CHAIRPERSON'S FOREWORD

The 2024 Medium-Term Debt Management Strategy (MTDS) was formally presented to the National Assembly on February 15th 2024, in accordance with Section 33(1) of the Public Finance Management Act, 2012, and Standing Order 232A of the National Assembly Standing Orders.

Pursuant to Standing Order 232A(3), the 2024 MTDS was referred to the Public Debt and Privatization Committee for thorough examination and subsequent recommendations for approval by the House. I am pleased to inform this esteemed House that the Committee has diligently carried out its responsibilities. Therefore, it is my esteemed privilege to present the Committee's report on the 2024 Medium-Term Debt Management Strategy to this House.

The Medium-Term Debt Management Strategy delineates the strategies and initiatives to be implemented by the National Treasury in financing the fiscal deficits projected for FY 2024/25 and the medium-term, as outlined in the 2024 Budget Policy Statement. For the FY 202425, the fiscal deficit is projected at Kshs. 703.9 billion (3.9 percent of the Gross Domestic Product, arising from estimated expenditures of Kshs. 4.19 trillion and projected revenues worth Kshs. 3.44 trillion.

In this context, the 2024 MTDS has evaluated four alternative funding strategies and their impact on the inherent costs and risks associated with the current public debt portfolio. It, therefore, recommends a borrowing strategy to finance the fiscal deficit for the FY 2024/25, comprising of: *a)* Gross Borrowing Ratio of 63 to 37 for external borrowing to domestic borrowing, respectively; and *b)* Net Borrowing Ratio of 45 to 55 for net domestic borrowing to net external borrowing, respectively.

The proposed strategy aims to maximize concessional borrowing for external financing while minimizing commercial borrowing, thereby mitigating the cost of debt. On the domestic front, the strategy aims to reduce refinancing risk by increasing the issuance of medium-to-long-term bonds.

The 2024 MTDS was published when the public debt stock stood at a historical high of Kshs. 11.25 trillion or 69.7 percent of GDP in nominal terms. The current debt stock is characterized by elevated costs and risk factors, evident through rising Weighted Average Interest Rates, heightened refinancing pressure, and exposure to real exchange rate risks. Consequently, this indicates an overall hardening of borrowing terms that amplifies the cost of sustaining fiscal deficits compared to previous fiscal years.

Given these circumstances, conventional debt management policies may prove inadequate in addressing the challenges faced by the country such as the accumulation of undisbursed loans that necessitate annual payment of commitment fees, possible inefficiency in utilizing borrowed resources, and dwindling inadequate revenues. Furthermore, there is a growing level of contingent liabilities, such as non-performing loans owed by State-Owned Enterprises that need to be addressed. Therefore, heightened vigilance in debt management and adherence to fiscal consolidation measures is imperative.

Examination of the 2024 Medium-Term Debt Management Strategy (MTDS)

In reviewing the 2024 MTDS, the Committee held productive deliberations with key stakeholders and received their submissions. These include the Controller of Budget (OCOB), the Auditor General (OAG), and the Governor, Central Bank of Kenya (CBK). The committee also held discussions with the Cabinet Secretary, National Treasury and Economic Planning before the report was finalized.

Further, in line with Article 201(a) of the Constitution, the National Assembly undertook public participation on the 2024 MTDS. This was done through a request for memoranda, which was submitted to the Committee for consideration. The also held meetings with the Institute of Public Finance (IPF) and the International Budget Partnership (IBP). Recommendations arising from these deliberations have been incorporated into this report.

Once approved, the 2024 MTDS is expected to inform the country's borrowing strategy in the coming financial year and over the medium term.

Key Recommendations

Arising from these consultative engagements, the Committee has made the following recommendations:

a) Non-financial Recommendations

1) **That**, in the next Medium Term Expenditure Framework (MTEF) cycle, the National Treasury should ensure consistency between the Medium-Term Debt Management Strategy and the Budget Policy Statement regarding the optimal borrowing strategy and the fiscal consolidation path;

2) **That**, the National Treasury should ensure that the fiscal deficit and subsequent public borrowing projections are realistic by incorporating forecasts on any potential in-year changes to interest rates, exchange rates, and contingency spending;

3) **That**, to address the emerging escalation of domestic interest rates alongside domestic interest payments, the National Treasury should submit a report providing practical measures to reduce the domestic debt service burden to sustainable levels to the National Assembly, within 60 days upon the adoption of this
Report.

4) **That**, in line with the resolution of the National Assembly on the 2023 Medium Term Debt Management Strategy, the National Treasury should publish guidelines that will ensure that the Treasury Single Account is established and operational by July 1st, 2024;

5) **That**, within 30 days and subject to Section 50 of the Public Finance Management Act, 2012 (Amended in 2023), the National Treasury should submit a comprehensive report to the National Assembly on the breach of the debt anchor of 55 percent (5) of Gross Domestic Product and the remedial measures undertaken to ensure that the adherence of the debt threshold;

6) **That**, in order to promote fiscal sustainability, reduce debt distress and to slow debt accumulation, any deviation from medium-term fiscal deficit path designed by both the Budget Policy Statement and the Medium-Term Debt Management Strategy, and any resultant readjustment to loan financing should be pre-approved by the National Assembly;

7) **That**, the National Treasury ensures the customization of the MTDS for the next MTEF cycle to Kenya's specific debt challenges by providing specific measures to deal with undisbursed loans and related commitment fees, measures to resolve risks emanating from non-performing loans owed by state-owned enterprises, and estimation of contingent liabilities; and

8) **That**, in order to help enhance public participation in public debt matters, the National Treasury should publish simplified, citizen-friendly documents to accompany the technical reports on public debt submitted to the National Assembly.

9) **That**, at least two months before the end of the financial year:

   a. the National Treasury shall submit to the National Assembly the Annual Borrowing Plan that addresses any deviations from the 2024 MTDS in financing the FY 2024/25 Budget Estimates, attendant cost and risks of the deviations and policy measures to address them; and

   b. The National Treasury should submit a list of a schedule of all projects for which borrowing is to be undertaken in the FY 2024/25.

b) Financial Recommendations

1) **That**, the fiscal deficit target for the medium term is approved and set at 3.9% of GDP for FY 2024/25; 3.3% of GDP for FY 2025/26, and 3.3% of GDP for FY 2026/27, in line with the fiscal consolidation path; and

2) **That**, the country's borrowing strategy is approved at 55 percent for net external borrowing and 45 percent for net domestic borrowing as contained in the 2024 Medium Term Debt Management Strategy.

ACKNOWLEDGEMENTS

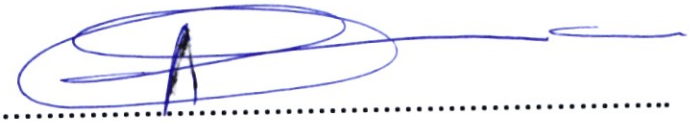
The Pubic Debt and Privatization Committee thanks the Office of the Speaker and the Office of the Clerk of the National Assembly for their extended support in fulfilling its mandate of reviewing the 2024 Medium-Term Debt Management Strategy.

Sincere gratitude is also extended to the Institute of Public Finance, International Budget Partnership, the National Treasury, the Office of the Controller of Budget, the Office of the Auditor General, and the Central Bank of Kenya for honouring our invitation on short notice and providing critical information in the process of reviewing the MTDS.

Finally, the Committee would like to thank the Parliamentary Budget Office and the Directorate of Appropriations, Audit, and General-Purpose Committees for the extensive technical assistance provided in the review of the 2024 MTDS and the finalization of this report.

It is, therefore my pleasant undertaking, on behalf of the Public Debt and Privatization Committee, to table this Report to this House and recommend it for adoption.

SIGNED



.....

HON. ABDI SHURIE, MP.
CHAIRPERSON, PUBLIC DEBT & PRIVATIZATION COMMITTEE

29th feb 2024

.....

DATE

I. PREFACE

I.1. Establishment and Mandate of the Committee

The powers of each House of Parliament to establish Committees and to make Standing Orders for the orderly conduct of its proceedings are provided under Article 124 of the Constitution of Kenya (2010). For critical oversight over matters relating to public debt and debt guarantees, public-private partnerships, and privatization of national assets, Standing Order 207A establishes the Public Debt and Privatization Committee with specific mandates:

i. Oversighting public debt and guarantees, pursuant to Article 214 of the Constitution
ii. Examining matters related to debt guarantees by the National Government
iii. Oversighting Consolidated Fund Services, excluding audited accounts;
iv. Examining reports on the status of the economy with respect to public debt.
v. Oversighting Public-Private Partnership programs by the National Government in respect of the public debt; and
vi. Oversighting the privatization of national assets

This Committee is, therefore, mandated, among other functions, to examine the Medium-Term Debt Management Strategy and propose recommendations to the House for adoption.

I.2. Membership of the Committee

The Public Debt and Privatization Committee comprises of the following Members of Parliament: -

CHAIRPERSON
Hon. Abdi Shurie, M.P.
Balambala Constituency
Jubilee Party

VICE-CHAIRPERSON
Hon. (Dr.) Makali Mulu M.P
Kitui Central
Wiper Party

Hon. Junet, Mohamed S.N. CBS. M.P
Suna East Constituency
ODM Party

Hon. Mohamed, Abdikadir Hussein, M.P
Lagdera Constituency
ODM Party

Hon. Omboko Milemba M.P
Emuhaya Constituency
ANC Party

Hon. Suleka, H. Harun. M.P
Nominated
UDM Party

Hon. (Dr.) Irene Kasalu M.P
Kitui County
Wiper Party

Hon. Chege Njuguna M.P
Kandara Constituency
UDA Party

Hon. Kwenya, Thuku Zachary, M.P
Kinangop Constituency
Jubilee Party

Hon. Abdi Ali Abdi, M.P
Ijara Constituency
NAP-K

Hon. Kipkoros, Joseph Makilap M.P
Baringo North Constituency
UDA Party

Hon. Letipila, Dominic Eli, M.P
Samburu North Constituency
UDA Party

Hon. Aden Daud, EBS, M.P
Wajir East Constituency
Jubilee Party

Hon. Kirwa, Abraham Kipsang, M.P
Mosop Constituency
UDA Party

Hon. (Dr.) Daniel Manduku, M.P
Nyaribari Masaba Constituency
ODM Party

I.3. Committee Secretariat

In the preparation of this report, the Committee was facilitated by the following staff:

Mr. Leonard Machira
Principal Clerk Assistant II & Head of Secretariat

Mr. Chacha Machage
Fiscal Analyst I/ Clerk Assistant

Mr. Job Mugalavai
Fiscal Analyst III/ Clerk Assistant

Ms. Audrey Ogutu
Legal Counsel II

Mr. Eugene Luteshi
Audio Officer III

Ms. Fridah Ngari
Media Relations Officer III

Ms. Yasmin Hassan
Assistant Serjeant-at-Arms

Mr. George Mbaluka
Office Assistant

I.4. Parliamentary Budget Office

The Committee also received technical support from the staff of the Parliamentary Budget Office.

Dr. Martin Masinde
Director, Parliamentary Budget Office (PBO)

Mr. Robert Nyaga
Ag. Senior Deputy Director, Parliamentary Budget Office (PBO)

Ms. Julie Mwithiga
Fiscal Analyst I

II. REVIEW OF THE 2024 MEDIUM TERM DEBT MANAGEMENT STRATEGY

II.1. Introduction

1) The 2024 Medium-Term Debt Management Strategy (MTDS) was submitted to Parliament subject to Section 33 of the Public Finance Management Act, 2012. Overall, the 2024 MTDS sets out the medium-term strategy of the national government with respect to the management of actual and potential liabilities related to loans and guarantees, and its plans for dealing with those liabilities. Furthermore, the MTDS provides information on the stock of public debt as of the date of the statement, the sources of loans made to the national government, and the nature of guarantees given by the national government, among other information.

2) The 2024 MTDS was tabled in the National Assembly on February 15th 2024 and committed to the Public Debt and Privatization Committee subject to Standing Order 232A of the National Assembly Standing Orders for consideration. According to standing order 232A(4), the Committee was required to table its report within 10 days. Nevertheless, a 10-day extension was granted by the House on February 22nd 2024, to give the Committee extended time to undertake further engagement with stakeholders and to table a comprehensive report.

3) This report of the Committee on the MTDS contains a schedule showing the stock of domestic and foreign public debt (including guarantees), evaluates the principal risks associated with existing loans, evaluates the sustainability of the amount of debt, and makes recommendations on the overall debt strategy for the next financial year and the appropriate limit for domestic and foreign borrowing.

II.2. Public Debt Stock, Guaranteed Debt and the PFM Debt Threshold

4) Public and Publicly Guaranteed Debt amounted to Kshs. 11.25 trillion, as of January 2024, comprising of Kshs. 5.06 trillion in Domestic Debt and Kshs. 6.19 trillion in External Debt. This equates to 69.7 percent of the Gross Domestic Product (GDP) in nominal terms and/or 67.2 percent of GDP in Present Value (PV) terms. In the preparation of the 2024 MTDS, the public debt stock position as of June 2023, provided the baseline.

5) As of June 2023, the debt stock amounted to Kshs. 10.27 trillion, and comprised of external debt amounting to Kshs. 5.46 trillion and domestic debt worth Kshs. 4.83 billion. Between June 2022 and June 2023, the public debt stock increased by 1.64 trillion owing to; a) the depreciation of the exchange rate between the Kenya Shilling and major currencies and, b) the fiscal deficit for FY 2022/23 worth Kshs. 837.4 billion.

6) The 2024 MTDS indicates that fiscal consolidation measures will strive to achieve the adherence to the debt threshold as set under the PFM Act 2012. In

November 2023, Kenya's debt limit was amended from a numerical ceiling of the Kshs. 10 trillion to a debt anchor threshold of 55% (+5), to be achieved by 2028. A review of the 2024 MTDS notes that the PV of the Debt-to-GDP ratio rose from 63.9 percent in 2022, to 68.2 percent in 2023 and will decline to 67.2 percent in 2024. According to the National Treasury, the threshold will be met to by November 2028.

7) The public debt stock also contains total outstanding Government-Guaranteed Debt, which as of June 2023, amounted to Kshs. 170.2 billion and is broken down as follows: Kenya Power & Lighting Company (Kshs. 9 billion); Kenya Ports Authority (Kshs. 50.5 billion); Kenya Electricity Generating Company (Kshs. 22.4 billion); and a called guarantee loan related to the Kenya Airways PLC worth Kshs. 88.2 billion.

II.3. Cost and Risk Characteristics

8) The structure of the public debt portfolio has evolved over time, along with the associated costs and risks. As of the end of June 2023, external debt at 53 percent, constituted the largest proportion of the total debt portfolio, against domestic debt at 47%. This was largely influenced by valuation effects emanating from the depreciation of the Kenya Shilling against currencies that denominate the debt stock and subsequently increased debt servicing expenditure.

9) It is worth noting that the Medium-Term Debt Management Strategy did not consider the costs and risks from contracted but undisbursed loans. According to the Office of the Auditor General, a total of Kshs. 4.99 billion has been utilized to meet commitment fees for undrawn loan amounts between FY 2020/21 and FY 2022/23. The lack or partial disbursement of loans is an indicator of inefficiency in the utilization of loan resources, and the incurrence of commitment fees is an avoidable incidence if the right proactive policies and initiatives are provided.

a) Interest rate risk.

10) As of June 2023, the Weighted Average Interest Rate (WAIR) of the total debt portfolio stood at 7.7 percent. Over the past year, there has been a general rise in interest rates for both external and domestic loans, rising from 3.8 percent to 4.0 percent and from 11.5 percent to 11.7 percent, respectively. This increase in WAIR signifies a widespread tightening of borrowing conditions for domestic and external loans, as evidenced when new domestic and external loans are acquired at higher interest rates. This trend is further corroborated by the escalation of interest payments from Kshs. 121.1 billion (or 3% of GDP) in FY 2013/14, to Kshs. 892.8 billion (or 5.5 percent of GDP) in FY 2023/24.

11) In addition, the proportion of public debt subject to fixed interest rates decreased from 76.9 percent to 72.7 percent, whereas the proportion subject to variable rates increased from 23.1 percent to 27.3 percent. This indicates a gradual shift

an increase in public debt exposed to interest rates fluctuations, potentially creating the level of uncertainty in determining the public debt interest expenditure.

12) The debt re-fixing in 1 year as a percentage of total outstanding debt increased from 23% in December 2022 to 26.7% in June 2023. This was driven by an increase in external debt re-fixing in one year from 27% to 33% during the period; this is as a result of the maturity of the USD 2 billion in 2024. Debt re-fixing in one year for domestic debt, however, declined marginally from 18.7% to 16.8 % owing to the use of long-tenor Treasury bonds. The increase in the proportion of debt re-fixing in one year implies an increase in vulnerability from the external debt stock.

b) Refinancing Risk.

13) The Average Time to Maturity (ATM) for both domestic and external debt experienced a decrease between December 2022 and June 2023. Specifically, domestic debt decreased from 7.8 years to 7.5 years, while external debt decreased from 9.8 years to 9.3 years. This resulted in an overall reduction in the Average Time to Maturity of the total debt portfolio from 8.8 years to 8.5 years. A decline in the Average Time to Maturity indicates an increase in refinancing risk for both domestic and external debt, consequently leading to an increase in debt service expenditure.

14) The decline in the average time to maturity of domestic debt may follow investor preference for short-term debt instruments compared to longer-term bonds, which are required for lengthening the maturity profile of domestic debt. On the other hand, the increase in refinancing risk for the external debt portfolio is likely to be caused by maturing commercial debt in the medium term.

15) As such, the percentage of total debt maturing within one year increased to 12.7% in June 2023 from 11.7% in December 2022. This slight increase was influenced by an increase in external debt maturing within one year from 5.1% to 9.7%, which was partially offset by a decline in domestic debt from 18.7% to 16.8%. This shift indicates progress in the objective of lengthening the maturity profile of the domestic debt portfolio by substituting short-term instruments with medium to long-term instruments, thereby reducing refinancing risk.

c) Exchange Rate Risk

16) Exchange rate risk refers to the Public Debt portfolio's vulnerability to exchange rate volatility. This mainly applies to foreign currency-denominated debt in terms of: a) external debt stock share of total stock of debt, b) exchange rate appreciation or depreciation and, c) currency composition/denomination of external debt stock. Changes in exchange rate risk exposure have both upside and downside risks to the public debt stock.

17) By the end of June 2023, the external debt stock amounted to Kshs. 5.4 trillion (53%). This was a Kshs. 1.2 trillion (27 percent) increase from Kshs. 4.2 billion in June 2022, when it accounted for 50 percent of the entire debt stock, thus indicating an increase in exchange rate risk exposure.

18) A review of the currency composition of external debt indicates that, as of June 2023, the United States Dollar accounted for the largest share (67.2%), followed by the Euro (21.3%), Yen (3.9%), Great British Pound (2.3%), Yuan (5.10), and others at 0.2%. Owing to its share, the depreciation of the USD/KSHS Exchange rate will have a larger valuation effect on both the external debt stock and external debt servicing expenditure. As such, the diversification of the currency composition of the external debt stock is recommended.

19) On the depreciation of the exchange rate between June 2022 and June 2023, the Kenyan shillings depreciated by 19.3% against the United States Dollar and 23.4% against the Euro. This in turn affected over 88.5 percent of the external debt stock. According to the National Treasury, the materialization of this risk resulted in an increase in public debt stock by over Kshs. 800 billion.

II.4. Public Debt Sustainability Analysis.

20) In terms of Debt Carrying Capacity (DCC), Kenya is classified as a medium performer with a Composite Indicator of 2.98 (a decline from 3.12 in 2020). The Composite Indicator (CI) is assessed using: the World Bank Country Policy and Institutional Assessment; real GDP growth; remittances; international reserves; and global growth. This indicates the need for new policies targeting debt management, improving the quality of institutions, and adherence to fiscal consolidation objectives, among other factors.

21) According to the 2024 MTDs, Kenya's public debt stock is sustainable but at a high risk of debt distress, primarily from liquidity pressures and increased vulnerability to macroeconomic shocks. The stock of public debt, as of June 2023, amounted to Kshs. 10.26 trillion with a Present Value (PV) debt to GDP ratio of 68.2 percent. This is above the threshold of 55 percent and has increased from 63.9 at the end of 2022. The 2024 MTDS indicates that, following the implementation of the fiscal consolidation plan, this ratio will decline towards 56.9% by 2028.

22) The pressure from elevated debt servicing expenditures is also indicated by breaches of liquidity thresholds. According to the 2024 MTDS, three (3) thresholds have been breached: a) PV of PPG external debt to exports ratio; c) PPG Debt service to exports ratio; and d) PPG debt service to revenue ratio; due to the impact of Eurobond payments (2024 and 2028) and rollover of other external bank loans on exports and revenues. This indicates increased vulnerability and the need for: a) liability and cash management, b) continued

lengthening the maturity profile for both domestic and external debt, and c) increasing the country's export income.

