top soil within borrow pits and quarry sites shall be stripped and stored safely for use in site restoration. • All borrow pits and quarry sites shall be closed in accordance with an approved plan to maximise their long-term biological productivity (capacity for plant growth) and minimise health and safety hazards. • All new quarry sites that shall be opened for purposes of supplying materials to this project shall be subjected to Environmental Impact Assessment study.
Accidents Injuries workers	<ul style="list-style-type: none"> • The Contractor shall conform to all the stipulations of the Occupational Health and Safety Act, 2007. The Act requires the designation of a Health and Safety representative when more than 20 employees are deployed. • The contractor shall provide ample warning signs, guard rails, warning tape, etc., around open excavations, stacks of material, debris, etc. and shall be held liable for all claims as a result of neglect of such precautions and provisions. • Proper access control should be enforced to ensure that no unauthorised persons enter the site. • Material delivery vehicles shall be under the control of competent personnel. It shall be ensured that persons handling equipment and materials are suitably trained, supervised and adequately instructed. • A confined spaces entry program that is consistent with applicable national requirements and internationally accepted standards shall be implemented. • All workers shall be provided with requisite PPEs. • Use fall protection equipment when working at heights shall be enforced. • Work areas shall be appropriately maintained in order to minimize slipping and tripping hazards.
Solid waste generation	<ul style="list-style-type: none"> • Express condition shall be put in the contract that before the contractor is issued with a completion certificate, he will clear the site of all debris and restore it to a state acceptable to the supervising architect and environmental consultant.

<i>Possible Impacts</i>	<i>Mitigation Measures</i>	<i>Possible Impacts</i>	<i>Mitigation Measures</i>
	<ul style="list-style-type: none"> • Construction site management plans will be required for all works. This plan will include a waste management plan for all activities during the construction period. • Quantity of solids generated by the water treatment process shall be minimised through optimizing coagulation processes. • Lime sludges shall be disposed of by land application at a solid waste disposal site approved by the local authority and in compliance with Solid Waste Regulations 2006. • Bins/ receptacles shall be placed at strategic locations within the site as collection centres to facilitate separation and sorting of the various types of wastes. • The contractor shall procure services of a NEMA licensed solid waste handler to facilitate sound waste management throughout construction period. • The wastes shall be properly segregated and separated to encourage recycling of some useful waste materials. 		<ul style="list-style-type: none"> • Any spillage of fuel, oils or other harmful substances shall be cleaned up immediately and reported to the Safety Officer for logging. • Training on spill control and clean-up shall be carried out through toolbox talks.
		Noise impact	<ul style="list-style-type: none"> • Road traffic movements shall be scheduled to normal working hours (08H00 –17H00). • Silencers to be installed on equipment such as generators will be properly designed. • Where need be, all exposed workers will be provided with functional ear muffs, whose use shall be mandatory, and closely enforced, monitored and supervised.
		Traffic impacts	<ul style="list-style-type: none"> • Construction traffic entering or leaving the site will be scheduled for off peak hours to minimize additional congestion at road intersections and or disruptions in the regular traffic flow. • Erection of signs along access road to the project site warning motorists of the heavy/construction vehicles entering the access road shall be done. • Posting of speed limit signs along the access road to the project site to govern speed of transportation vehicles shall be done. A speed limit of 20kms per hour will be adopted. • Appropriate traffic warning signs, informing road users of a construction site entrance ahead and instructing motorists to reduce speed shall be posted along the main access to the project site for the entire construction period. • All transport vehicles to comply with weight limits as prescribed by the Kenya National Highways Authority (KeNHA). The KeNHA has a standard for loads per axel that all trucks exert on roads and this shall be complied with. • Water will be regularly sprinkled along the haul roads to suppress dust. • Utmost care will be taken to prevent spillage of stones and spoils from the trucks during transportation.
Air pollution	<ul style="list-style-type: none"> • Speed limits of 10 km/h shall be imposed in all areas within the site boundaries. • Damping down of access roads, stockpiles and cleared areas shall be enforced to minimize dust pollution. • No refuse wastes shall be burnt on the premises or surroundings. Refuse wastes shall be removed by an official contractor and disposed of at an approved site in compliance with local laws and regulations. More significantly, an Integrated Solid Waste Management system shall be enforced. • Proper rehabilitation and restoration of disturbed areas shall be done in order to minimize bare patches. • Vehicles to be used during the construction phase are to be kept in good working condition and shall not be the source of excessive fumes. • Water shall be sprinkled before undertaking very dusty operations to suppress dust. 		
Surface and subsurface water pollution	<ul style="list-style-type: none"> • Discharge of any wastewater into neighboring Lake Victoria during project construction and operation phases shall be strictly prohibited. • All vehicles, machinery and equipment shall be refueled at designated areas. No vehicle equipment or machinery shall be refueled on site. • Regular audits shall be performed on construction machinery to ensure no leaking or defective equipment are used on site. • Appropriate spill control equipment (drip trays) shall be placed under vehicle and equipment which will remain parked at the site for over one hour. This will help in capturing any oil that may leak due to mechanical defects on the vehicle or equipment. • Any equipment repairs or maintenance will be carried out in designated areas. No repair of construction machinery or equipment shall be done on site. As best practice, drip trays shall be placed under the vehicles being repaired to capture oils or lubricants discharged. 		
		Biodiversity impacts	<ul style="list-style-type: none"> • Excavation works will be restricted to within project alignment areas to mitigate uncontrolled vegetation clearance. • Water sprinkling and water spraying systems will be ensured in all dust prone areas to arrest dust generation which may choke plants within project vicinity.
		Community health and safety impacts	<ul style="list-style-type: none"> • The project proponent shall establish and enforce a strict code of conduct for all project drivers. The code shall focus on safety, especially speed, and loading, and shall ban all carriage of staff, workers and passengers except in seats. • The proponent shall carry out awareness campaigns on the dangers of accessing active construction site among local community members. • The project proponent shall develop and implement HIV/AIDS prevention programme to deal with HIV/AIDS issues related to project's construction phase. The programme shall identify specific risk groups, specific AIDS awareness campaigns for these risk groups and provision of male condoms to construction workers.