II.5. Financing the 2024/25 Budget and Fiscal Deficit

23) According to the 2024 Budget Policy Statement, the total expenditure for FY 2024/25 is estimated to be Kshs. 4.2 trillion against the revenue estimate of Kshs. 3.45 trillion resulting in a fiscal deficit (including grants) of Kshs. 703.9 billion (3.9% of GDP). This is expected to decline to Kshs. 666.7 billion in 2025/26.

24) The fiscal deficit under the 2024 Budget Policy Statement indicates that the fiscal deficit will be financed as follows:

   a. Net external borrowing Kshs. 326.1 billion. Gross external borrowing worth Kshs. 670 billion inclusive of a) Commercial Financing – Kshs. 151 billion, b) project loans: Kshs. 308 billion and c) program loans – Kshs. 210.5 billion; and,
   b. Net Domestic Borrowing worth Kshs. 377.7 billion.

25) The achievement of a lower debt-to-GDP ratio in the medium term is contingent upon the accuracy of macroeconomic assumptions as well as the realization of fiscal consolidation plans. Previous medium-term projections have contrasted with actual achievements, leading to expansion of the fiscal deficit by the end of the financial year, leading to more borrowing than projected. It is critical, therefore, that the macroeconomic assumptions underpinning the Budget Policy Statement are realistic for achieving a sustainable debt position.

II.6. The 2024 Proposed Borrowing Strategy

26) The 2024 MTDS proposes an optimal borrowing strategy after the evaluation of four different borrowing scenarios to arrive at a financing composition of domestic and external debt that minimizes costs and risks. The assumptions underpinning the selection of the optimal borrowing strategy for FY 2024/25 are outlined in the 2024 Budget Policy Statement, including a real GDP growth rate of 5.5%, inflation target of 5.0%, revenue of 19.1%, and fiscal deficit rate of 3.9%.

27) The risks to the assumptions are outlined as climate-related shocks, exchange rate volatility and depreciation of the Kenya shillings, performance exports, investor preference for short-term instruments that can heighten refinancing risks, and the materialization of contingent liabilities arising from State Owned Enterprises (SOEs) debts and Public-Private Partnerships (PPPs).

28) Therefore, the preferred borrowing strategy to finance the fiscal deficit for FY 2024/25 is as follows:

   a. Gross borrowing ratio of domestic borrowing to external borrowing of 63:37, respectively; and,

b. Net borrowing ratio of domestic borrowing to net external borrowing of 45:55, respectively.

29) The external borrowing composition would maximize concessional borrowing and reduce commercial borrowing, thereby reducing the cost of debt. On the domestic front, the refinancing risk would be reduced by contracting more medium-to long-term bonds instead of treasury bills.

30) The chosen strategy is consistent with the FY 2023/24 financing strategy, which gradually reduced reliance on domestic borrowing, primarily short-term domestic borrowing, in favour of long-term securities. External borrowing aims to increase dependence on concessional borrowing. However, commercial borrowing may become unavoidable due to current liquidity constraints. As such, there is a general requirement for efficient, transparent, and accountable use of commercial debt.

31) Despite developing an appropriate strategy, adherence to it is critical. A review of previous years' borrowing strategies shows a shortfall in achieving the external loan target while surpassing the domestic borrowing target. The lack of adherence to the strategy of choice may lead to the accumulation of unintended costs and the occurrence of unexpected risk characteristics in the medium term and negatively affect progress towards lowering the high level of debt distress and promoting Debt Sustainability.

II.7. The Fiscal framework underpinning the 2024 MTDS

32) In the upcoming fiscal year 2024/25, the government projects that revenue collection, including Appropriation-in-Aid, will rise to Kshs. 3.4 trillion, constituting 19.1 percent of GDP, up from Kshs. 3.1 trillion (FY 2023/24). While there is optimism about revenue growth, it's crucial to critically evaluate the feasibility of meeting these targets.

33) Total government expenditure and net lending for the upcoming fiscal year is estimated at Kshs. 4.19 trillion. This includes recurrent expenditure worth Kshs. 2.86 trillion (15.9 percent of GDP) and development expenditure of Kshs. 877.8 billion (4.9 percent of GDP). It's noteworthy that the rising proportion of public debt interest payments as a share of GDP has increased from 3 percent to 5.5 percent over the past decade and could have had a crowding-out effect on development expenditure, which declined from 10.3 percent (FY 2013/14) to 4.4 percent (FY 2023/24), over the past 10 years.

34) Consequently, the resultant projected fiscal deficit for FY 2024/25 is Kshs. 703.9 billion, equivalent to 3.9 percent of GDP. However, the financing approach for this deficit differs between the 2024 Budget Policy Statement (BPS) and the Medium-Term Debt Management Strategy (MTDS). Therefore, there's a need for the National Treasury to enhance its policy formulation processes to ensure consistent communication of fiscal policy and provide clarity on the rationale and outcomes.

III. SUBMISSIONS FROM KEY STAKEHOLDERS

III.1. The Controller of Budget (OCOB)

The Controller of Budget made the following submissions to the committee:

35) The Office of the Controller of Budget (OCOB) is established under Article 228 of the Constitution to oversee the implementation of the budgets of the National and County Governments by authorizing withdrawals from public funds as established under Articles 204, 206, 207, and 228 of the Constitution.

36) To promote prudent borrowing, the 2024 MTDS proposes net financing as follows: 45 percent domestic financing and 55 percent external borrowing. The 2024 MTDS aims to ensure that the government meets its expenditure requirements while repaying debt obligations when they fall due.

37) There is a need to adopt a deficit financing policy that is cognizant of a country's export capacity, which does not adversely affect the foreign exchange rate. For instance, debt servicing expenditure amounted to Kshs. 8.26 billion being incurred in the first half of 2023/24 and January 2024 to cover external payments arising from foreign exchange fluctuations.

38) On the least cost of debt in terms of interest payments as a percentage of GDP and implied interest rate, the OCOB indicated that:

i. While maintaining the independence of the Central Bank of Kenya (CBK), the Monetary Policy Committee (MPC) should consider the review of the Central Bank Rate (CBR), which increased from 12.5 percent to 13 percent on the 6th of February, 2024;

ii. While the decision to increase the rate mitigated adverse economic impacts and financial disruptions, it is important to note that the national government's interest payments have substantially increased;

iii. During the first half of the current financial year, the government spent Kshs. 405 billion on debt interest expenses, composed of domestic interest payments worth Kshs. 300 billion and foreign interest payments worth Kshs. 105 billion. If this trend continues, it is projected that the government will end up spending over Kshs. 800 billion on debt interest expenses by the end of the financial year;

iv. Domestic interest expenses rose by 19% compared to a similar period last year because of rising interest rates and further debt accumulation. Foreign interest rose by 57%, driven mainly by the depreciation of the shilling. Fiscal policy should, therefore, refrain from replacing cheaper debt with costlier ones; and

v. The twin tragedy of rising interest rates and steep depreciation of the shilling is increasing our debt servicing burden to unmanageable levels, with the risk

of leaving the government with limited funds for other necessary expenditures.

39) Regarding the Present Value (PV) of Debt to GDP as an outcome of the Fiscal Consolidation Plan, the OCOB indicated the following:

i. The current PV of debt to GDP, as stated in the MTDS, is at 68.3 percent as reported. Fiscal consolidation, as a government policy, is intended to reduce deficits and the attendant accumulation of debt.

ii. The Government should endeavour to develop a balanced budget and encourage it at the subnational level. As evidenced by the Controller of Budget Reports, Kenya's budget deficit and debt crisis stem from the government's persistent overspending on non-core areas.

40) To minimize refinancing risk by lengthening the total portfolio Average time to Maturity (ATM) through the issuance of medium to long-term bonds and concessional loans with longer maturities, the OCOB indicated that:

i. Kenya secured partial repayment of the USD 2bn Eurobond due in June 2024.

ii. Kenya decided to buy back most of that bond and issue a new long-term USD 1.5 billion note that alleviates the pressure of bullet payments until 2029, when repayments start.

iii. The instrument was taken at a high price of 10.375% in effective terms to repay a bond, with a yield of 6.875%.

iv. There are circumstances in which expensive concessional loans are acquired. It has been observed that such loans are expensive in the long run and with a low impact in terms of economic development. Multilateral agencies typically provide these concessional loans.

v. An audit of concessional loans and their respective projects should be conducted to ascertain the effectiveness of these loans. Analysis by COB revealed that the average interest paid on concessional loans averaged 14.5% for many years.

41) Regarding measures to minimize interest rate risk arising from the status of average time to re-fixing, the OCOB indicated the following:

i. There has been a reduction in the average time to re-fixing of domestic debt from 11.3 years, as reported in the 2022 MTD target to 7.7 years as of June 2023.

ii. Furthermore, there is a deviation of -3.6 years, occasioned by a marginal increase in the interest rate indicators. The indicators point towards investors' preference for short-term securities over long-term securities.

42) On the operations of the Overdraft facility, the Controller of Budget indicated that:

i. During the first six months of FY 2023/24, the total charge on the overdraft facility amounted to Kshs. 4.21 billion, an increase of 105.8 percent compared to Kshs. 2.04 billion incurred during a similar period in FY 2022/23.

ii. This increase is due to a gradual increase in the CBR rate from 8.75 percent to 10.5%, and finally to 12.5 percent in December 2023, combined with an increase in the overdraft facility limit from 80.05 billion to Kshs. 97.05 billion in FY 2023/24

43) The OCOB therefore recommended that:

i. The Central Bank of Kenya should consider revisiting the interest rate adjustment at the earliest opportunity to reduce domestic interest rates, as inflation in Kenya is driven by a supply and demand imbalance. As such, the rise in interest rates to curb inflation may not necessarily impact inflation caused by a food supply shortage;

ii. There is a need to implement fiscal policies such as levying higher taxes for non-essential imports and giving more incentives to support local production that would enhance GDP and consequently lower food prices;

iii. The establishment of the single treasury account should be fast-tracked, this will help mop up the idle balances belonging to MDAs being held in commercial banks;

iv. There is a need to implement the 2024 MTDS and deepen the domestic bond market to enhance economic growth and limit the crowding-out effect on credit supply to the private sector;

v. Measures should be put in place to increase the absorption rate of loans. A case example was provided and involved the Coast Development Authority (CDA) which received Kshs. 271 Million for implementing the Malindi Integrated Social Health Program, funded by the Italian Government. According to the status report, some of the reasons for the delays are awaiting approval by the National Project Steering Committee (NPSC) and Tax exemption approvals;

vi. The National Treasury should fast-track the long outstanding Sinking Fund implementation during this period of high debt service requirements;

vii. The National Assembly should enact strict legislation that would help alleviate the pending bills and ensure that pending bills are priority expenditures each financial year in line with the National Treasury Circular-No.10-2020-on-Prioritization-of-Pending-Bills by State Corporations and Semi-Autonomous Agencies (SAGAs); and

viii. There is a need to adopt a deficit financing policy that is cognizant of the export capacity of the country, and that does not adversely affect the foreign exchange.

III.2. The Auditor General (OAG)

In the presentation to the Committee, the Auditor-General indicated that:

44) Section 42 of the Public Audit Act, 2015 bars the Auditor-General from questioning the merits of a policy objective of the National Government or County Government or any other public entity. However, Article 229(6) mandates the Auditor-General to confirm whether or not public money has been applied lawfully and effectively. This entails the assessment of implementation of Government policies and programs.

45) The Office has continually raised concerns over the growing level of public debt in Kenya. The outstanding amount of public debt has increased over the years from Kshs. 4.8 trillion in FY 2017/2018 to Kshs. 10.3 trillion in FY 2022/2023, representing a Kshs. 5.5 trillion (114%) increase over the six (6) year period

46) The increase in public debt was driven by the issuance of commercial debt with high market interest rates, additional fees, and commissions. The government has issued 4 Eurobonds including a 10-year Eurobond, issued in 2014 is due to mature in June 2024, with a coupon rate of 6.875% and an initial value of USD 2 billion, 2019 issuance and matures in May 2027, with a coupon rate of 7% and an initial value of USD 900 million, a 2018 and matures in February 2028, with a coupon rate of 8.500% and an initial value of USD 2 billion.

47) The fourth and the newest Eurobond was issued in February 2024 and mature in 2031, with a coupon rate of 10.375% and a value of USD 1.5 billion (approx. Kshs. 233.25 billion at an exchange rate of 155.5Kshs/USD). This bond was issued to finance the repayment of the Eurobond, maturing in June 2024.

48) The Office has raised various issues pertaining to accountability and sustainability of public debt expenditure and has submitted annual financial audit reports on public debt expenditure. Among them: Public Debt Servicing Activities (September 2022) Special Audit on Utilization of Commercial Loans in Kenya for the period 1 July 2010 to 31 December 2021 (September 2022) and, Contracting of External Loans for Public Development Projects by The National Treasury (October 2023).

49) The audits have revealed, among other issues, that:

i. There are no specific financial statements prepared to show the complete debt position (Debt stock). Currently, the status of public debt is only included as an annexure in the Consolidated Fund Services - Public Debt. Other

government liabilities or obligations, such as pending bills/ accounts payable and pension arrears, are not included in the Debt stock.

ii. The cost of debt servicing has over the years increased from Kshs. 322, billion in FY 2017/2018 to Kshs. 617.7 billion in FY 2022/2023 (92% increase).

iii. The cost of domestic debt has become more expensive than the cost of external borrowing. The cost of domestic debt averaged three times the cost of external borrowings despite it constituting 47% of the total debt. During the period 2017/2018 to 2022/2023, the cost of external borrowing averaged 28% while domestic debt averaged 72% of total finance costs.

iv. The Government continues to pay commitment fees incurred on undrawn amounts regarding loans signed between the Government of Kenya and foreign lenders. A total of Kshs. 4.99 billion was incurred for undrawn between FY 2020/2021 and 2022/2023. The amount of Kshs. 4.99 billion comprises of Kshs. 2,063,104,537, Kshs. 1,486,813,083, and Kshs. 1,435,968,272 for the years 2020/2021, 2021/2022 and 2022/2023 respectively. These amounts are included in the Interest Payments on Foreign Borrowings for the respective years

v. Debt servicing is prone to foreign exchange loss exposure on payment of external debt. In order to reduce the exchange rate risk exposure, the Office has recommended that the Government consider hedging mechanisms on foreign exchange risks.

vi. A review of records held by the National Treasury's Commonwealth Secretariat Debt Recording and Management System as of 30 June 2023 revealed that the Government has defaulted on servicing an amount of Kshs. 11.04 billion in respect of three (3) loans advanced towards the construction of the following three (3) dams:

   a) Arror dam, of which Euro 91.9 million had been disbursed, resulting in a default of Euro 3.2 million in principal payments and Euro 9.9 million in interest payments thus far totalling Euro 23.1 million or Kshs. 2.9 billion.
   b) Itare dam project of which Euro 141.5 million had been disbursed, resulting in a default of Euro 36.4 million in principal payments and Euro 6.7 million in interest payments thus far totalling to Euro. 43.1 million or Kshs. 5.3 billion.
   c) Kimwarer dam project, of which Euro 71.9 million had been disbursed, resulting in a default of Euro 15.4 million in principal payments and Euro 7.4 million in interest payments thus far totalling to Euro. 22.8 or Kshs. 2.8 billion.

50) In addition to the proposals on reducing the risks and costs of the stock of debt in line with the Debt Management Objectives, the office gave the following proposals, that:

(a) Acquisition of land, relocation of utilities, and wayleave compensation should be financed in advance through timely disbursement of GOK counterpart funding before the signing of financing agreements.

(b) The time between feasibility studies and the actual time for signing financing agreements is reduced to avoid the cost of redoing feasibility studies.

(c) Implementing agencies should involve project implementing agencies during project identification and designs through public participation in order to enhance ownership, social accountability, and sustainability of the projects.

(d) In instances where a project has several loans attached to it, there should be clear segregation and utilization of funds.

(e) Establishment of a Debt Sinking Fund in foreign currency (USD) to be used in debt repayment.

(f) The capacity and skills of PDMO should be enhanced for adequate evaluation and negotiation of favourable credit terms and conditions and for adequate monitoring and evaluation of loan projects.

(g) To ensure adequate project oversight, the implementing agencies should enhance the monitoring and evaluation of debt-funded projects.

III.3. The Governor, Central Bank of Kenya (CBK)

The Governor, Central Bank of Kenya gave the following submissions to the Committee:

51) Kenya's public debt as a share of GDP has been rising steadily since 2008 to an estimated 73.3 percent by end-December 2023. While public debt is considered sustainable, the Debt Sustainability Analysis (DSA) conducted in December 2023 placed Kenya at high risk of debt distress, calling for appropriate measures to be put in place to reduce debt vulnerabilities. In particular, the DSA showed increased vulnerability of Kenya's public debt to exports and financing risks.

52) The objectives of the 2024 Medium-Term Debt Management Strategy (MTDS) are similar to those of the 2023 strategy. The 2024 MTDS prioritizes concessional external borrowing, while medium to long-term Treasury bonds are the main instruments for domestic financing. The main difference in the two strategy documents is in the financing mix.

53) The 2024 MTDS targets increased deficit financing from external sources with a financing mix of 55 percent from external sources and 45 percent from the domestic market, compared to a balanced financing mix of 50:50 in the 2023 MTDS. Regarding gross financing needs, the 2024 MTDS assumes a ratio of 63:37 percent from domestic and external sources compared to 65:35 percent in the 2023 MTDS.

54) Assessment of the implementation of the 2022 MTDS, which guided borrowing in FY 2022/23, shows the realization of 22:78 percent external to domestic financing of the gross financing needs compared to the projected 25:75 percent. This was on account of unfavourable global market conditions.

55) The review also shows the deterioration of costs and risk characteristics of the public debt portfolio. The Strategy aimed at lowering the debt service cost and minimizing the refinancing risk. However, there was an increase in both the debt service cost and the refinancing risk due to the appreciation of major currencies against the Kenya shilling and elevated interest rates in the domestic market. Investors' preference for shorter-dated instruments also contributed to the decline in the Average Time to Maturity

56) The key macroeconomic assumptions underpinning the 2024 MTDS are based on stable and robust real GDP growth supported by the implementation of priority programs outlined in the Bottom-Up Economic and Transformational Agenda (BETA), improving fiscal position, and a stable macroeconomic environment. These are largely aligned with the government's policy objectives stipulated in the 2024 Budget Policy Statement and CBK's view on the macroeconomic outlook.

57) The 2024 MTDS considered four deficit financing strategies with varying financing mixes from domestic and external sources. The most preferred strategy (S4) minimizes costs and risks through increased concessional borrowing and a gradual reduction of Treasury bills stock, with domestic financing mainly coming from medium to long-term Treasury bonds. Regarding net financing, the option assumes 45 percent domestic and 55 percent external borrowing.

58) The projected budget deficit for FY 2024/25 is Kshs. 703.9 billion, and the required borrowing in alternative financing strategies. Under the most preferred strategy, the budget deficit will be financed through net domestic financing of Kshs. 316.8 billion (45 percent) and net foreign financing of Kshs. 387.1 billion (55 percent). The preferred financing strategy is feasible, given that the actual domestic borrowing in the last four years averaged at Kshs. 462.3 billion.

59) There are significant differences between the projected financing of the budget deficit articulated in the 2024 Budget Policy Statement and the preferred strategy in the 2024 MTDS. Whereas the MTDS is more skewed towards foreign financing of the budget deficit, the BPS relies more on domestic financing.

60) The preferred financing strategy, compared to alternative strategies, gives improved expected outcomes in terms of the cost and risk of debt, reduced refinancing risks, and longer time to maturity. Consequently, public debt as a percent of GDP is expected to decline gradually to sustainable levels as the government pursues a fiscal consolidation plan.

61) In addition, there will be a notable improvement in the borrowing terms reflecting the Government's strategy to maximize concessional and semi-concessional loans from multilateral and bilateral sources.

62) On Domestic Debt Market Development, it was indicated that the CBK is committed to continue implementing and supporting reforms aimed at further deepening the domestic debt market to reduce the cost of debt and improve market liquidity. Some of the major initiatives and reforms include:

i. Modernization of market infrastructure: The government successfully implemented the Central Securities Depository System (DhowCSD) is expected to enhance the efficiency of domestic debt operations, improve market liquidity, promote capital market growth, broaden investor base, and position Kenya as the preferred financial hub in the region.

ii. Automation of access to government securities: CBK rolled out TMD in February 2020, a digital channel for retail investors to access government securities through mobile phones and an Internet Banking platform for institutional investors.

iii. Sustained market engagement and stakeholder collaboration: CBK has enhanced coordination with the National Treasury on debt and market development initiatives, including debt re-profiling through switch operations, and improved market engagement through the Bond Market Forum, which has been instrumental in developing one of the fastest-growing bond markets in Africa.

63) The 2024 MTDS objectives are consistent with the key priorities of domestic debt management and ongoing fiscal consolidation measures aimed at reducing the fiscal deficit and lowering debt costs and risks. CBK welcomes the Government's plans to diversify the investor base and explore new sources of financing, such as green and blue bonds. The CBK will continue to deploy measures to develop the domestic debt market, including ongoing modernization of the market infrastructure to diversify the investor base and mitigate the exchange rate risk.

64) The 2024 MTDS notes that the risks posed by inflation-induced high interest rates in both domestic and international markets may pose a challenge to the government's financing of the FY2024/25 Budget and performing liability management operations on its debt portfolio as well as increasing its debt service costs. However, it should be noted that the issue of liability management operation relating to the 2024 Eurobond has now been addressed conclusively following the recent issuance of a Eurobond of US$ 1.5 billion.

III.4. The Cabinet Secretary, National Treasury and Economic Planning

The Cabinet Secretary, National Treasury and Economic Planning gave the following submissions to the Committee:

65) The current stock of public and publicly guaranteed debt stands at Kshs. 11.25 trillion or 69.7 percent of GDP in nominal terms. The current Present Value of public debt to GDP is 67.2 percent. The public debt comprises a mix of External debt of Kshs. 6,189.97 billion; and Domestic debt of Kshs. 5,058.04 billion.

66) In recent months, external debt has risen relative to domestic debt due to the depreciation of the Kenya shilling against foreign currencies. External debt is largely from official creditors and on concessional terms. It is composed of Kshs. 3,118.57 billion as multilateral debts (50% of total external debt); Kshs. 1,399.72 billion bilateral debts (23%); and Kshs. 1,671.68 billion commercial debts (27%) of which Eurobonds account for Kshs. 1,141.33 billion (18%).

67) Domestic debt is mainly held in the form of Government debt securities as follows: Kshs. 4,272.25 billion in Treasury Bonds (85% of the total domestic debt), Kshs. 565.63 billion Treasury Bills (11%); and Kshs. 220.16 billion (4%) as others (Overdrafts from Central Bank of Kenya, IMF SDR Allocation and Bank advances).

68) The proposed FY 2024/2025 fiscal deficit of Kshs. 703.87 billion will be financed as follows: Net Foreign financing worth Kshs. 326.12 billion and Net Domestic financing worth Kshs. 377.75 billion

69) Under the current revenue-driven multi-year fiscal consolidation program, the National Treasury commits to bring down the Present Value of debt as a percentage of GDP from 67.2 percent to 55% over a period of five years as per the recent amendment of the Public Finance Management Act on the debt anchor.

70) The weighted average interest rate of the total debt portfolio was 7.7 percent per annum in June 2023, of which domestic debt is 11.4 percent per annum. The weighted average interest rate of external debt increased to 4.5% in June 2023 compared to 3.9% in December 2022.

71) The rise in interest rates in the public debt portfolio is attributed to the tight liquidity conditions both in the domestic and international financial markets.

72) The average Time to Maturity of the total portfolio declined from 8.8 years in December 2022 to 8.5 years in June 2023 because of the reduced performance of long-tenor bonds and issuance of more short-term domestic debt attributed to the tightness of liquidity in the market.

73) The projected debt redemption profile is characterized by large maturities in 2028, 2029, and 2030 on account of Eurobond and bank-syndicated debts.

74) The 2024 Medium-Term Debt Strategy aims to optimize access to external concessional borrowing and undertake liability management to minimize costs and refinancing risks in the debt portfolio. On a net basis, the strategy assumes a mix of 45% domestic and 55% external financing over the medium term. In gross borrowing terms, external and domestic financing accounts for 37% and 63%, respectively.

75) In addition to the commitment to fiscal consolidation (required to stabilize the growth of public debt), the 2024 Medium-Term Debt Strategy identifies key actions to guide borrowings during FY2024-25 to 2026-2027, which include:

i. Use of long-tenor Treasury bonds for refinancing of maturing domestic debt and raising of new deficit funding resources along with a reduction in the proportion of short-term domestic debt (Treasury bills). This will minimize refinancing risks and lengthen the Average Time Maturity for domestic and total debt.
ii. Deepening the domestic bond market by issuing more medium to long-term instruments as the main source of domestic financing.
iii. Maximize the use of concessional borrowing as opposed to commercial debt to lower costs and risks;
iv. Minimize interest rate risk in terms of average time to re-fixing.

76) In collaboration with other financial sector players, including the Capital Market Authority and the Central Bank of Kenya, The National Treasury will sustain domestic debt market reforms to improve the performance of the primary issuance and promote vibrancy of the secondary market to develop a credible yield curve for Government securities. These reforms include the publication of an issuance calendar, Separation of the Retail and Wholesale Market for Government Securities; and Re-engineering of Retail-Bond Issuance, among others.

Further submissions to the Committee included:

77) On whether the financing framework under the 2024 Budget Policy Statement is linked to the strategy under the 2024 Medium Term Debt Management Strategy, it was indicated that the 2024 MTDMS has been prepared based on the projected macroeconomic indicators and fiscal deficit trajectory in the 2024 BPS. The strategy focuses on maximizing concessional and reducing commercial borrowing, thereby reducing the cost of debt.

78) On how the MTDS addresses rising debt servicing costs and creates fiscal space to support other sectors' expenditure needs, the Committee was informed that the objective of the MTDS is to raise resources through borrowing to finance the budget deficit while maintaining minimum costs and prudent levels of risks in the portfolio. Debt service costs have continued to rise in line with the growth of public debt; however, efforts have been made to grow the proportion of

concessional debt in the portfolio and increase the stock of long-tenure domestic debt to minimize settlement risk. A multi-year fiscal consolidation framework seeking to lower the fiscal deficit will ultimately drive debt servicing costs downward.

79) On how the strategy would achieve the PFM threshold of 55% (+5) by 2029, the Committee was informed that the fiscal deficit is the primary driver of debt. The 2024 BPS pronounces a tight fiscal deficit path underpinning the projected PV of debt to GDP from 68.2% in 2023 to 56.9% in 2028 and 55% by November 2028.

80) On how the strategy has accommodated policy impact emanating from the continuous deviation from the annual MTDS plan/strategy, the committee was informed that the strategy considers the impact of exogenous shocks that influence access and cost of financing. Under the 2024 MTDS, the National Treasury will seek to explore alternative sources of financing to raise resources for budget financing and liability management to help lower costs and risks in the debt portfolio.

81) On undertaking a conservative approach towards commercial borrowing and ensuring that loans are earmarked to capital projects whose returns are comparable to the high yields that the loans bear, the Committee was informed that commercial borrowing is driven by a lack of access to adequate budget support from multilateral and bilateral lenders. Whereas project-linked finance is desirable, some flexibility in the use of funds is required to ensure the delivery of high social impact projects like education, health, water, and sanitation which may not necessarily demonstrate revenue streams but contribute to human capital development critical for growth and development of the country.

82) On how 2024 MTDS addresses the materialization of domestic debt-related interest and refinancing risk that could cause liquidity constraints, the Committee was informed that the 2024 MTDS seeks to maintain a trade-off of risk and cost in the domestic debt portfolio. Whereas interest costs have risen in the last few months due to external factors, the focus is to undertake a number of reform measures in the domestic debt market to promote efficiency in the primary market and restore vibrancy in the secondary market. The interventions will lower overall costs and reduce refinancing risks along the maturity structure of domestic debt.

83) On possible strategies designed to address issues raised by Sovereign/Credit Rating Agencies whose reports are critical in determining the cost of borrowing, the Committee was informed that credit rating agencies have raised concerns over the ability of the Government to fully finance the budget deficit due to limited access to international market particularly to refinance the 2024 Eurobond. However, Kenya has been able to de-risk the 2024 Eurobond through a buy-back operation, and domestic debt markets have positively responded to

this action. The National Treasury has initiated a process to develop a strategy to enhance Kenya's credit rating profile.

84) On how the materialization of the exchange rate risk resulted in the increase in the debt stock by over Kshs. 800 billion would be addressed in the future, and how the appreciation of the exchange rate would be factored; the Committee was informed that Kenya has a market-determined exchange rate regime that acts as an automatic stabilizer; it stabilizes prices and supports economic activity. The recent 2024 Eurobond buyback operation de-risked the space and slowed depreciation of currency and a surge in foreign exchange flows is expected in the near term. Overall, the debt-to-GDP ratio will continue to decline due to revenue mobilization and fiscal consolidation efforts.

85) On how the MTDS addresses contracted but undisbursed loans (the resultant commitment fees) and measures geared towards increasing the rate of loan disbursement, the Committee was informed that the MTDS's primary objective is to mobilize resources to finance the deficit and maintain an optimal mix of debt to lower costs and risks. Absorption of project funds is a matter of budget execution by line ministries, departments, and agencies and is outside the scope of debt management strategy.

86) On the need to expound on the components of net domestic and net external borrowing proposed under the strategy, the Committee was informed that the details of net domestic and net external financing may be broadly stated in future MTDS as details depend on lending policies of potential multilateral, bilateral and private lenders and market conditions.

87) Having noted that up to $8.5 billion or 25% of total debt will be maturing in +10 years thus raising concern on how the burdens and benefits of the use of resources and public borrowing are shared equitably between present and future generations (Article 201(c) of the Constitution), the Committee was informed that new loan commitments will continue to be contracted over the period consistent with Government development plans over time. This will ensure intergenerational equity in terms of benefits and burden sharing. When such an imbalance occurs, corrective measures will be taken.

88) On how the strategy would improve the position of Kenya's DSA risk indicators, the Committee was informed that a multi-year fiscal consolidation policy stance would drive debt to GDP downward and improve debt sustainability indicators. The MTDS will continue to lay emphasis on concessional financing and issuance of longer domestic debt instruments to finance the deficit and ensure a balanced mix of external and domestic debt.

III.5. Submissions from Public Participation

89) In line with Article 201 of the Constitution, the National Assembly undertook public participation in the 2024 Medium-term Debt Management Strategy through requests for memoranda from the public. The period provided was seven days as from February 19th, 2024, and the advertisements were placed on the Daily Nation and The Standard newspapers.

90) At the expiry of the period indicated in the advertisement for submission of memoranda, no submissions had been received from the public on the 2024 Medium term debt management strategy. However, the Committee invited three civil society groups and met two of the groups and their submissions are contained in this report.

III.6. Institute of Public Finance (IPF)

The Institute of Public Finance (IPF) made the following submission to the Committee, that:

91) The Institute of Public Finance (IPF) is an independent non-profit think tank that furthers the principles of public finance management through the generation of Credible Evidence, Advocacy, and Technical Assistance.

92) There is a need for increased oversight on public–private partnerships, noting the acknowledgement of increased risk exposure by both the 2024 BPS and 2024 MTDS and the need to ensure value for money.

93) To promote debt transparency and accountability and manage fiscal risks, PPPs should be highlighted in the MTDS and attendant contingent liabilities.

94) To minimize the cost of external debt and exposure to foreign exchange risks, scenario analysis for various strategies should be deepened to include currency composition to guide an optimal debt structure for foreign currency-denominated debt. This would help maintain a portfolio that is not excessively vulnerable to dollar fluctuations.

95) To minimize refinancing and lengthen the total portfolio Average Time to Maturity (ATM), new debt contracted for FY2024/25 and the medium term should be pegged on a longer maturity period. The MTDS should strive to attain the pre-COVID repayment periods, which, according to the Annual Debt Management Report for FY2021/22, averaged nine years for domestic debt and 10 years for external debt.

96) There is progressive improvement in debt reporting with the 2024 MTDS, including loan guarantees, to three State-Owned Enterprises: Kenya Airways, Kenya Ports Authority, and Kenya Power and Lighting Company. Nevertheless,

comprehensiveness should be improved to include information such as the duration of the guarantee, nature, and risk assessment.

97) For the government to achieve fiscal targets, the BPS and Annual Borrowing Plans must be aligned with the MTDS. It has been noted that over the medium term, the best scenario (S4) proposed by the 2024 MTDS differs from the domestic to external debt ratios reflected in the 2024 BPS over the medium term.

98) To promote transparency, accountability, and predictability, the MTDS should include a requirement that the Annual Borrowing Plans indicate the investment to be funded by the borrowed funds. As such, any infrastructure bond procured should be able to identify the infrastructure to be funded by the proceeds.

99) The 2024 MTDS proposes debt-for-nature swaps and food security swaps to fund the budget deficit for FY2024/25. While these swaps have been successful in other countries, there is a need for full disclosure of this type of financing, including, but not limited to, community displacement and the risks associated with them.

100) The MTDS provides that the PDMO will explore alternative funding sources, including issuing Kenya Shilling syndicated debt, foreign currency-denominated domestic bonds, and private placement for both local and external markets. The following concerns arose:

i. The domestic issuance of the US$-US$-denominated bond could amplify the country's foreign exchange pressures if potential investors create a preference for bonds. As such, the government needs to finalize issuing a diaspora bond by mobilizing dollars from Kenyans abroad.
ii. The government pursues Kenya shilling syndicated debt, specifically targeting pension funds holding more than Kshs. The bulk of the 1.7 trillion worth of assets are locked in government securities.

101) There is a need for the National Treasury and the Central Bank to undertake nationwide civic education on investing in government securities, given the innovative platforms in place, such as the new Central Securities Depository System (DhowCSD) that went live on July 31, 2023. Reducing the denomination of investments should also be considered.

III.7. International Budget Partnership (IBP)

The International Budget Partnership (IBP) made the following submission to the Committee, that:

102) The International Budget Partnership Kenya (IBP Kenya) is a Kenyan non-profit organization working to advance transparency, accountability, participation, and equity in national and county budgeting processes.

103) Kenya's growing appetite for borrowing to facilitate expenditures has seen Kenya's public debt stock grow from Kshs. 2.45 trillion as of December 2014, to Kshs. 10.58 trillion as of September 2023, an astonishing increase of 331.8 %. This significant growth in Kenya's public debt burden over a short period has generated a vicious cycle, necessitating more expenditures on debt servicing and repayment each year. This has and will continue to affect the state's ability to provide basic services over the medium term.

104) The MTDS and the Budget Policy Statement are tabled for analysis and approval. Therefore, it presents an opportunity to provide visibility of the state of debt and assess what options exist to manage it.

105) Despite the availability of actual statistics as at the end of December 2023, the MTDS baseline was based on public debt statistics as of the end of June 2023 as such there is a need to adopt a more proactive methodology in the future.

106) There is a contrast in the borrowing strategy proposed by MTDS and BPS. The 2024 MTDS proposes a borrowing strategy of 45:55 for the domestic-to-external debt mix, while the 2024 BPS proposes a domestic-to-external financing mix of 54:46.

107) The proposed BPS 2024 mix may be more costly in the medium term because of the high-interest rate on domestic borrowing and the low interest rate on external borrowing.

108) The yearly budget deficit of the national government determines the amount of borrowing undertaken each year. Where persistent deviations exist between national government expenditures and revenue collection, the resultant budget deficit necessitates growth in borrowing to bridge the resource gap.

109) The BPS 2024 proposes a decrease in the fiscal deficit (excluding grants) of KES -761.1 billion as envisaged at the start of the FY2023/24, to KES -753.2 billion – a 1% decrease in absolute terms. Including grants, the deficit is expected to fall from KES -718.9 billion to KES -703.9 billion equivalent to a 2% decrease.

110) The intended decrease in the deficit aligns with the national government's efforts to narrow the fiscal deficit (including grants) to 3.9% of GDP in FY 2024/25. To the extent that this target deficit will impact the sustainability of Kenya's public debt, the target is welcomed.

111) However, historically, the achievement of this target has been affected by in-year increases in expenditure (encouraged by supplementary budgets) and underperformance of revenue, creating a historical pattern of in-year fiscal deficit increases. This requires action to align expenditures with available resources.

112) There should be a commitment by the government to reduce the fiscal deficit as a percentage of GDP and to consolidate the fiscal deficit. Failure to do so will

perpetuate the current tendency to spend more than the available tax revenues, worsening the growth in our public debt burden.

113) The significant growth in Kenya's public debt over a short period has generated a vicious cycle, necessitating more expenditures on debt servicing and repayment each year. This has and will continue to affect the national government's ability to disburse funds to county governments over the medium term.

114) Kenya's public debt stock stood at KES 11.14 trillion as at the end of December 2023. Domestic and external debt stocks account for 45.3% and 54.7%, respectively. Over time, Kenya's public debt burden has become increasingly unsustainable shown by its gradually worsening Risk of Debt distress rating. According to the International Monetary Fund (IMF), debt distress refers to a situation in which a country cannot fulfil its financial obligations, and debt restructuring is required. Kenya is currently at a high risk of debt distress, exceeding three of our four external debt substitutability indicators, as shown in the snippet below.

115) However, the sustainability of public debt is premised on the choice of financing decisions made each year in BPS and MTDS documents. Kenya has taken to the commercial markets to refinance its 2014 debut sovereign bond due in June of 2024. This includes the issuance of a brand-new Eurobond worth $1.5 billion at a 9.85% interest rate – notably higher than the 2014 Eurobond rate of 6.85%, and additional loans from the Trade Development Bank.

116) In addition, the national government has been borrowing on the domestic front at relatively high rates, with the most recent 8.5-year infrastructure bond (IFB1/2024/8.5) earning an interest rate of 18.46%.

117) The increased use of expensive commercial external loans has increased the cost and risk of the public debt stock and is unlikely to realize the development objective as commercial debt is utilized for general budgetary support and refinancing maturity of loans. This negates the country's capacity to repay public debt permanently, leading to a vicious cycle of debt repayments.

118) One consequence of Kenya's borrowing decisions in the past has been the astronomical growth in Kenya's allocation to public debt servicing through the Consolidated Fund Services (CFS). Between FY 2014/15 and FY 2023/24, the amount allocated to debt servicing each year rose by 1068.8% or KES 1.71 trillion. Currently, 73 out of every 100 shillings collected in ordinary revenue will be going towards servicing public debt, leaving little for national and county governments to county governments to deliver services.

119) The MTDS does not dig deeper into the portfolio and attendants risk debt owed by state-owned enterprises and corporations. This is of concern because these

institutions hold an increasing loan portfolio. The reforms envisioned to rationalize SOEs should take place to minimize attendant contingent liability.

120) The International Budget Partnership (IBP) therefore recommended that:

i. There is a need for the MTDS to present the actual debt portfolio and effect the reforms that are necessary to reduce the risk exposure presented by State Owned Enterprises and Corporations.

ii. Debt repayments be restructured in the medium term to create less pressure on available tax revenues. It is clear that in the medium term, there will be limited fiscal space if current CFS spending is sustained. The available windows should be utilized, and the public should be informed of what measures are being taken.

iii. Beyond fiscal consolidation measures, the national government should seek more affordable borrowing options over the medium term given the projected resource envelope and cost of borrowing. This includes reducing the prominence of commercial and domestic debt in the debt portfolio and exploring alternative sources of financing.

iv. The National Treasury should employ realistic revenue targets and ensure adherence to the proposed fiscal deficit in FY 2024/25. On the expenditure side, options should be put in place to minimize the use of Article 223 of the Constitution, and issues raised by the Office of the Auditor General's Special Audit Report on the Supplementary Budget should be addressed.

v. The 2024 Budget Policy Statement should be aligned with the proposed financing strategy in the 2024 MTDS to ensure sustainable and optimal borrowing in the future financial years.

vi. A public debt policy upon which the MTDS is anchored should be developed. This would consider the country's developmental needs, as well as how to handle both public and publicly guaranteed debt.

IV. COMMITTEE OBSERVATIONS

Arising from the above deliberations, the Committee made the following observations:

121) The proposed borrowing ratio in the 2024 MTDS of 45 percent domestic and 55 percent external borrowing differs from the proposed ratio in the 2024 BPS of 54 percent domestic and 46 percent external borrowing. This observation was also noted by the Committee's report on the 2023 MTDS and indicates a continued disconnect in policy formulation geared towards minimizing the cost and risk of borrowing;

122) The depreciation of the exchange rate against the United States Dollar and the Euro, which when combined account for over 88.5 percent of the denomination of the external debt stock, has been costly as indicated by the incurrence of Kshs.

8.26 billion to meet external debt servicing arising from the fluctuation of the foreign exchange rate between July 2023 and January 2024;

123) There is a cross-board tightening of borrowing conditions for both domestic and external borrowing, as evidenced by the increasing Weighted Average Interest Rate (WAIR) of the total debt portfolio and is collaborated by the increasing debt service expenditure under the Consolidated Fund Services;

124) The Medium-term Debt Management Strategy (MTDS) is a framework that was developed by the World Bank and the IMF to guide countries in debt management decisions and operations. Nevertheless, there is a need to customize the MTDS to Kenya's country-specific challenges in order to address high public debt stock, committed but undisbursed loans (and commitment fees), and the rise in non-performing loans owed by state-owned enterprises, among other rising contingent liability risks;

125) There is low civic participation in public debt management policy design and debt management. This is indicated by the lack of response from the public following the call for submissions issued by the National Assembly on the 2024 MTDS. Appropriate measures are therefore required to promote citizen engagement through enhancing transparency and public accountability;

126) There is slow progress in the establishment of the Treasury Single Account. The resolution of the National Assembly on the 2023 MTDS intended to ensure the government mops up surplus funds held by Ministries, Departments and Agencies bank accounts. The account is a requirement of Section 28(2) of the Public Finance Management Act, 2012, and an effective method for enhancing payment and revenue collection systems. Guidelines will also help minimize the impact on financial transfers from domestic financial institutions and initiate the full transition to the Treasury Single Account as from FY 2024/25.