Possible Impacts Mitigation Measures

- Exposure of hazardous chemicals to
- Amount of chlorination chemicals stored on site shall be minimised while a sufficient inventory to cover intermittent disruptions in supply shall be maintained.
 - A prevention program that includes identification of potential hazards, written operating procedures, training, maintenance, and accident investigation procedures shall be developed and implemented.

 - Evaluate the vulnerability of the water source to disruption or natural events shall be evaluated and appropriate security measures implemented as necessary.
 - Random site inspections shall be effected.
- Contamination of drinking water from treatment operations
- An alarm and safety systems, including automatic shutoff valves that are automatically activated when a chlorine release is detected shall be installed.
 - Use corrosion-resistant piping, valves, metering equipment, and any other equipment coming in contact with chlorine shall be effected. The equipment shall be kept free from contaminants, including oil and grease.
 - The water treatment facility shall be constructed, operated and maintained in accordance with national requirements and internationally accepted standards to meet national water quality standards and WHO Guidelines for Drinking Water Quality.
 - A prevention program that includes identification of potential hazards, written operating procedures, training, maintenance, and accident investigation procedures shall be developed and implemented.

 - Identify activities and areas that cause high consumption.
 - Install water-saving devices in the appropriate places (flow regulators, water flow sensors, self-closing taps, low-flush toilets, etc.).
 - Regularly maintain plumbing fixtures and piping in order to avoid losses.
 - Replace defective seals and repair damage to water pipes.
- Increased energy demand**
- Identify and use areas/equipment/systems having minimum energy consumption.
 - Install energy efficient lighting in common areas such as staircases and driveways.
 - Use alternative energy e.g. solar power for water heating.
- Traffic and obstruction along access road**
- Ensure that the Entry/Exit to the project site is located where it will cause minimal traffic along adjacent roads.
 - Ensure all construction vehicles to and from the construction site use the designated Entry/Exit to the project site.
 - All transportation of construction raw materials and excavated materials are to be conducted at traffic off peak hours only.

Negative Impacts Mitigation Measures

- Sensitize truck drivers to avoid unnecessary road obstruction.

THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the National or County Governments. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly, Senate or County Assemblies.
- (4) *Act Supplement* contains Acts passed by the National Assembly, Senate or County Assemblies.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typed with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) Must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.