127) There is a deviation from the fiscal deficit target for FY 2023/24. The 2023 MTDS set the fiscal deficit target at 4.4 percent as a share of GDP; this has increased to 5.5 percent in the first Supplementary Estimates. It is important to note that in-year deviations from fiscal targets negate the substantial efforts undertaken in designing a policy framework and strategies intended at a) reducing debt distress, b) slowing debt accumulation, and c) improving overall resource utilization.

128) The PV of debt to GDP is projected to reach 67.2 percent in 2024 and has thus surpassed the anchored debt threshold of 55 percent (+5) subject to Section 50 of the PFM Act 2012 (Amended in 2023), the National Treasury is yet to submit a report on the breach of the debt threshold, indicating the exceptional circumstances, as required by the PFM Act, 2012.

V. COMMITTEE RECOMMENDATIONS

In view of the foregoing, the Committee has made the following recommendations:

c) Non-financial Recommendations

129) **That**, in the next Medium Term Expenditure Framework (MTEF) cycle, the National Treasury should ensure consistency between the Medium-Term Debt Management Strategy and the Budget Policy Statement regarding the optimal borrowing strategy and the fiscal consolidation path;

130) **That**, the National Treasury should ensure that the fiscal deficit and subsequent public borrowing projections are realistic by incorporating forecasts on any potential in-year changes to interest rates, exchange rates, and contingency spending;

131) **That**, to address the emerging escalation of domestic interest rates alongside domestic interest payments, the National Treasury should submit a report providing practical measures to reduce the domestic debt service burden to sustainable levels to the National Assembly, within 60 days upon the adoption of this Report.

132) **That**, in line with the resolution of the National Assembly on the 2023 Medium Term Debt Management Strategy, the National Treasury should publish guidelines that will ensure that the Treasury Single Account is established and operational by July 1st, 2024;

133) **That,** within 30 days and subject to Section 50 of the Public Finance Management Act, 2012 (Amended in 2023), the National Treasury should submit a comprehensive report to the National Assembly on the breach of the debt anchor of 55 percent (5) of Gross Domestic Product and the remedial measures undertaken to ensure that the adherence of the debt threshold;

134) **That**, in order to promote fiscal sustainability, reduce debt distress and to slow debt accumulation, any deviation from medium term fiscal deficit path designed by both the Budget Policy Statement and the Medium-Term Debt Management Strategy, and any resultant readjustment to loan financing, should be pre-approved by the National Assembly;

135) **That**, the National Treasury ensures the customization of the MTDS for the next MTEF cycle to Kenya's specific debt challenges by providing specific measures to deal with undisbursed loans and related commitment fees, measures to resolve risks emanating from non-performing loans owed by state-owned enterprises, and estimation of contingent liabilities;

136) **That**, in order to help enhance public participation in public debt matters, the National Treasury should publish simplified, citizen-friendly documents to accompany the technical reports on public debt submitted to the National Assembly; and

137) **That**, at least two months before the end of the financial year:

a. the National Treasury shall submit to the National Assembly, the Annual Borrowing Plan that addresses any deviations from the 2024 MTDS in financing the FY 2024/25 Budget Estimates, attendant cost and risks of the deviations and policy measures to address them; and

b. The National Treasury should submit a list of a schedule of all projects for which borrowing is to be undertaken in the FY 2024/25.

d) Financial Recommendations

138) **That**, the fiscal deficit target for the medium term is approved and set at 3.9% of GDP for FY 2024/25; 3.3% of GDP for FY 2025/26, and 3.3% of GDP for FY 2026/27, in line with the fiscal consolidation path; and

139) **That**, the country's borrowing strategy is approved at 55 percent for net external borrowing and 45 percent for net domestic borrowing as contained in the 2024 Medium Term Debt Management Strategy.

VI. ANNEXURES

140) **Further**, pursuant to Standing Order 232A(5)(a), Schedule 1 indicates details on the stock of foreign public debt and publicly guaranteed debt, and Schedule 2 indicates details on the stock of domestic debt, are hereby attached in Annex 1 and Annex 2.

SIGNED

.....

HON. ABDI SHURIE, MP.
CHAIRPERSON, PUBLIC DEBT & PRIVATIZATION COMMITTEE

The project consists of rehabilitating and extending existing wastewater collection systems and building new wastewater treatment plants to ensure that the three cities have adequate facilities for the collection, treatment and disposal of wastewater until 1995. By having easier access to factors of production and markets, farmers and ranchers will be inclined to produce from a commercial point of view and to become more integrated with the monetary economy. This will require not only improving the roads and transport facilities, but also installing infrastructure such as water and sewer systems in these cities. The components of the project are: (A) land acquisitions; (B) pipes and manholes; (C) treatment plants; (D) emptying vehicles and tools; (E) execution studies and supervision of works. The project consists of rehabilitating and extending existing wastewater collection systems and building new wastewater treatment plants to ensure that the three cities have adequate facilities for the collection, treatment and disposal of wastewater until 1995. By having easier access to factors of production and markets, farmers and ranchers will be inclined to produce from a commercial point of view and to become more integrated with the monetary economy. This will require not only improving the roads and transport facilities, but also installing infrastructure such as water and sewer systems in these cities. The components of the project are: (A) land acquisitions; (B) pipes and manholes; (C) treatment plants; (D) emplying vehicles and tools; (E) execution studies and supervision of works. MIN/NO.NA/PDPC/2024/021: PRELIMINARIES

The Vice- Chairperson of the Committee Hon. (Dr) Makali Mulu M.P. Called the meeting to order at 10.30. a.m. and requested Hon. Kwenya Thuku Zachary, M.P, to lead the committee in opening prayers. Afterwards, the Vice- Chairperson invited the Committee members and the secretariat to introduce themselves.

MIN/NO.NA/PDPC/2024/022: ADOPTION OF THE AGENDA.

The Agenda of the Committee was adopted having been Proposed by the Hon. Kwenya Thuku Zachary M.P. and Seconded by the Hon. (Dr) Daniel Manduku, M.P.

MIN/NO.NA/PDPC/2024/023: ADOPTION OF MINUTES

Minutes of the 1st Sitting held on 20th February 2024 at 10.30am in Naivasha Conference room, Holiday Inn Hotel were confirmed as a true recording of the proceedings having been proposed by Hon. Kwenya Thuku Zachary M.P. and seconded by Hon. Kirwa, Abraham Kipsang, M.P

Minutes of the 2nd Sitting held on 20th February 2024 at 12.00pm in Naivasha Conference room, Holiday Inn Hotel were confirmed as a true recording of the proceedings having been proposed by Hon. Kirwa, Abraham Kipsang, M.P and Seconded by Hon. Aden Daud, CBS, M.P.

Minutes of the 3rd Sitting held on 21st February 2024 at 10.00am in Naivasha Conference room, Holiday Inn Hotel were confirmed as a true recording of the proceedings having been proposed by Hon. (Dr.) Irene Kasalu, M.P and Seconded by Hon. Kirwa Abraham Kipsang, M.P.

Minutes of the 4th Sitting held on 21st February 2024 at 12.00pm in Naivasha Conference room, Holiday Inn Hotel were confirmed as a true recording of the proceedings having been proposed by Hon. Aden Daud, CBS, M.P and Seconded by Hon. Kirwa Abraham Kipsang, M.P.

Minutes of the 5th Sitting held on 22ndFebruary 2024 at 12.00pm in Naivasha Conference room, Holiday Inn Hotel were confirmed as a true recording of the proceedings having been proposed by Hon Kwenya Thuku Zachary M.P and Seconded by Hon. Aden Daud, CBS, M.P

Minutes of the 6th Sitting held on 26th February 2024 at 11.00am in 4th Floor, Committee Room, Continental House, Parliament Buildings were confirmed as a true recording of the proceedings having been proposed by Hon. Aden Daud, CBS, M.P and seconded by Hon Kwenya Thuku Zachary M.P

MIN/NO.NA/PDPC/2024/024: CONSIDERATION AND ADOPTION OF THE REPORT ON THE 2024 MEDIUM TERM DEBT MANAGEMENT STRATEGY

COMMITEEE OBSERVATIONS:

Having Considered submissions on the 2024 Medium Term Debt Management Strategy the Committee made the below observations.

1) The proposed borrowing ratio in the 2024 MTDS of 45 percent domestic and 55 percent external borrowing differs from the proposed ratio in the 2024 BPS of 54 percent domestic and 46 percent external borrowing. This observation was also noted by the Committee's report on the 2023 MTDS and indicates a continued disconnect in policy formulation geared towards minimizing the cost and risk of borrowing;

2) The depreciation of the exchange rate against the United States Dollar and the Euro, which when combined account for over 88.5 percent of the denomination of the external debt stock, has been costly as indicated by the incurrence of Kshs. 8.26 billion to meet external debt servicing arising from the fluctuation of the foreign exchange rate between July 2023 and January 2024;

3) There is a cross-board tightening of borrowing conditions for both domestic and external borrowing, as evidenced by the increasing Weighted Average Interest Rate (WAIR) of the total debt portfolio and is collaborated by the increasing debt service expenditure under the Consolidated Fund Services;

4) The Medium-term Debt Management Strategy (MTDS) is a framework that was developed by the World Bank and the IMF to guide countries in debt management decisions and operations. Nevertheless, there is a need to customize the MTDS to Kenya's country-specific challenges in order to address high public debt stock, committed but undisbursed loans (and commitment fees), and the rise in non-performing loans owed by state-owned enterprises, among other rising contingent liability risks;

5) There is low civic participation in public debt management policy design and debt management. This is indicated by the lack of response from the public following the call for submissions issued by the National Assembly on the 2024 MTDS. Appropriate measures are therefore required to promote citizen engagement through enhancing transparency and public accountability;

6) There is slow progress in the establishment of the Treasury Single Account. The resolution the National Assembly on the 2023 MTDS intended at ensuring the government mops up surplus funds held by Ministries, Departments and Agencies bank accounts. The account is a requirement of Section 28(2) of the Public Finance Management Act, 2012, and an effective method for enhancing payment and revenue collection systems. Guidelines will also help minimize the impact on financial transfers from domestic financial institutions and initiate full transition to the Treasury Single Account as from FY 2024/25; and

7) There is a deviation from the fiscal deficit target for FY 2023/24. The 2023 MTDS set the fiscal deficit target at 4.4 percent as a share of GDP; this has increased to 5.5 percent in the first Supplementary Estimates. It is important to note that in-year deviations from fiscal targets negate the substantial efforts undertaken in designing a policy framework and strategies intended at a) reducing debt distress, b) slowing debt accumulation, and c) improving overall resource utilization.

8) The PV of debt to GDP is projected to reach 67.2 percent in 2024 and has thus surpassed the anchored debt threshold of 55 percent (+5) subject to Section 50 of the PFM Act 2012 (Amended in 2023), the National Treasury is yet to submit a report on the breach of the debt threshold, indicating the exceptional circumstances, as required by the PFM Act, 2012.

COMMITTEE RECOMMENDATIONS:

Having considered the 2024 Medium Term Debt Management Strategy as well as submissions from stakeholders, the Committee made the below recommendations:

1) **That**, in the next Medium Term Expenditure Framework (MTEF) cycle, the National Treasury should ensure consistency between the Medium-Term Debt Management Strategy and the Budget Policy Statement regarding the optimal borrowing strategy and the fiscal consolidation path;

2) **That**, the National Treasury should ensure that the fiscal deficit and subsequent public borrowing projections are realistic by incorporating forecasts on any potential in-year changes to interest rates, exchange rates, and contingency spending;

3) **That**, to address the emerging escalation of domestic interest rates alongside domestic interest payments, the National Treasury to the National Assembly, should submit within 60 days, a report providing practical measures to reduce the domestic debt service burden to sustainable levels;

4) **That**, in line with the resolution of the National Assembly on the 2023 Medium Term Debt Management Strategy, the National Treasury should publish guidelines that will ensure that the Treasury Single Account is established and operational by July 1st, 2024;

5) **That,** within 30 days and subject to Section 50 of the Public Finance Management Act, 2012 (Amended in 2023), the National Treasury should submit a comprehensive report to the National Assembly on the breach of the debt anchor of 55 percent (5) of Gross Domestic Product and the remedial measures undertaken to ensure that the adherence of the debt threshold;

6) **That**, in order to promote fiscal sustainability, reduce debt distress and to slow debt accumulation, any deviation from medium term fiscal deficit path designed by both the Budget Policy Statement and the Medium-Term Debt Management Strategy, and any resultant readjustment to loan financing, should be pre-approved by the National Assembly;

7) **That**, the National Treasury ensures the customization of the MTDS for the next MTEF cycle to Kenya's specific debt challenges by providing specific measures to deal with undisbursed loans and related commitment fees, measures to resolve risks emanating from non-performing loans owed by state-owned enterprises, and estimation of contingent liabilities;

8) **That**, in order to help enhance public participation in public debt matters, the National Treasury should publish simplified, citizen-friendly documents to accompany the technical reports on public debt submitted to the National Assembly; and

9) **That**, at least two months before the end of the financial year:

   a. the National Treasury shall submit to the National Assembly, the Annual Borrowing Plan that addresses any deviations from the 2024 MTDS in financing the FY 2024/25 Budget Estimates, attendant cost and risks of the deviations and policy measures to address them; and

   b. The National Treasury should submit a list of a schedule of all projects for which borrowing is to be undertaken in the FY 2024/25.

Financial Recommendations

10) **That**, the fiscal deficit target for the medium term is approved and set at 3.9% of GDP for FY 2024/25; 3.3% of GDP for FY 2025/26, and 3.3% of GDP for FY 2026/27, in line with the fiscal consolidation path; and

11) **That**, the country's borrowing strategy is approved at 55 percent for net external borrowing and 45 percent for net domestic borrowing as contained in the 2024 Medium Term Debt Management Strategy.

MIN/NO.NA/PDPC/2024/025. ADOPTION OF THE REPORT

1. The report on the 2024 Medium Term Debt Management Strategy was adopted by the Committee having been proposed by Hon. Aden Daud, EBS. M.P. and seconded by Hon. Kwenya Thuku Zachary M.P.
2. Minutes of the 7th Sitting held on 28th February 2024 at 11.00am in 5th Floor Committee Room, Continental House, Parliament Buildings were confirmed as a true recording of the proceedings having been proposed by Hon. Kwenya Thuku Zachary M.P. and seconded by Hon. Kirwa, Abraham Kipsang, M.P

MIN/NO.NA/PDPC/2024/026 ADJOURNMENT

There being no other business, the meeting was adjourned at 1.30 P.M. The next meeting will be communicated in due course.

DATE.....29th Feb 2024.....

SIGNED.....

NAIROBI

Dear Mr. Njoroge,

PUBLIC DEBT & PRIVATIZATION COMMITTEE MEETING ON THE 2024 MEDIUM-TERM DEBT MANAGEMENT STRATEGY

The Public Debt and Privatization Committee invited the Cabinet Secretary to a meeting on Monday, 26th February 2024 at 11.am, to consider the 2024 Medium-Term Debt Management Strategy.

During the meeting, the Committee raised a pertinent issue on the difference in percentages between the financing mix pronounced in the 2024 Budget Policy Statement (BPS) and the optimal strategy as pronounced by the 2024 Medium Term Debt Management Strategy (MTDS).

The purpose of this letter is to forward to you the addendum to the 2024 MTDS explaining the rationale of the differences for tabling to the National Assembly.

Yours Sincerely,

NJUGUNA NDUNG'U, CBS
CABINET SECRETARY

Copy to: Principal Secretary/The National Treasury

: Chair/Public Debt & Privatization Committee

Encl: Addendum to the Medium-Term Debt Management Strategy.

PUBLIC DEBT & PRIVATIZATION COMMITTEE MEETING ON THE 2024 MEDIUM-TERM DEBT MANAGEMENT STRATEGY

During the deliberations on the 2024 Medium Term Debt Management Strategy (MTDS) between the Public Debt and Privatization Committee of the National assembly, and the National Treasury and Economic Planning, the Committee raised a pertinent issue on the difference in percentages between the financing mix pronounced in the 2024 Budget Policy Statement (BPS) and the 2024 MTDS Optimal strategy. Additionally, the Committee requested for a soft copy of the Pubic Debt Register.

The National Treasury and Economic Planning wishes to respond as follows:

The differences noted are tabulated in the table below:

Documents	**Net Domestic Financing**	**Net External Financing**
Medium Term Debt Management Strategy (MTDS)	*45%*	*55%*
Budget Policy Statement (BPS)	*54%*	*46%*

The funding mix of the fiscal deficit in the 2024 BPS considers: inflows from ongoing projects that are still disbursing; proposed concessional borrowing from multilateral and bilateral creditors under negotiations; desired commercial borrowing; while the residual forms part of the domestic borrowing. In doing so the BPS does not take into account the profile of existing debt stock and its financing terms.

The 2024 MTDS financing mix, is not dictated by what is pronounced by the BPS, if it does so, then it ceases to be a strategy. When the BPS pronounces the fiscal deficit, the MTDS usually come up with the optimal financing mix. The MTDS takes into account the profile of existing debt stock and its financing terms, the projected fiscal deficit, exchange rate assumptions, refinancing assumptions, interest rate assumptions, and combined interest rate and exchange rate assumption in its analysis to determine the optimal strategy while BPS does not. Therefore, the financing mix in the 2024 MTDS optimal strategy may not mirror the 2024 BPS.

The National Treasury and Economic Planning has sent a soft copy of the Debt Register to the Committee secretariat.

REPUBLIC OF KENYA

THE NATIONAL TREASURY AND ECONOMIC PLANNING

SUBMISSION BY THE CABINET SECRETARY, NATIONAL TREASURY AND ECONOMIC PLANNING TO THE PUBLIC DEBT AND PRIVATIZATION COMMITTEE ON THE *2024 MEDIUM-TERM DEBT MANAGEMENT STRATEGY.*

I. INTRODUCTION

Hon. Chairman and **Honorable Members,** it is my pleasure and honor to present the 2024 Medium -Term Debt Management Strategy which informs the financing of the FY 2024/2025 budget deficit to the Public Debt and Privatization Committee.

II. BACKGROUND

Hon. Chairman, the current stock of public and publicly guaranteed debt stands at Kshs. 11,248.01 billion or **69.7 percent of GDP in nominal terms**. **The current Present Value of public debt to GDP is 67.2 percent.**

The public debt comprises a mix of:

a) External debt of **Kshs. 6,189.97 billion;** and

b) Domestic debt of **Kshs. 5,058.04 billion.**

In the recent months, external debt has risen relative to domestic debt due to depreciation of the Kenya shilling against foreign currencies.

External debt is largely from official creditors and on concessional terms. It is composed of:

- **Kshs. 3,118.57 billion** as multilateral debts (*accounting for 50% of total external debt*); World Bank loans are concessional and charge a service fee of 0.75 percent and an interest rate of 1.25 percent on the disbursed loan amount.
- **Kshs. 1,399.72 billion** bilateral debts (23%); and
- **Kshs. 1,671.68 billion** commercial debts (27%) of which Eurobonds account for Kshs 1,141.33 billion (18%).

Domestic debt is mainly in held in form of Government debt securities as follows:

- **Kshs. 4,272.25 billion in Treasury** Bonds (*accounting for 85% of total domestic debt*)
- **Kshs. 565.63 billion Treasury Bills** (11%); and
- **Kshs 220.16 billion** (4%) as **others** (*That is, Overdrafts from Central Bank of Kenya, IMF SDR Allocation and Bank advances*)

Hon. Chairman, the proposed FY 2024/2025 fiscal deficit of **Kshs. 703.87 billion** is to be financed as follows.

a) **Net Foreign financing** - **Kshs 326.12 billion**

o/w -

Commercial Borrowing	*-Kshs. 151.00 bn*
Programme loans	*-Kshs. 210.48 bn*
Project Loans & A-I-A	*-Kshs. 308.54 bn*
External Repayment	*-Kshs. (343.90) bn*

b) **Net Domestic financing** - **Kshs. 377.75 billion**

III. HIGHLIGHTS OF THE 2024 MEDIUM TERM DEBT MANAGEMENT STRATEGY

Assessment of the cost and risk characteristics of the current debt portfolio

Hon. Chairman,

a. Under the current revenue driven multi-year fiscal consolidation program The National Treasury commits to bring down the **Present Value of debt as a percentage of GDP** from **67.2 percent** to 55% over a period of five years as per the recent amendment of the Public Finance Management Act on the debt anchor.

b. **The weighted average interest rate** of the total debt portfolio was **7.7 percent per annum** in June 2023, of which domestic debt is 11.4 percent per annum. **The weighted average interest rate of external debt increased to 4.5% in June 2023** compared to 3.9% in December 2022.

c. The **rise in interest rates** in the public debt portfolio is attributed to the **tight liquidity conditions** both in the domestic and international financial markets.

d. Average Time to Maturity of the total portfolio **declined from 8.8 years** in December 2022 to **8.5 years in June 2023** on account of reduced performance of long tenor bonds and issuance of more short-term domestic debt attributed to tightness of liquidity in the market.

e. **The projected debt redemption** profile is characterized by **large maturities** in 2028, 2029 and 2030 on account of Eurobond and bank syndicated debts.

IV. THE 2024 MEDIUM TERM DEBT MANAGEMENT OPTIMAL STRATEGY

Hon. Chairman, the ***2024 Medium-Term Debt Strategy*** aims to optimize access to ***external concessional borrowing*** and ***undertake liability management*** to minimize costs and refinancing risks in the debt portfolio.

On a **net basis**, the strategy assumes a mix of **45% domestic and 55% external financing** over the medium term. In **gross borrowing terms**, external and domestic financing accounts for **37% and 63%,** respectively.

V. KEY ATTRIBUTES OF THE 2024 MEDIUM TERM DEBT MANAGEMENT STRATEGY

Hon. Chairman, in addition to the commitment on **fiscal consolidation to stabilize the growth of public debt,** the ***2024 Medium-Term Debt Strategy*** identifies key actions to guide borrowings during FY2024-25 to 2026-2027, which include:

- **Use of long tenor Treasury bonds** for refinancing of maturing domestic debt and raising of new deficit funding resources along with reduction in the proportion of short-term domestic debt (Treasury bills). **This will minimize refinancing risks and lengthening Average Time Maturity** for domestic and total debt.
- **Deepening the domestic bond market** through issuance of more medium to long-term instruments as the **main source of domestic financing**.
- **Maximize use of concessional borrowing** as opposed to commercial debt to lower costs and risks;
- **Minimize interest rate risk** in terms of average time to re-fixing.

VI. HIGHLIGHTS OF KENYA'S DEBT SUSTAINABILITY

Hon. Chairman, Kenya continues to meet its current and future debt payment obligations when due without compromising on its other budgeted programs. The latest Debt Sustainability Analysis Report indicates that;

- **Public debt remains sustainable though the distress level is elevated** due to the adverse effects of multiple shocks experienced by the country since 2020;
- The **Debt Carrying Capacity has declined from strong to medium since 2021 to date;**
- **Subdued growth in exports** has increased external debt vulnerability.
- A week ago, Kenya **successfully executed a liability management operation** targeting the 2024 Eurobond. The operation **permanently removed settlement risk** on the USD 2 billion Eurobond maturing in June 2024 by partially **buying-back USD 1.5 billion** of the Bond.

VII. DOMESTIC DEBT MARKET REFORMS

Hon. Chairman, in collaboration with other financial sector players including the Capital Market Authority and the Central Bank of Kenya, The National Treasury will sustain **domestic debt markets reforms** to improve performance of the primary issuance and promote vibrancy of the secondary market to develop a credible yield curve for Government securities. These reforms include:

- Publication of an **issuance calendar**;
- Separation of the **Retail and Wholesale Market** for Government Securities;
- **Re-engineering Retail-Bond Issuance**;

- Establishment of the **Over-The-Counter (OTC) Market** for Government Debt Securities;
- Establishment of an **Efficient Horizontal Repo Market** and **Securities Lending and Borrowing (SLB).**
- The National Treasury & Economic Planning has engaged the **IMF/World Bank to assist the PDMO in the domestic market development**.

Hon Chairman, let me now address the 16 questions on the 2024 MTDS.

a) Provide an explanation of how the financing framework under the 2024 Budget Policy Statement is linked to the strategy under the 2024 Medium Term Debt Management Strategy, which seeks to reduce the cost and risk of borrowing.
The 2024 MTDMS has been prepared based on the projected macroeconomic indicators and fiscal deficit trajectory in the 2024 BPS. The strategy focuses on maximizing concessional and reducing commercial borrowing, thereby reducing the cost of debt.

b) The Committee noted that despite the publication of Medium Debt Strategies on an Annual basis, the cost of debt servicing expenditures under the Consolidated Fund Service expenditures have continued to increase and will amount to Kshs. 1.9 trillion in FY 2024/25. In this regard, the Committee requires an explanation of how the strategy under the MTDS creates fiscal space to support other sectors' expenditure needs. The objective of the MTDS is to raise resources through borrowing to finance the budget deficit while maintaining minimum costs and prudent levels of risks in the portfolio. Debt service costs have continued to rise in line with the growth of public debt. The main objective of the MTDS is **to target an optimal mix of external and domestic debt to trade-off costs and risks in the debt portfolio. We have continued to grow the proportion of concessional debt in the portfolio to keep interest costs at a minimum; We have also increased the stock of long tenure domestic debt to minimise settlement risk. A multi-year fiscal consolidation framework seeking to lower the fiscal deficit will ultimately drive debt servicing cost on a downward trajectory.**

c) A review of the Debt Sustainability Analysis under the 2024 MTDS reveals that the Present Value of the Debt to GDP ratio is projected to remain above the

threshold of 55% over the Medium Term. The Committee requires the National Treasury to indicate the path under both the 2024 BPS and MTDS that will achieve the PFM threshold of 55% (+5) by 2029.

Fiscal deficit is the primary driver of debt. The 2024 BPS pronounces a tight fiscal deficit path underpinning the projected PV of debt to GDP from 68.2% in 2023 to 56.9% in 2028 and 55% by November 2028.

d) Explain why the strategy does not consider the policy impact emanating of the continuous deviation from the annual MTDS plan/strategy.

The strategy considers impact of exogenous shocks that influences access and cost of financing. Under the 2024 MTDS, the National Treasury will seek to explore alternative sources of financing including execution of liability management to raise resources for budget financing and also lower costs and risks in the debt portfolio. The most important challenge is external shocks that are persistent and cause massive revenue diversion.

e) The Committee noted a need to take a conservative approach towards commercial borrowing and that such loans should be earmarked to capital projects whose returns are comparable to the high yields that the loans bear. As such, a list of such projects should be submitted to the Committee.

Recourse to commercial borrowing is driven by lack of access to budget support concessional finance from multilateral and bilateral lenders. Whereas project linked finance is desirable, some flexibility in use of funds is required to ensure delivery of high social impact projects like education, health, water and sanitation which may not necessarily demonstrate revenue streams but contribute to human capital development critical for growth and development of the country.

f) The review of the 2024 MTDS indicates that domestic debt continues to exhibit elevated interest rates and refinancing risks. The materialization of these risks could result in liquidity constraints that would affect the implementation of the Budget.

The 2024 MTDS seeks to maintain a trade-off of risk and cost in the domestic debt portfolio. Whereas interest costs have risen in the last few months due to external factors, the focus is to undertake a number of reform measures in the domestic debt market to promote efficiency in the primary market and restore vibrancy in the secondary market. The interventions will lower

overall costs and reduce refinancing risks along the maturity structure of domestic debt.

g) What are the strategy and public debt outlook expected to address issues raised by Sovereign/Credit Rating Agencies whose reports are critical in determining the cost of borrowing?
The rating agencies have raised concerns over the ability of Government to fully finance the budget deficit due to limited access to international market particularly to refinance the 2024 Eurobond. A week ago, Kenya has been able to de-risk the 2024 Eurobond through a buy-back operation and domestic debt markets have positively responded to this action. The National Treasury and Economic Planning has initiated a process to develop a Strategy on how to enhance Kenya credit rating profile.

h) The occurrence of the exchange rate risk resulted in the increase in the debt stock by over Kshs. 800 billion. How will this be addressed, given that external debt accounts for 55% of total debt stock as of December 2023, and what is the expected impact of the appreciation of the exchange rate?
Kenya has a market determined exchange rate regime that acts as an automatic stabilizer, it stabilizes prices and supports economic activity. The recent 2024 Eurobond buyback operation de-risked the space and slowed depreciation of currency and a surge in foreign exchange flows is expected in the near term. Overall, debt to GDP will continue to decline due to revenue driven fiscal consolidation efforts

i) The strategy does not provide further information relating to the repayment of the International Sovereign Bond scheduled for June 2024, and in relation to:
   a. New issuance in February 2024. **The 2024 MTDS is for the period FY 2024/25.**
   b. The change in weighted average interest rates of international sovereign bonds between 2014 and 2024. **The bond trades in the market and the trading is driven by risk profile.**
   c. How the National Treasury utilises grace periods for loans to prepare for loan repayment. **Grace period for loans is provided to allow time for completion of project execution and its impacts on the economy to be feasible before repayments. The 2024 MTDS states that liability management operation will be executed to address refinancing risk.**

j) The strategy does not address: i) contracted but undisbursed loans and the resultant commitment fees and ii) progress made and measures geared towards

increasing the rate of loan disbursement to increase the efficiency of the use of loan resources.

MTDS primary objective is to mobilize resources to finance the deficit and maintaining an optimal mix of debt to lower costs and risks. Absorption of project funds is a matter of budget execution by line ministries, departments and agency and is outside the scope of debt management strategy.

k) The Committee noted a need to expound on the components of net domestic and net external borrowing proposed under the strategy.

The details of net domestic and net external financing may be broadly stated in future MTDS as details depends on lending policies of potential multilateral, bilateral and private lenders and market conditions.

l) The 2024 MTDS indicates that up to $8.5 billion or 25% of total debt will be maturing in +10 years, which implies that debt is not equitably shared between present and future generations, contrary to Article 201(c) of the Constitution.

New loan commitments will continue to be contracted over the period consistent with Government development plans over time. This will ensure intergenerational equity in terms of benefits and burden sharing. When such imbalance occurs, corrective measures will be taken.

m) Kenya's debt is classified as sustainable but is at a high risk of debt distress, with four debt sustainability ratios remaining breached over the medium term. How will the strategy improve the position of Kenya's DSA risk indicators?

Multi-year fiscal consolidation policy stance will drive debt to GDP on a downward trajectory and improve debt sustainability indicators. The MTDS will continue to lay emphasize on concessional financing and issuance of longer domestic debt instruments to finance the deficit and ensure a balance mix of external and domestic debt.

n) Provide a progress report on the implementation of each of the National Assembly Resolutions based on the Committee's report on the 2023 Medium Term Debt Management Strategy.

(Progress report attached)

o) Submit to the Committee the Public Debt Register (Domestic Debt Stock, External Debt Stock, Undisbursed Loans and Guaranteed Debt) and the respective Debt Servicing Register as of the end of January 2024.

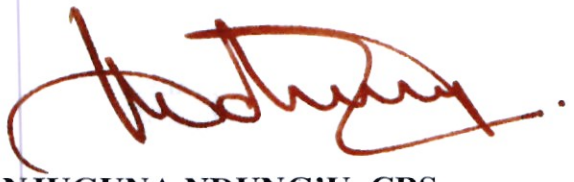
(Register attached)

p) Submit a report containing a list of projects for which loan financing will be contracted and the respective creditors. This report should also indicate timelines for project valuation, appraisal, and assessment.
Line Ministries, Department and Agencies will submit projects for consideration for external financing upon approval of FY 2024/5 Budget.

VIII. CONCLUSION

I thank you once again, **Hon. Chairperson and Hon. Members** for giving me this opportunity to engage with you on the ***2024 Medium-Term Debt Management Strategy***. The National Treasury and Economic Planning requests for consideration and approval of the ***2024 Medium -Term Debt Management Strategy*** and adoption of the optimal strategy to fund the Financial Year 2024/25 fiscal deficit. We remain available to support the Committee when called upon during this approval process.

Hon. Chair, I submit.



NJUGUNA NDUNG'U, CBS
CABINET SECRETARY/ NATIONAL TREASURY AND ECONOMIC PLANNING

Dear Sir

RE: INVITATION TO ATTEND PUBLIC DEBT & PRIVATIZATION COMMITTEE MEETING ON THE MEDIUM-TERM DEBT MANAGEMENT STRATEGY FOR FY 2024/25

The above matter refers.

The National Treasury submitted the Medium-Term Debt Management Strategy (MTDS) for FY 2024/25 to the National Assembly on **15th February 2024,** in line with Section 33 of the Public Finance Management Act (PFMA 2012). Standing Order (S.O.232) of the National Assembly Standing Orders requires the Public Debt & Privatization Committee to consider the strategy and table a report within 10 days of submission. The Committee is required to recommend to the National Assembly the appropriate limits of domestic and foreign borrowing which should form a basis for approval of the report on the Budget Policy Statement.

In this regard, the Committee invites the Cabinet Secretary for the National Treasury& Economic Planning to a meeting to consider the Medium-Term Debt Management Strategy for the 2024/2025 Financial Year on **Monday, 26th February 2024 at 11.00 am**. The venue of the meeting will be communicated in due course.

During the meeting, the Cabinet Secretary will be required to submit a comprehensive and signed report, on the Medium-Term Debt Management Strategy in addition to addressing the issues attached to this letter. The Cabinet Secretary may be accompanied by not more than ten (10) technical officers.

The officers facilitating the Committee are **Mr. Leonard Machira,** who may be contacted on Tel No. 0718-379-275 and email address leonard.ongegu@parliament.go.ke and **Mr. Chacha Machage**, who may be reached on +254707616578 or email address: jcmachage@gmail.com.

Yours sincerely,

SERAH KIOKO, MBS

P.O. Box 30007
NAIROBI

The Committee noted the following issues during its review of the 2024 Medium Term Debt Strategy. Which requires a response from the Cabinet Secretary for the National Treasury and Economic Planning:

1. Provide an explanation of how the financing framework under the 2024 Budget Policy Statement is linked to the strategy under the 2024 Medium Term Debt Management Strategy, which seeks to reduce the cost and risk of borrowing.

2. The Committee noted that despite the publication of Medium Debt Strategies on an Annual basis, the cost of debt servicing expenditures under the Consolidated Fund Service expenditures have continued to increase and will amount to Kshs. 1.9 trillion in FY 2024/25. In this regard, the Committee requires an explanation of how the strategy under the MTDS creates fiscal space to support other sectors' expenditure needs.

3. A review of the Debt Sustainability Analysis under the 2024 MTDS reveals that the Present Value of the Debt to GDP ratio is projected to remain above the threshold of 55% over the Medium Term. The Committee requires the National Treasury to indicate the path under both the 2024 BPS and MTDS that will achieve the PFM threshold of 55% (+5) by 2029.

4. Explain why the strategy does not consider the policy impact emanating of the continuous deviation from the annual MTDS plan/strategy.

5. The Committee noted a need to take a conservative approach towards commercial borrowing and that such loans should be earmarked to capital projects whose returns are comparable to the high yields that the loans bear. As such, a list of such projects should be submitted to the Committee.
6. The review of the 2024 MTDS indicates that domestic debt continues to exhibit elevated interest rates and refinancing risks. The materialization of these risks could result in liquidity constraints that would affect the implementation of the Budget.

7. What are the strategy and public debt outlook expected to address issues raised by Sovereign/Credit Rating Agencies whose reports are critical in determining the cost of borrowing?

8. The occurrence of the exchange rate risk resulted in the increase in the debt stock by over Kshs. 800 billion. How will this be addressed, given that external debt accounts for 55% of total debt stock as of December 2023, and what is the expected impact of the appreciation of the exchange rate?

9. The strategy does not provide further information relating to the repayment of the International Sovereign Bond scheduled for June 2024, and in relation to:
    a. New issuance in February 2024.
    b. The change in weighted average interest rates of international sovereign bonds between 2014 and 2024.
    c. How the National Treasury utilises grace periods for loans to prepare for loan repayment.

10. The strategy does not address: i) contracted but undisbursed loans and the resultant commitment fees and ii) progress made and measures geared towards increasing the rate of loan disbursement to increase the efficiency of the use of loan resources.

11. The Committee noted a need to expound on the components of net domestic and net external borrowing proposed under the strategy.

12. The 2024 MTDS indicates that up to $8.5 billion or 25% of total debt will be maturing in +10 years, which implies that debt is not equitably shared between present and future generations, contrary to Article 201(c) of the Constitution.

13. Kenya's debt is classified as sustainable but is at a high risk of debt distress, with four debt sustainability ratios remaining breached over the medium term. How will the strategy improve the position of Kenya's DSA risk indicators?

14. Provide a progress report on the implementation of each of the National Assembly Resolutions based on the Committee's report on the 2023 Medium Term Debt Management Strategy.

15. Submit to the Committee the Public Debt Register (Domestic Debt Stock, External Debt Stock, Undisbursed Loans and Guaranteed Debt) and the respective Debt Servicing Register as of the end of January 2024.

16. Submit a report containing a list of projects for which loan financing will be contracted and the respective creditors. This report should also indicate timelines for project valuation, appraisal, and assessment.

REPORT ON: Policy Resolution by the National Assembly from the report of the Public Debt and Privatization Committee on the 2023 Medium-Term Debt Management Strategy

1. THAT, any borrowing undertaken by the National Treasury in FY 2023/24 should not exceed the Kshs. 10 trillion approved debt ceiling set by Parliament.

   The National Treasury proposed amendments to the PFM (National Government) Regulations, 2015 to replace the current public debt limit of Ksh. 10 trillion. The public debt limit was replaced with a debt anchor. The new limit is measured against Gross Domestic Product in present value terms as a desired level of public debt. The rationale is to measure relative size of debt in terms of the Country`s debt carrying capacity and allow for periodic impact of exogenous shocks on debt and GDP. The amendments were approved by Parliament in November 2023 and became effective, replacing the nominal debt limit with a debt to GDP ratio of 55 percent in present value terms (debt anchor).

2. THAT, as indicated in the Committee's report on the Consolidated Fund Services (CFS) expenditures for Supplementary Estimates No. 1 of FY 2022/23, the National Treasury should within six months, table regulations for the establishment of a sinking fund dedicated to public debt servicing as provided for under section 50(8) of the PFM Act, 2012.

   Section 50 (8) of the PFM Act 2012 provides for establishment of the sinking fund which is aimed at redemption of Government loans, and payment of expenses of, or incidental to, redemption of an issue of National Government loans. The National Treasury prepared guidelines for the operationalization of the sinking fund and presented to Parliament. Parliament recommended public participation exercise to the guidelines in line with statutory instruments Act, 2013. Later it was deemed appropriate to convert the guidelines to Regulations which were to be tabled to Parliament vide the delegated legislation committee. The regulations have since been prepared awaiting public participation and onward submission to Parliament.

3. THAT, in order to safeguard against shocks with regard to external interest payments, the National Treasury adopts hedging mechanisms on foreign exchange risks and/or negotiates lending agreements in Kenya shillings.

   The National Treasury will take capacity building on derivatives for officers in the Public Debt Management Office as a first step to hedging of foreign exchange risks to advise management on the best option and time to hedge

the risk. Negotiation of loan agreements in Kenya shillings is only possible if the lenders are Kenyan citizens, however, if lenders are foreigners, acceptance of local currency is not possible especially, if the currency is not internationally traded and risk exposures are high to foreign investors since it's difficult to hedge the local currency in their foreign countries and if possible, the costs are high. The exchange rate regime in Kenya is market determined, thus not possible to fix exchange rate.

4. THAT, the National Treasury undertakes a review of all undisbursed loans amounting to Kshs. 1.179 trillion and submits to the National Assembly within one month, a report with information on terms, status, reasons for un-disbursement and proposals on any loans that can be cancelled to save spending on commitment fees.

   The National Treasury undertakes joint portfolio reviews with Development Partners and MDAs from time-to-time within a Financial Year to assess the progress in the project implementation, identify challenges and address the bottlenecks that impede smooth implementation of externally funded projects/programmes. Consequently, the National Treasury has identified a number of projects that requires restructuring in order to address implementation challenges. The National Treasury also undertake measures including cancellation of non-performing loans.

5. THAT, in the next budget cycle, the National Treasury aligns the borrowing strategy proposed in the Budget Policy Statement with the borrowing strategy in the Medium-Term Debt Strategy (MTDS) in order to ensure credibility of the Government's planning documents.

   The 2024 MTDS was aligned to the BPS and has been prepared based on the projected macroeconomic indicators and fiscal deficit trajectory in the 2024 BPS.

6. THAT, in the next budget cycle, the National Treasury undertakes public participation on the MTDS in line with Article 201 of the Constitution.

   Article 201 stipulates the principles guiding all aspects of public finance in the Kenya, which includes openness and accountability, including public participation in financial matters and promotion of an equitable society. The Budget Policy Statement is a document that helps estimate and evaluate the revenues and expenditures by setting out the broad strategic priorities and policy goals that will guide the national government and county governments in preparing their budgets both for the following financial year and over the medium-term.

The Medium-Term Debt Management Strategy is prepared pursuant to Section 33 (1) of the Public Finance Management Act, 2012 which requires the Cabinet Secretary, National Treasury and Economic Planning to submit on or before 15th February every year, a statement setting out the debt management strategy of the National Government over the Medium - Term with reference to the actual liabilities in terms of loans and guarantees and plans for dealing with the liabilities. The 2024 Medium- Term Debt Management Strategy was aligned to the broad strategic priorities and policy goals set out in the Budget Policy Statement.

The 2024 MTDS was prepared in line with the aforementioned guidance from Statutes and submitted to Cabinet and subsequently Parliament alongside the 2024 BPS. Public participation was jointly conducted for the 2024 BPS and the 2024 MTDS.

7. THAT, going forward, the MTDS should live up to its expectation as a medium-term document by showing consistency in proposed debt management strategies including deficit financing on a three-year rolling framework, from one MTDS to another.

In the preparation of MTDS, the National Treasury considers the three-year rolling deficit financing and the trade-off between costs and risks. This is revised annually to cater for changes.

8. THAT, the National Treasury undertakes a sensitivity analysis on the 2023 MTDS and submits to this house, within two weeks, a contingency plan on measures to be undertaken in the event of revenue shortfalls or underperformance of loans.

Success in implementation of the an MTDS is dependent on various exogenous factors among them, stable financial and macro-economic environment. It is not possible to predict the future but the MTDS has taken account of the risks to the baseline assumptions and propose measures and other commitments to mitigate any risk factors as highlighted. In case of revenue shortfalls or underperformance of the loans, the National Treasury recommends austerity measures to ensure that only priority expenditures are funded and submits supplementary budgets for approval to Parliament.

2002407_1	Muranga-Kisii-Bungoma Sewerage project (Converted from ADF FRF 1983024)	African Development Fund	Multilateral	GOK	31/12/2002	01/01/2033	72,190	EUR	22,739.77	Rescheduled/BR	Rescheduled/BR	Fully Drawn	Municipal Councils of Murang'a, Kisii and Bungoma.	The project consists of rehabilitating and extending existing wastewater collection systems and building new wastewater treatment plants to ensure that the three cities have adequate facilities for the collection, treatment and disposal of wastewater until 1995. By having easier access to factors of production and markets, farmers and ranchers will be inclined to produce from a commercial point of view and to become more integrated with the monetary economy. This will require not only improving the roads and transport facilities, but also installing infrastructure such as water and sewer systems in these cities. The components of the project are: (A) land acquisitions; (B) pipes and manholes; (C) treatment plants; (D) emptying vehicles and tools; (E) execution studies and supervision of works. The project consists of rehabilitating and extending existing wastewater collection systems and building new wastewater treatment plants to ensure that the three cities have adequate facilities for the collection, treatment and disposal of wastewater until 1995. By having easier access to factors of production and markets, farmers and ranchers will be inclined to produce from a commercial point of view and to become more integrated with the monetary economy. This will require not only improving the roads and transport facilities, but also installing infrastructure such as water and sewer systems in these cities. The components of the project are: (A) land acquisitions; (B) pipes and manholes; (C) treatment plants; (D) emptying vehicles and tools; (E) execution studies and supervision of works. REPORT TO THE NATIONAL ASSEMBLY COMMITTEE ON PUBLIC DEBT & PRIVATIZATION ON THE MEDIUM-TERM DEBT MANAGEMENT STRATEGY – FY 2024/2025 REGARDING DEBT SERVICE COST.

PRESENTED BY:

FCPA DR. MARGARET NYAKANG'O, CBS
CONTROLLER OF BUDGET

22nd February 2024

Introduction

The Office of the Controller of Budget (OCOB) is established under Article 228 of the Constitution to oversee the implementation of the budgets of the National and County Governments by authorizing withdrawals from public funds as established under Articles 204, 206 and 207 of the Constitution. Article 228 (5) of the Constitution requires the Controller of Budget (CoB) not to approve any withdrawals from public funds unless satisfied that such withdrawals are authorized by law. The CoB is further guided by the principles of public finance as articulated under Article 201 of the Constitution and the Public Finance Management Act, 2012, which require that public funds be used prudently and responsibly.

This brief is prepared in response to a letter Ref: NA/PBO/PD&PC/2024/004 dated 15th February 2024 from the Office of the Clerk of the National Assembly inviting the Controller of Budget to participate in the deliberations of the Public Debt and Privatization Committee in line with Section 33 of the Public Finance Management Act, 2012 and the National Assembly Standing Order number 232. This report provides insights on the management of debt service cost and in-year government liquidity as contained in the Medium-Term Debt Management Strategy for FY 2024/2025.

The Preparation of the 2024 MTDS to guide borrowing in the medium term is in line with Section 63(c) of the PFM Act, 2012. The 2024 optimal strategy is to achieve a gradual reduction of Treasury bills stock with domestic financing mainly sourced from medium to Long-term Treasury bonds. Externally, the strategy focuses more on budget financing through concessional borrowings. In terms of

net Financing, the option assumes 45 per cent domestic financing and 55 per cent external borrowing. Therefore, the purpose of the MTD strategy is to ensure that the Government meets its expenditure requirements while repaying its debt obligations when they fall due. This report provides insights into the outcomes of the optimal strategy as stated in the MTDS: -

1. **The least cost of debt in terms of interest payments as a percentage of GDP and implied interest rate**

The CoB proposes that the CBK reviews the domestic interest rates as this is a matter that is within our scope as a country. The Monetary Policy Committee (MPC) raised the Central Bank Rate (CBR) from 12.5 per cent to 13 per cent in a meeting held on the 6th of February 2024. The decision to increase the rate was to mitigate the adverse economic impact and financial disruptions.

During the first half of the current financial year, the government spent Kshs 405 billion on debt interest expense. Domestic interest consumed Kshs 300 billion while foreign interest gobbled up Kshs 105 billion. If this trend continues, it is projected that the government will end up spending over Kshs 800 billion on debt interest expense by the end of this financial year.

Notably domestic interest expense rose by 19% compared to a similar period last year due to rising interest rates and further debt accumulation. Foreign interest rose by 57% driven mainly by the depreciation of the shilling.

The twin tragedy of rising interest rates and steep depreciation of the shilling is increasing our debt servicing burden to unmanageable levels. We recommend that

the National Treasury should refrain from replacing cheaper debt with costlier ones.

The continued rise in debt service costs will leave the government with limited funds for other necessary expenditures. Development spending on both national and county governments will be hard hit. Eventually, essential expenditures such as salaries will also be adversely affected.

There is a need for rationalization of spending while growing revenues leading to the overall growth of the economy. This is the surest way of evading the debt trap.

Recommendation

The Central Bank of Kenya should revisit the interest rate adjustment at the earliest opportunity. The MPC should be convened to reduce the domestic interest rates Our current problems as a country in matters of inflation are driven by the supply side while the consumption on the households' side is not driven largely through debt. This implies that even if the CBK raises the interest rates to curb inflation, the rise will have no impact as inflation will still rise if there is a shortage in food supply.

On matters of exchange rate, raising interest rates would be detrimental because it indiscriminately impacts all imports including essential ones and those needed to support production. It would make more sense to implement fiscal policies like higher taxes for non-essential imports and give more incentives that will support local production that would enhance the GDP and consequently lower food prices.

This will also shift the balance of trade towards more exporting than importing resulting in a further strengthening of the Kenya shilling.

2. The Present Value (PV) of Debt to GDP as an outcome of the Fiscal Consolidation Plan.

The current PV of debt to GDP as stated in the MTDS is at 68.3 percent as reported. Fiscal consolidation as a government policy is intended to reduce deficits and accumulation of debt.

The Government should endeavor to develop a balanced budget at both levels of Government. Kenya's budget deficit and debt crisis stem from the government's persistent overspending and non-core spending priorities. The government would not have a budget deficit problem and, consequently, a debt problem if the expenditure side is resolved to alleviate wastage of public funds. Kenya's problem as noted in most of the CoB reports at both the National Government and County Governments has been consistent on matters of spending on more non-essential expenditures leaving out impactful development expenditures.

Recommendation

There is a need to limit the budget to necessary expenditures. Kenya's fiscal gap will keep widening and eventually have a hard landing. In the business cycle or economic cycle, a **hard landing** is an economy rapidly shifting from growth to slow growth and flat as it approaches a recession, usually caused by government attempts to slow down inflation. It is distinguished from a *soft landing*, in which an economy's growth rate slows enough to control inflation, but remains high enough to avoid recession. The criteria for distinguishing between a *hard* and *soft* landing

are numerous and subjective. In addition, unless we limit government borrowing, increasing the scope of tax will not increase revenue beyond the optimal point. This is because government borrowing mops out what could have been used for private sector investments. Economic growth is achievable without exerting pressure on the existing tax regime.

3. **To Minimize refinancing Risk by lengthening the total portfolio Average time to Maturity (ATM) through issuance of medium to long-term bonds and concessional loans with longer maturities**

Kenya has just partially repaid **$2bn** Euro 2024 Bond. It took a careful but calculated risk when capital markets suddenly reopened for frontier markets this year. Kenya decided to buy back most of that bond and issue a new long-term **$1.5bn** note that alleviates the pressure of bullet payments until **2029** when repayments start. Kenya's swerving of default was greeted with relief, despite the high price of a **10.375%** effective interest rate, or yield. That is well above the **6.875%** that the 2024 bond had offered. While interest rates have shot up everywhere over the last couple of years, a double-digit borrowing cost remains one of the most obvious warning signs that **all is not well in our country.** Kenya was compelled to refinance at a higher interest rate to offset the **$2bn** bond payment looming in June 2024.

Recommendation

Refinancing a loan doesn't entirely resolve a problem but rather it is a postponement of the problem to a later period. The questions to ask are: -

- Are the concessional loans really concessional? While it seems like a rhetorical question, most of these so-called concessional loans might possibly be very expensive in the long run and with a **low impact in terms of economic development.** These concessional loans are usually given by multi-lateral agencies such as the IMF and the World Bank under serious austerity measures such as increases in taxation. My office recommends an audit of these loans and the projects they support to ascertain the effectiveness of these loans. Our analysis has revealed that the average interest paid on concessional loans has averaged 14.5% for many years, which is not cheap by any standards.

- The euro bond settlement is good news to the Country but were other considerations looked at when the new 1.5bn issue was made? The Government has insinuated that it will be paid in tranches to avoid one bullet payment as has been the norm. However, other loans will be maturing at the same time and not necessarily the Euro bond loan only. These other repayments, which include domestic debt, will still pose a heavy burden on the cashflows shortly.

4. <u>To minimize interest rate risk in terms of average time to re-fixing</u>

Average Time to Re-fixing (ATR) measures, how long, on average, it will take for changes in market interest rates to have effect on the whole debt, i.e. how often the interest rates on the portfolio are refixed. ATR is typically measured in years, and a high value of ATR indicates low risk. In Kenya for instance, concerning interest rate risk, domestic debt portrays higher vulnerability than external debt. Notably, there has been a reduction in the average time to

refixing (ATR) of domestic debt from 11.3 years as reported in the 2022 MTD target to 7.7 years as of June 2023. There is a deviation of -3.6 years and it has been alluded to a marginal increase in interest rate indicators. The indicators point towards investors' preference for short-term securities over long-term securities.

Recommendation.

The CBK should through the MPC lower domestic interest rates to discourage commercial banks who are major investors of the short-term treasury bills in investing in these bills This is because these banks crowd-out private investors from accessing debt due to its high cost. The contradiction in this is that the same commercial banks are holding Government entity accounts and thus invest the same money that is invested in the securities. A case example is attached in **Annex 1,** a report by the Coast Development Authority (CDA) which received Kshs 271,535,110 for the implementation of the Malindi Integrated Social Health Programme funded by the Italian Government. According to the status report, some of the reasons raised for the delays are awaiting approval by the National Project Steering Committee (NPSC) and Tax exemption approvals.

5. **To deepen the domestic bond market through issuance of more medium to long-term instruments as the main source of domestic financing.**

This move is positive as it will enhance economic growth, and free up some borrowing space for private entities to access favourable credit terms from

commercial banks. This is due to the fact that Commercial banks usually prefer short term T-Bills to long term.

Recommendation

The Government should fast track implementation of this strategy and also ensure that Government entities fast track implementation of its projects to prevent idle funds lying in commercial banks.

Conclusion.

The Office Controller of Budget strives to promote prudent utilization of public funds. I therefore recommend that the National Treasury should fast track implementation of long outstanding Sinking Fund. In addition, the Committee should enact strict legislation that would help alleviate the pending bills menace that is faced at both levels of Government. Pending bills are included among the items that the government is obligated to pay as the first charge in budget payments before spending money on service delivery or development projects. Pending bills should receive the same treatment given to public debt by ensuring that Public debt is the first charge on the Consolidated fund. These are covered in the Government Circular-No.10-2020-on-Prioritization-of-Pending-Bills-by-State-Corporations-and-Semi-Autonomous-Agencies-SAGAs as attached in Annex 2.

RE: SUBMISSION OF QUARTER (2) FINANCIAL REPORT FY 2022/23 COAST DEVELOPMENT AUTHORITY

Reference is made to your letter Ref:EAC&RD/002/Vol.I(26) dated 8th January 2024 on the above subject.

Find enclosed detailed report for the period ended 31st December 2023 for Malindi Integrated Social Health Program (MISHDP).

Please note the following:

- The project has received Ksh.271,535,110/= for the above project.
- The detailed status report for the said project is attached.
- There has been no disbursement to the Contractors by the end of the said period.
- The commencement date for the project was 1st May 2022 and the expected date of completion is 30th May 202[illegible]

Yours faithfully,

Mohamed Keinan Hassan, PhD, [illegible]

TREASURY CIRCULAR NO 10/2020

THE ATTORNEY GENERAL

ALL CABINET SECRETARIES

ALL ACCOUNTING OFFICERS/PRINCIPAL SECRETARIES

PRIORITIZATION OF PENDING BILLS BY STATE CORPORATIONS AND SEMI-AUTONOMUS AGENCIES (SAGAS)

Despite numerous Circulars and Directives requiring State Corporations to prioritize payment of pending bills, it has been noted that the level of compliance with these Directives has been very low. Consequently, it has become necessary to remind Accounting Officers of their obligations, responsibilities and sanctions under the law. Accumulation of liabilities not sanctioned by law (pending bills) is expressly prohibited and may invite punitive actions against those responsible.

Responsibilities of Accounting Officers in financial management

The following sections of the law clearly spell out the responsibilities of Accounting Officers of public entities: -

- Section 226 (2) of the Constitution states that "*The accounting Officer of a national public entity is **accountable to the National Assembly for its financial management…**"*
- Section 23 of PFMA, (Regulations, 2015) states that Accounting Officers are accountable to the National Assembly for inter alia *1(c) "... maintaining **effective systems of internal control** and measures taken to ensure that they are effective"*
- Section 2 of the Regulations states that the Accounting Officers shall inter alia ***(a)** "**comply with any tax, levy, duty, pension, commitments** …"*
- Section 53 (8) of the Public Procurement and Disposal Act (2015) states that *"an Accounting Officer shall not commence any procurement proceedings until satisfied that sufficient funds to meet the obligations of the **resulting contract (s) are reflected in approved budget estimates**"*

Improper conduct in relation to unauthorized expenditures

Section 74 (4) of the PFMA (2012) states inter alia that: "*...a public officer or accounting officer engages in improper conduct in relation to a national government entity if the officer—*

(a) contravenes or fails to comply with this Act, including their accounting responsibilities;

(b) undermines any financial management procedures or controls that apply to the entity;

(c) makes or permits expenditure that is unlawful or has not been authorized by the entity; or

*(d) fails, without reasonable excuse, **to pay eligible and approved bills promptly in circumstances where funds are provided for**.*"

Sanctions for breach of law

Implementation of activities by Accounting Officers without approved budgets and or failing to pay for legally incurred expenditures is responsible for continued accumulation of pending bills and constitutes an offence under section 74 of the PFMA (2012). Accounting Officers therefore bear the ultimate responsibility in ensuring that all activities undertaken by their entities are in strict compliance with the law failing which disciplinary measures will be taken as provided for in the Constitution, Public Officers Ethics Ac, 2003, Public Service Codes or any other relevant law.

Clearance of Pending Bills

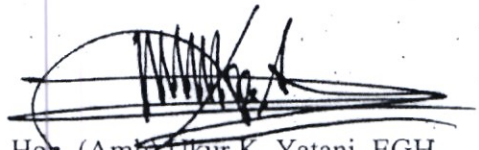
In view of the foregoing and in order to ensure prompt clearance of pending bills, State Corporations are required to: -

i. Settle by **30th June, 2020**
   - All unremitted SACCO staff and loan deductions
   - All statutory deductions (PAYE, NSSF, NHIF and Pension Arrears)

ii. Ensure payment of pending bills are treated as a ***first charge*** on their 2020/21 FY approved budgets. State Corporations with pending bills are required to rationalize their budget for 2020/21 FY to ensure that eligible pending bills are incorporated in the budget before the same is approved by the National Treasury.

iii. Separate disputed pending bills from eligible pending bills and prepare a plan for resolving them.

Soft copies of reports/correspondence on pending bills should be emailed to: dgipependingbills@treasury.go.ke



Hon. (Amb) Ukur K. Yatani, EGH
Cabinet Secretary/The National Treasury and Planning

ANNEX 3

Overdraft Facility

The overdraft facility is a temporary source of funds primarily used to finance the shortfall in payments of domestic debt instruments such as matured Treasury Bills. The government overdraft is managed by the Central Bank of Kenya (CBK), and it is restricted to a maximum of 5 per cent of the most recently audited revenues. According to Section 15 (3) of the PFM Act, it must be paid off by the end of the financial year.

For the financial year 2023/24, the overdraft limit is set at Kshs.97.05 billion and is charged at the prevailing CBK rate on the amount outstanding at the end of each month. During the first six months of FY 2023/24, the CBK rate was 10.5 per cent.

During the first six months of FY 2023/24, the total charge on the overdraft facility amounted to Kshs.4.21 billion, which is an increase of 105.8 per cent compared to the overdraft facility charges of Kshs.2.04 billion during a similar period in FY 2022/23. This increase is due to the gradual change in the CBK rate from 8.75 per cent to 10.5 per cent from 1st July to 30th November and 12.5 per cent in December 2023 respectively. Further, the overdraft limit increased from Kshs.80.05 billion in FY 2022/23 to Kshs.97.05 billion in FY 2023/24. This was after the revision of the Government advances facility as per Section 46(3) of the Central Bank of Kenya Act 2015 CAP 491, which is 5 per cent of Kshs.1.94 trillion audited gross ordinary revenue as of 30th June 2023, excluding domestic borrowing, external loans, and external grants. Table 1 below shows the charges on overdraft facility by month in the first six months of FY 2023/24.

Table 1: Charges on Overdraft Facility by Month

Month	First Six Months FY 2023/24, (Kshs.)	First Six Months FY 2022/23, (Kshs.)	Variance in Per Cent

Exchange Rate Fluctuations.

External debt payments involve a demand for foreign currency, and if the debt is beyond the country's production capacity, it may lead to inflation. The foreign public debt is positively related to the foreign exchange rate in Kenya. Therefore, the Government must model the fiscal deficit's funding by using a healthy foreign debt that does not adversely affect its foreign exchange rate. Kenya has experienced several economic and social shocks. Among them, the Covid-19 pandemic, and a ravaging and devastating drought that has led to the loss of lives and livelihoods. All these shocks have led to the country's GDP falling and consequently negatively affecting our balance of payments, with imports exceeding exports.

When we import more, there is an outflow of forex in the country, as has been the case, leading to the Kenyan currency depreciating against other currencies and further leading to the growth in the country's external debt. In the first half of FY2023/24 and January 2024, the Controller of Budget approved Kshs **8.26 Billion** to cover shortfalls in external debt payments due to foreign exchange fluctuations. The details are shown in table 2 below

Table 2: Foreign exchange shortfalls FY 2023/24

	Month F/Y 2023-24	Amount (Kshs)
1.	July	1,753,890,072.60
2.	August	1,114,053612.12
3.	September	587,613,101.05

NAIROBI

Dear Mr. Njoroge

CENTRAL BANK OF KENYA SUBMISSION TO THE NATIONAL ASSEMBLY PUBLIC DEBT AND PRIVATIZATION COMMITTEE ON THE MEDIUM-TERM DEBT MANAGEMENT STRATEGY FOR FY 2024/25

Thank you for your letter, ref: NA/PBO/ PD&PC/ 2024 (003), of February 15, 2024, inviting the Central Bank of Kenya (CBK) to meet the *National Assembly Public Debt and Privatization Committee* to deliberate on the **Medium-Term Debt Management Strategy (MTDS) for FY 2024/25.**

As requested in your letter, find attached a report on the MTDS and a copy of my presentation to the Committee.

We welcome the opportunity to support the National Assembly in discharging its mandate.

Sincerely,

Dr. Kamau Thugge, CBS

Attachments (2)

CENTRAL BANK OF KENYA REPORT ON THE MEDIUM-TERM DEBT MANAGEMENT STRATEGY (MTDS) FOR THE FY 2024/25

A. Introduction

The MTDS is prepared as per the requirements of Section 33(2) of the Public Finance Management Act, 2012. The MTDS outlines the strategies and initiatives to be implemented, with the aim of reducing costs and risks of public debt. The objectives of the 2024 MTDS are similar to those in the 2023 strategy as they are based on the requirements of the PFM Act, 2012. The objectives of the MTDS are to:

i. Minimize the costs and risks of public debt management and borrowing over the long-term.
ii. Promote development of the domestic debt market; and
iii. Promote sharing of the benefits and costs of public debt between the current and future generations.

B. Comparison of the 2023 and 2024 MTDS

As already indicated, the objectives of the 2024 MTDS are similar to those of the 2023 strategy. The 2024 MTDS prioritizes concessional external borrowing while medium to long term Treasury bonds are the main instruments for domestic financing. The main difference in the two strategy documents is in the financing mix. The 2024 MTDS targets increased financing of the deficit from external sources with a financing mix of 55 percent from external sources and 45 per cent from domestic market compared to a balanced financing mix of 50:50 in the 2023 MTDS. In terms of gross financing needs, the 2024 MTDS assumes a ratio of 63:37 percent from domestic and external sources compared to 65:35 percent in the 2023 MTDS.

C. Assessment of Performance of the Previous MTDS

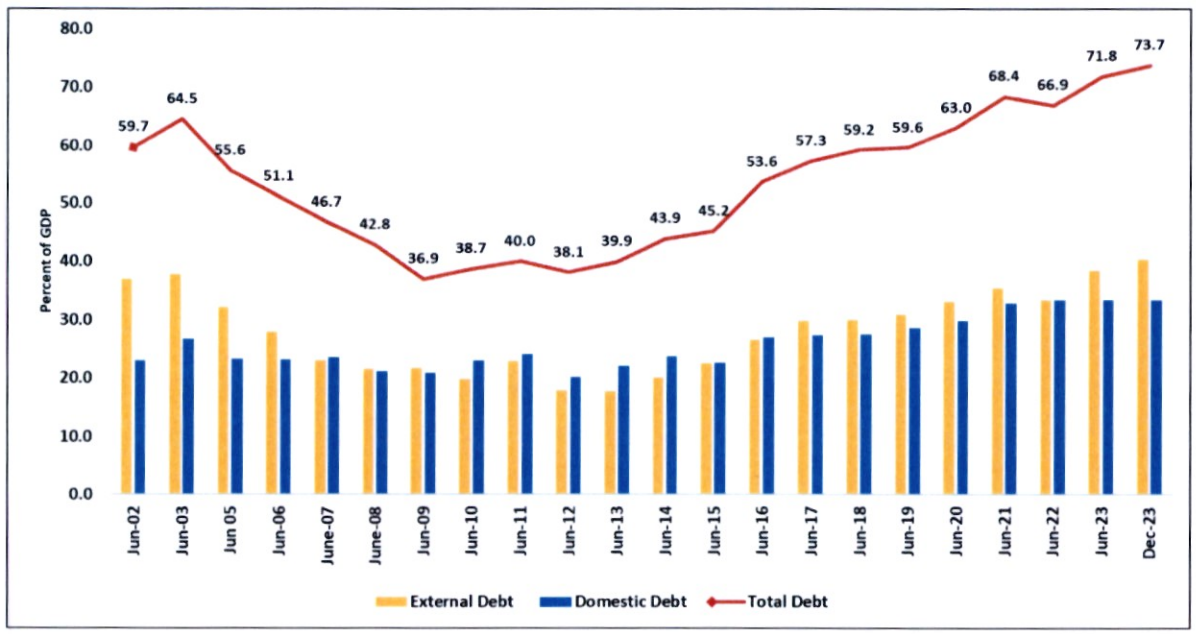
Assessment of the implementation of the 2022 MTDS, which guided borrowing in the FY 2022/23, shows realization of 22:78 percent external to domestic financing of the gross financing needs compared to the projected 25:75 percent. This was on account of unfavourable global market conditions. The review also shows deterioration of costs and risks characteristics of the public debt portfolio. The Strategy aimed at lowering the debt service cost and minimizing the refinancing risk. However, there was an increase in both the debt service cost and the refinancing risk due to appreciation of major currencies against the Kenya shilling and elevated interest rates in the domestic market. Investors' preference for shorter dated instruments also contributed to the decline in the Average Time to Maturity (ATM).

C2: CBK - Official

D. Evolution of Public Debt and Key MTDS Assumptions

Kenya's public debt as a share of GDP has been rising steadily since 2008 to an estimated 73.3 percent by end-December 2023 (**figure 1**). While public debt is considered sustainable, the Debt Sustainability Analysis (DSA) conducted in December 2023 placed Kenya at a high risk of debt distress calling for appropriate measures to be put in place to reduce debt vulnerabilities. In particular, the DSA showed increased vulnerability of Kenya's public debt to exports and financing risks.

Figure 1: Evolution of Public Debt



Source: National Treasury, 2024 MTDS

The key macroeconomic assumptions underpinning the 2024 MTDS are based on a stable and robust real GDP growth supported by implementation of priority programmes outlined in the Bottom-Up Economic and Transformational Agenda (BETA), improving fiscal position and a stable macroeconomic environment. These are largely aligned to the government's policy objectives stipulated in the 2024 Budget Policy Statement and CBK's view on macroeconomic outlook (**Table 1**).

C2: CBK - Official

Table 1: Macroeconomic Assumptions Underpinning the MTDS 2024

	Unit	2021/22	2022/23	2023/24	2024/25	2025/26	2026/27
		Pre-Act.	Projection				
Real GDP	Percent	6.2	5.2	5.5	5.5	5.5	5.5

E. Alternative Financing Strategies and Expected Outcomes

The 2024 MTDS considered four deficit financing strategies with varying financing mix from domestic and external sources (**Table 2**). The most preferred strategy (S4) minimizes costs and risks through increased concessional borrowing and a gradual reduction of Treasury bills stock with domestic financing mainly coming from medium to long-term Treasury bonds. In terms of net financing, the option assumes 45 percent domestic and 55 percent external borrowing.

Table 2: Alternative Financing Strategies for Budget Deficit & Gross Financing Needs (%)

	S1	S2	S3	S4 (preferred strategy)
Net Financing				
Domestic	60	63	50	45
External	40	37	50	55
Gross financing needs				
Domestic	72	70	65	63
External	28	30	35	37

The projected budget deficit for FY 2024/25 is KSh 703.9 billion and the required borrowing in alternative financing strategies are shown in **figure 2**. Under the most preferred strategy, the budget deficit will be financed through net domestic financing of KSh 316.8 billion (45 percent) and net foreign financing of KSh 387.1 billion (55 percent). The preferred financing strategy is feasible given that the actual domestic borrowing in the last four years averaged

C2: CBK - Official

Ksh 462.3 billion (**figure 3**). However, there are significant differences between projected financing of budget deficit articulated in the 2024 Budget Policy Statement and the preferred strategy in the MTDS. Whereas the MTDS is more skewed towards foreign financing of the budget deficit, the BPS relies more on the domestic financing (**Table 3**).

Figure 2: Financing of Projected Deficit under the Preferred Strategy

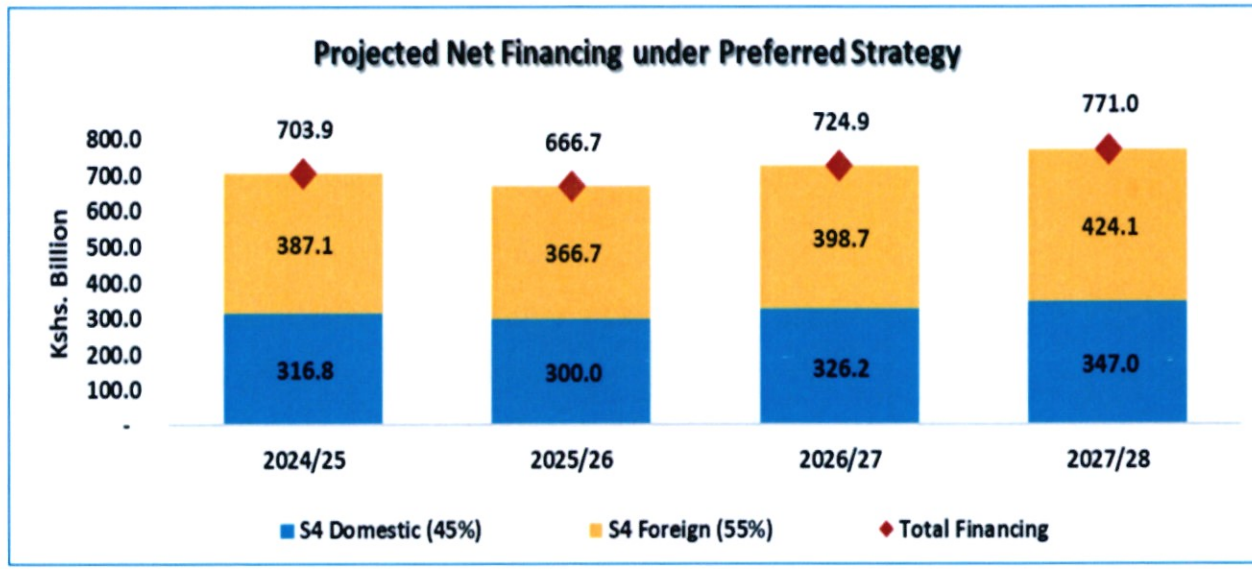

Figure 3: Actual Financing Outcomes, FY 2018/19 to FY 2022/23(KSh billion)

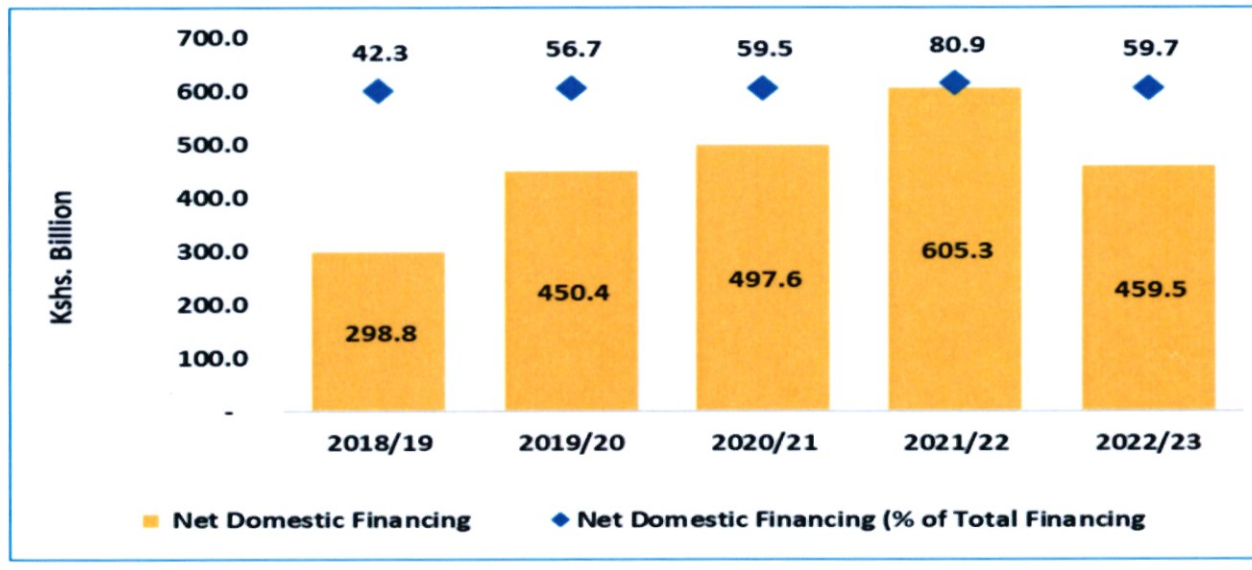

C2: CBK - Official

Table 3: Net Domestic Financing Projections in BPS compared to 2024 MTDS

	2018/19	2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26	2026/27
			Actual			Sup 1		projections	
Net Domestic Financing (NDF)	**298.8**	**450.4**	**497.6**	**605.3**	**459.5**	**474.5**	**377.7**	**563.0**	**494.1**
o/w govt securities	308.8	409.4	556.3	588.4	436.4	471.4			
NDF-prefered strategy							316.8	300.0	326.2
% of Total Financing (net)									
Net Domestic Financing	42.3	56.7	59.5	80.9	59.7	53.5	53.7	84.4	68.2
Preferred alloc. 2024 MTDS							45.0	45.0	45.0
Deviation from preferred strategy (BPS -MTDS) (%)							**8.7**	**39.4**	**23.2**
Memo:									
Total Financing	706.7	793.8	836.5	747.8	770.3	886.6	703.9	666.7	724.9
Net Foreign Financing	405.0	340.8	338.9	142.5	310.8	412.1	326.2	103.7	230.8

The most preferred financing strategy compared to alternative strategies gives improved expected outcomes in terms of cost and risk of debt, reduced refinancing risks and longer time to maturity (**Tables 4 and 5**). It is expected that the refinancing risk, interest rate risk and foreign exchange risks will reduce by the end of 2027 as shown in Tables 4 and 5.

Table 4: Expected Outcomes of the Preferred Strategy

Risk Indicators		2023	As at end 2027

	Debt maturing in 1yr (% of GDP)	10	8.3	7.7	8.2	7.6
	ATM External Portfolio (years)	9.3	10.2	9.5	9.5	10.6
	ATM Domestic Portfolio (years)	7.5	6.9	7.4	7	7.1
	ATM Total Portfolio (years)	8.5	8.6	8.5	8.4	9
Interest rate r	ATR (years)	7.7	8.1	7.9	7.7	8.5
	Debt re-fixing in 1yr (percent of tota	26.7	22.3	24.1	26.5	22.1
	Fixed rate debt including T-bills (per	84.5	88.4	85.5	83.7	87.6
	T-bills (percent of total)	5.5	4.1	3.7	4.1	3.7
FX risk	FX debt as % of total	51.5	49.2	49.8	53.2	54
	ST FX debt as % of reserves	55.1	33.2	33	35.1	32.6

Consequently, public debt as a percent of GDP is expected to decline gradually to sustainable levels as the government pursues fiscal consolidation plan (**Table 5).** In addition, there will be notable improvement in the borrowing terms reflecting Government strategy to maximize concessional and semi-concessional loans from multilateral and bilateral sources.

F. CBK's Contributions to Domestic Debt Market Development

The CBK is committed to continue implementing and supporting reforms aimed at further deepening domestic debt market to reduce cost of debt and improve market liquidity. Some of the major initiatives and reforms include:

i. **Modernization of market infrastructure:** The government successfully implemented the DhowCSD (DhowCSD) is expected to enhance efficiency of domestic debt operations, improve market liquidity, promote capital market growth, broadening investor base and position Kenya as the preferred financial hub in the region.

C2: CBK - Official

ii. **Automation of access to government securities:** CBK rolled out TMD in February 2020, a digital channel for retail investors to access government securities through mobile phones, and Internet Banking platform for institutional investors.

iii. **Sustained market engagement and stakeholder collaboration:** CBK has enhanced coordination with the National Treasury on debt and market development initiatives – including debt reprofiling through switch operations, and improved market engagement through the Bond Market Forum, which has been instrumental in developing one of the fastest growing bond markets in Africa.

G. Conclusion

The 2024 MTDS objectives are consistent with the key priorities of domestic debt management and ongoing fiscal consolidation measures aimed at reducing fiscal deficit and lowering debt costs and risks. CBK welcomes the Government's plans to diversify investor base and explore new sources of financing such as green and blue bonds. The CBK will continue to deploy measures to develop the domestic debt market including ongoing modernisation of the market infrastructure to diversify investor base and mitigate the exchange rate risk.

The 2024 MTDS notes that the risks posed by inflation induced high interest rates in both domestic and international markets may pose a challenge to government's financing of the FY2024/25 Budget and performing liability management operations on its debt portfolio as well as increasing its debt service costs. However, it should be noted that the issue of liability management operation relating to the 2024 Eurobond has now been addressed conclusively following the recent issuance of a Eurobond of US$ 1.5 billion.

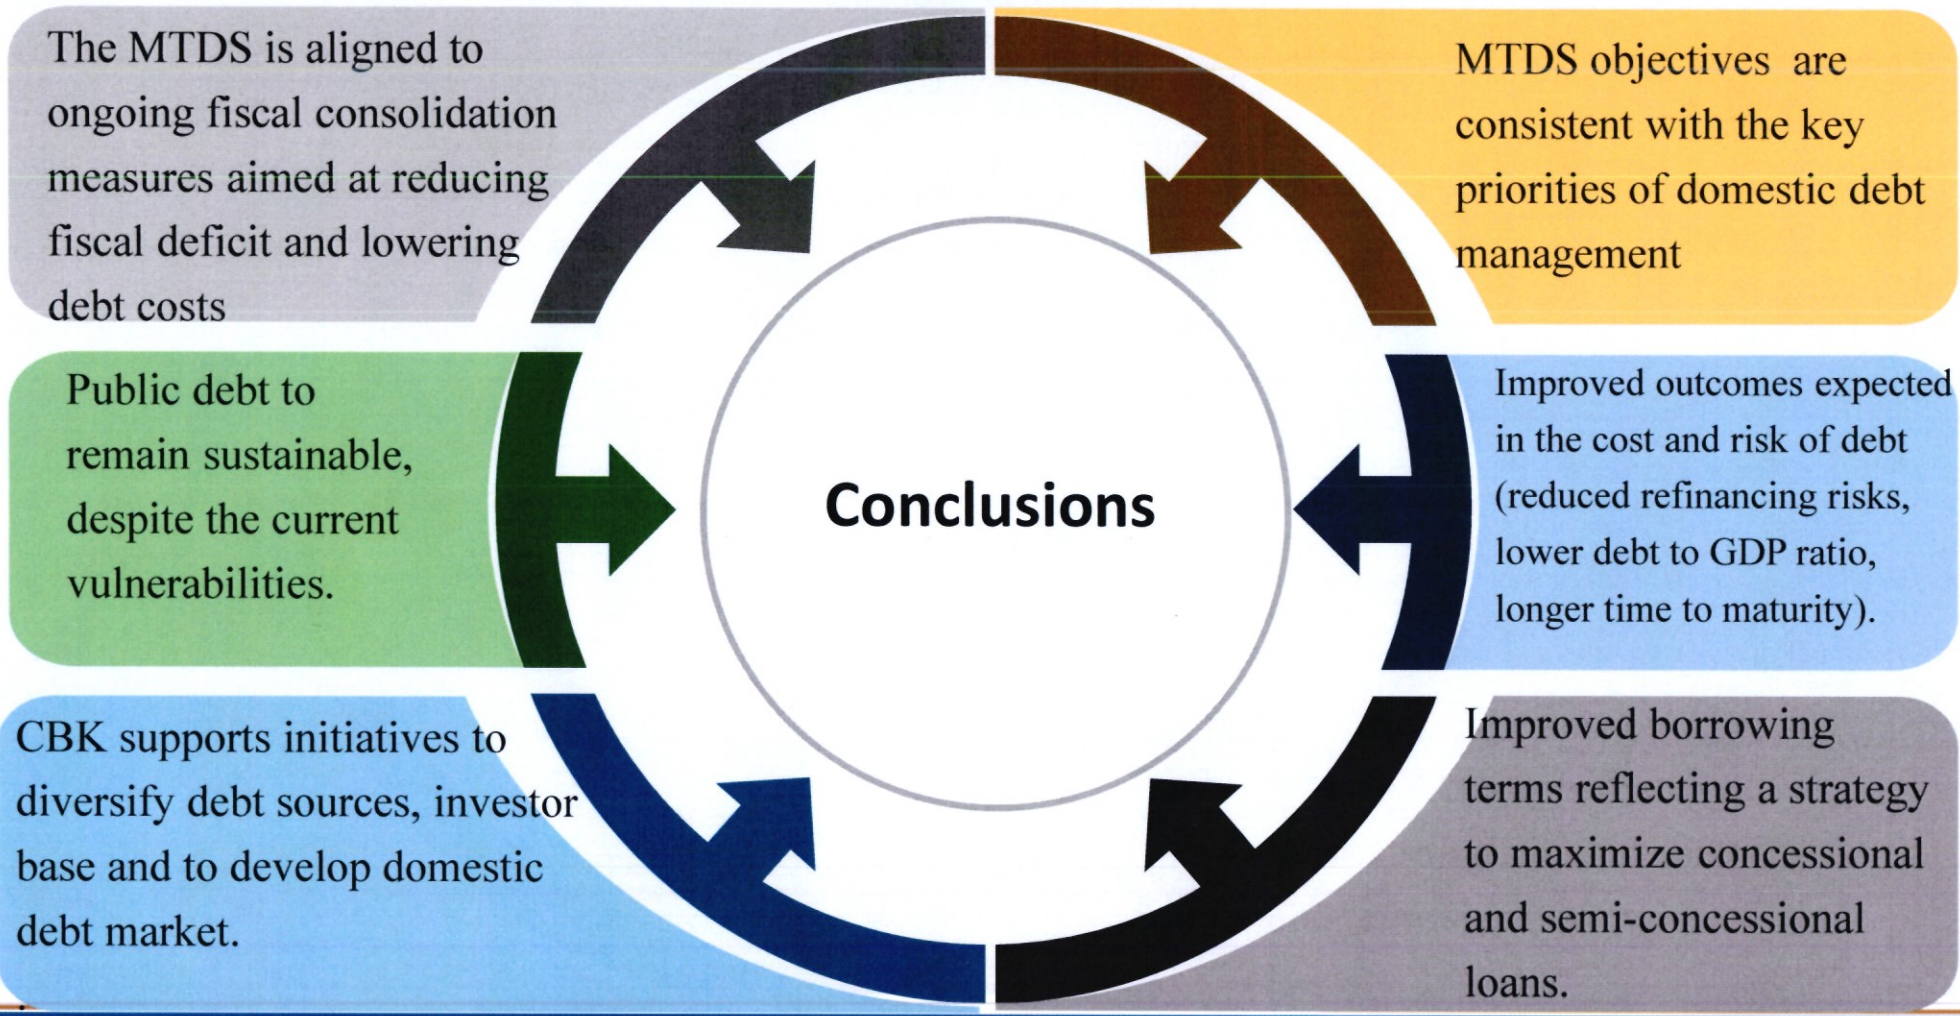
Assessment of MTDS: Domestic debt metrics consistent with priorities

Main Domestic Debt Indicators					
	Metric	**Oct 2022**	**Oct 2023**	**Change (%)**	**Supported by**
1	Average Time to Maturity of bonds (years)	8.9	8.3	-0.6	issuance mainly on short to medium term bonds with bond maturities well spread and extending up to 2047.
2	Improved T-bill-bond ratio	15:85	12:88	-	
3	Stable yield curve: average portfolio coupon rate (%)	13.4	16.4	+3.0	• Issuance of different bond maturity blends • Consistent demand for long-term bonds by non-bank institutional investors. • Enhanced auction transparency. • Constructive market engagements.
4	T-bond stock (Kes bn)	3,634.9	4,149.8	+14.16%	
5	T-bill stock (Kes bn)	672.3	558.2	-16. 93%	

Thank You!

11. Conclusions



C2: CBK - Official

10. CBK's Contributions to Domestic Debt Market Development

Modernization of market infrastructure

The Dhow CSD system to:

- Enhance efficiency of domestic debt operations,
- Improve market liquidity,
- Promote capital market growth & position Kenya as the preferred financial hub in the region.

Automation of access to government securities

- Rolled out TMD in February 2020, a digital channel for retail investors to access government securities through mobile phones.
- Internet Banking (IB) – platform for institutional investors.

Sustained market engagement and stakeholder collaboration

- Enhanced coordination with the National Treasury on debt and market development initiatives – including debt reprofiling through switch operations.
- Market engagement through the Bond Market Forum (BMF) - initiative started back in 2001, has been instrumental in developing one of the fastest growing bond markets in Africa.

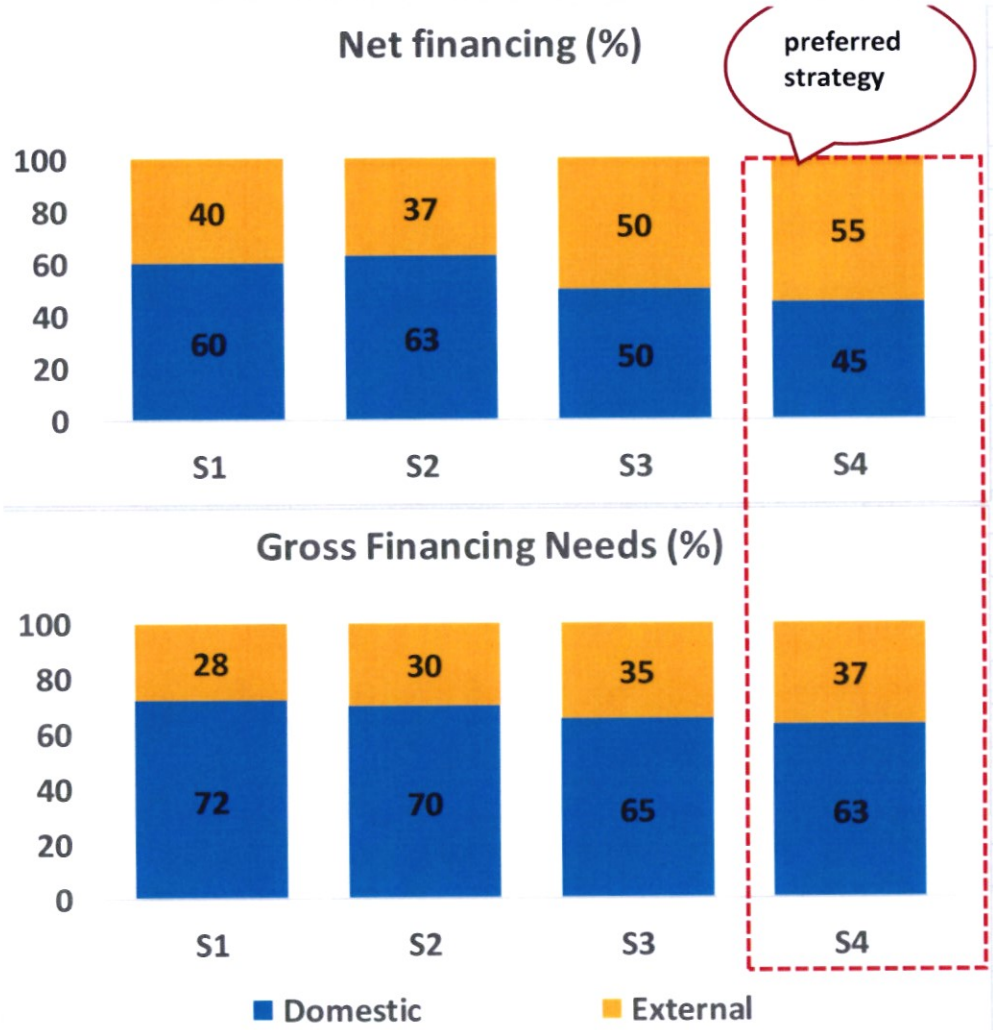
6. Alternative Financing Strategies Assessed



- Preferred Strategy (S4) maximizes on external concessional borrowing and reducing refinancing risk. Financing of deficit is 45:55 percent from domestic and external sources.
- Maximizes concessional borrowing; but rollover commercial debt.
- Medium to long term T-bonds main source of financing from domestic market.
- In terms of gross financing needs, 63:37 percent from domestic and external sources.

C2: CBK - Official

5. MTDS 2024 considered four alternative strategies…

- **Strategy 1 (S1) – Maintaining the stock of TBills and increasing concessional borrowing:** This strategy assumes a net borrowing of **60% from domestic and 40% from external sources**. Domestic borrowing -TBonds & External through concessional debt with minimising commercial borrowing.

- **Strategy 2 (S2) – Increased External Commercial Borrowing and Reduction of Tbills Stock:** The strategy assumes net financing majorly from external commercial, semi-concessional and concessional debt of **63%** external and **37%** with domestic mainly from TBonds.

- **Strategy 3 (S3) – Maintaining the Stock of TBills and Increasing External Commercial Borrowing:** The strategy envisages **50% each from net domestic and net external borrowing**. The strategy aims at maintaining the stock of TBills and issuing medium to long-term TBonds while maximizing on external commercial borrowing.

- **Strategy 4 (S4) – Maximizing on External Concessional Borrowing and Reducing Refinancing Risk:**. The strategy assumes **45% domestic, and 55% external borrowing** . The strategy seeks to achieve gradual reduction of TBills stock with domestic financing mainly sourced from medium to long-term TBonds.

C2: CBK - Official

4. Macroeconomic Assumptions for MTDS 2024 look reasonable

	Unit	2021/22	2022/23	2023/24	2024/25	2025/26	2026/27
		Pre-Act.	Projection				
Real GDP	Percent	6.2	5.2	5.5	5.5	5.5	5.5
GDP Deflator	Percent	5.2	6.6	6.7	5.5	5.7	5.7
Inflation	Percent	6.9	7.7	6.3	5	5	5
Revenue	Percent of GDP	17.3	16.5	19	19.1	19.2	19.7
Expenditure	Percent of GDP	23.8	22.6	24.2	23.2	22.8	23.3
Overall Fiscal Balance	Percent of GDP	-6.3	-5.6	-4.9	-3.9	-3.3	-3.3
Primary Budget Balance	Percent of GDP	-1.6	-0.8	0.7	1.7	1.8	1.5
Revenue	Ksh. Billion	2,200	2,361	3,071	3,435	3,833	4,377
Expenditure	Ksh. Billion	3,028	3,221	3,903	4,188	4,553	5,170
Overall Fiscal Balance	Ksh. Billion	-747.8	-770.3	-785	-703.9	-666.7	-724.9

In the medium term, the MTDS assumes:

- stable and robust real GDP growth supported by implementation of priority programmes outlined in BETA
- improving fiscal position
- a stable macroeconomic environment

RE: MEMORANDUM ON THE 2024 MEDIUM TERM DEBT STRATEGY

The Institute of Public Finance (IPF) is an independent non-profit think tank that furthers the principles of public finance management through generation of Credible Evidence, Advocacy and Technical Assistance.

IPF lauds the Public Debt and Privatization Committee of the National Assembly for creating a window for public participation on the 2024 Medium Term Debt Management Strategy (MTDS). This aligns with the spirit and intention of the Constitution of Kenya 2010 to uphold participation in public finance management, as well as enables Parliament to leverage on insights from stakeholders such as IPF to inform the 2024 MTDS. Ultimately, this enhances transparency, accountability, effectiveness, and efficiency in the utilization of public resources.

Our submission focuses on the following areas:

1. Increased Oversight on Public Private Partnerships

The MTDS notes contingent liabilities from Public Private Partnerships as a major risk to the assumptions of the 2024 Budget Policy Statement and notes the need for continuous monitoring of risk exposures (pg. 33).

To promote debt transparency and accountability, and manage fiscal risks;

IPF proposes inclusion of a breakdown of all existing and proposed Public Private Partnerships (PPPs) in the MTDS falling due in the strategy period. This breakdown should also include contingent liabilities posed by these PPPs.

IPF
INSTITUTE OF PUBLIC FINANCE

Suite 8, 4th Floor-Rosami Court,
Muringa Road,
P.O. Box 21753-00100, Nairobi Kenya
Tel: +254 758 728 882
Email:info@ipfglobal.or.ke | www.ipfglobal.or.ke

We further recommend robust oversight by the committee on the PPPs to ensure there is value for money for Kenyans.

2. Exposure of External debt portfolio to foreign exchange risks

We laud the MTDS for carrying out cost-risk analysis and for providing alternative borrowing scenarios that include percentages to be maintained for bi-lateral, multi-lateral and commercial loans (pg.26 & 27).

To minimize the cost of external debt and exposure to foreign exchange risks;

IPF recommends a scenario analysis for the various strategies be deepened to include currency composition to guide an optimal debt structure for foreign currency denominated debt. This would help in maintaining a portfolio that is not excessively vulnerable to fluctuations of the dollar.

3. Average time to debt maturity

Market conditions have not been favorable in the recent years while creditors preference has greatly shifted to short-term debt instruments. The MTDS optimal strategy seeks to minimize refinancing risk by lengthening the total portfolio Average Time to Maturity (ATM) through issuance of medium to long-term bonds and concessional loans with longer maturities.

IPF recommends that new debt contracted for FY2024/25 and the medium term be pegged on a longer maturity period. The MTDS should strive to attain the pre-covid repayment periods, which according to the Annual Debt Management Report for FY2021/22, averaged 9 years for domestic and 10 years for external debt. (see table 1 below).

	2017	**2018**	**2019**	**2020**	**2022**	**2023**	**Medium term (IPF proposition)**
	ATM (Yrs)	ATM (Yrs)	ATM (Yrs)	ATM (Yrs)	ATM (Yrs)	ATM (Yrs)	ATM (Yrs)
Domestic	8	7	9	11	7.8	7.5	9
External	11	10	11	9	9.8	9.3	10
Average	9.5	8.5	10	10	8.8	8.5	9.5

4. Lack of Comprehensive Information on State Owned Enterprises Loan Guarantees

There is progressive improvement in debt reporting with the 2024 MTDS including loan guarantees for three State Owned Enterprises namely Kenya Airways, Kenya Ports Authority and Kenya Power and Lighting Company (pg. 5 of MTDS).

In the spirit of Sec 58 of the PFM Act 2012[1] and to enable Parliament to decide whether or not to approve draft loan guarantee documents,

IPF recommends that the reported guarantees should also include the duration of the guarantee, nature of the guarantee, and a risk assessment.

5. Borrowing ratios

MTDS is a framework that recommends an optimal funding strategy for a given period. In order for the government to achieve fiscal targets, the BPS and Annual Borrowing Plans need to be aligned to the MTDS. Based on Table 2 & 3 that follow, we have noted that over the medium term

[1] PFM Act, 2012. Link

the best scenario (S4) proposed by the MTDS differs from the domestic to external debt ratios reflected in the BPS over the medium term.

IPF recommends that the Public Debt and Privatization and the Budget and Appropriations Committees engage the National Treasury for harmonization of the medium-term ratios.

Table 2: Borrowing Ratios

Domestic debt (% of total debt)	51%	50%	47%	46%

Source: 2024 MTDS (Table 16, pg.27)

6. Transparency and Accountability of the Annual Borrowing Plan

As prescribed under Section 63 (d) of the PFM Act, 2012, and Section 186 of PFM (National Government) Regulations, 2015, the MTDS requires the Public Debt Management Office (PDMO) to prepare domestic and external borrowing plans. The MTDS further requires these plans to indicate the expected disbursements by creditor, the disbursement period and currency of disbursement. However, there is no requirement to provide information as to the purpose of borrowing, more so for the short-term debts. Additionally, the MTDS requires that the debt management reports be prepared and published regularly, but there has been notable delays and failure to publish these reports. For example, the Annual Borrowing Plan for FY 2023/24 has not

IPF
INSTITUTE OF PUBLIC FINANCE

Suite 8, 4th Floor-Rosami Court,
Muringa Road,
P.O. Box 21753-00100, Nairobi Kenya
Tel: +254 758 728 882
Email:info@ipfglobal.or.ke | www.ipfglobal.or.ke

been published to date. Whereas the MTDS has defined the scope of the borrowing plans as per the legislation, it would be progressive to provide detailed information to enhance accountability.

IPF recommends the MTDS include a requirement that the annual borrowing plans indicate the investment to be funded by the borrowed funds. Specifically, any infrastructure bond procured should be able to identify infrastructure to be funded by the proceeds.

IPF **further recommends** that the MTDS should provide timelines within which the annual borrowing plans, and the debt management reports (monthly and annual) should be produced and published.

7. Debt swaps

The 2024 MTDS proposes debt for nature swaps and food security swaps to fund budget deficit for the FY2024/25. While these swaps have been successful in other countries, it is not a bullet solution.

IPF recommends that full disclosure of this type of financing is made including but not limited to community displacements and risks associated with them.

8. Debt period provided in the MTDS

We note that the cut-off period for public debt data analyzed in the 2024 MTDS is June 2023.

IPF recommends the Committee to require the NT to provide updated records up to December 2023 on public debt contracted.

9. Alternative Sources of Funding

The MTDS provides that the PDMO will explore alternative funding sources including issuance of a Kenya Shilling syndicated debt; foreign currency denominated domestic bond, and private placement for both local and external markets (pg 21).

IPF
INSTITUTE OF PUBLIC FINANCE

Suite 8, 4th Floor-Rosami Court,
Muringa Road,
P.O. Box 21753-00100, Nairobi Kenya
Tel: +254 758 728 882
Email:info@ipfglobal.or.ke | www.ipfglobal.or.ke

IPF recommends:

- That caution is employed on the domestic issuance of the US$ denominated bond, as this could potentially amplify the country's foreign exchange pressures since potential investors will be chasing dollars to enable them to participate in the bond.
- As an alternative to the above, the government need to finalize the issuance of a diaspora bond targeting mobilizing dollars from Kenyans who are abroad.
- Further, we recommend that the government pursues a Kenya shilling syndicated debt, specifically targeting pension funds who are holding more than Kes 1.7 trillion worth of assets and management, the bulk of which are locked in government securities.

10. Deepening financial inclusion in government securities

The new Central Securities Depository System called DhowCSD went live on July 31st, 2023. It sets the foundation for the separation of the retail and wholesale market. It is intended to facilitate the retail investors to directly access government securities market, including buying and selling Treasury Bills and bonds online (pg 21).

Based on the experience with the attempt to democratise access to fixed income instruments through MAkiba, **IPF recommends** that the Committee engage the National Treasury and the Central Bank to undertake nation-wide civic education on investing in government securities and the current set up be revised to allow for lower denomination investments.

IPF is available for further clarification and discussions on this submission at your convenience.

Sincerely,

James Muraguri
CHIEF EXECUTIVE OFFICER
INSTITUTE OF PUBLIC FINANCE

Memorandum to the National Assembly Public Debt and Privatization Committee on the 2024 Medium Term Debt Strategy Paper

Introduction

The International Budget Partnership Kenya (IBP Kenya) is a Kenyan non-profit organization working to advance transparency, accountability, participation, and equity in national and county budgeting processes. The International Budget Partnership Kenya's (IBP Kenya) work is focused on strengthening the impact of civil society advocacy and citizens on budget policies and outcomes at both levels of governance in Kenya. Through deep and sustained engagement, the IBP Kenya provides support to build expertise and skills of civil society actors and citizens involved in budget advocacy. Citizen advocacy, generation of evidence, technical assistance, learning, and networking are all integral components of IBP Kenya's work.

Article 20 (5) of the Constitution declares that it is the duty of the State to allocate sufficient resources to ensure the achievement of constitutional rights. The achievement of these rights and rising service delivery demands therefore require governments to constantly devise and take advantage of alternate sources of finance to fund public budgets. Kenya's growing appetite for borrowing as a means to facilitate expenditure has seen Kenya's public debt stock grow from Ksh. 2.45 trillion as of December 2014 to Ksh. 10.58 trillion as of September 2023 – an astonishing 331.8% increase. This significant growth in Kenya's public debt burden over a short period has generated a vicious cycle, necessitating more expenditure on debt servicing and repayment each year. This has and will continue to affect the state's ability to provide basic services over the medium term.

In the current macroeconomic environment, marked by tightening global monetary policy, rapid depreciation of the shilling relative to the dollar and rising domestic interest rates, the balance of public debt as an enabler and obstacle to service delivery remains the central challenge for the Kenyan state. To the extent that the successful management of public debt will realize its promise of enabling efficient the delivery of public services, we present the submissions contained in this memorandum to the committee. They range from a proposal for a debt policy to specifics of the actual debt management.

Detailed Submissions

1. Efficacy of the MTDS

The MTDS is tabled to be analyzed and approved together with the Budget Policy Statement. It therefore presents an opportunity to provide visibility of the state of the debt and access what options exist to manage it. As it is right now, most of the data is as of June 2023 yet there are sufficient details as of December 2023 which is a significant period. Beyond that, it should provide a proactive space of debt management in the

future. It should also be an opportunity for robust public discourse on deficit financing. Its short-term nature means that there is no much consideration of the long term effects of the different options and mix of borrowing. This then means that it's difficult to tell what different options would mean in the long run.

Recommendation: Consider developing a public debt policy on which the MTDS is anchored. This would consider the developmental needs of the country and set a direction of how the country would handle both public and publicly guaranteed debt.

2. **Deviation between the proposed debt mix in the BPS and the proposed mix in the MTDS.**

Of concern is that, in contrast to the 45:55 domestic to external debt mix proposed in the MTDS, the BPS proposes a domestic to external financing mix of 54:46 (see Table 1 & Figure 1). In principle, the MTDS should set out the national government borrowing stance over the coming financial year in a bid to sustainability facilitate the deficit proposed in the BPS each year. This is a significant difference given that an emphasis on either option presents certain gains and risks that are well outlined in the MTDS. While both options are affected by significant decrease in the maturity ages of the debts, the domestic borrowing has a greater interest risk (see figure 2) while the external has greater forex exchange risk. Overall, the proposed BPS 2024 mix may be more costly in the medium term due to the high interest rate on domestic borrowing and the low interest rate on external borrowing.

Table 1: Deviations of proposals between the MTDS and BPS

Budget Documents	Debt Mix Deviations	
	Internal Financing	External Financing
Medium-Term Debt Strategy Paper (MTDS)	45	55
Budget Policy Statement (BPS)	53.66	46.32

Source: MTDS and BPS 2024

Figure 1: Graphic on deviations between proposals in the MTDS and BPS 2024

Source: MTDS and BPS 2024

Figure 2: Weighted Average Domestic and External Interest rates as at end June 2023

Source: *The National Treasury*

Notably, there was a deviation between the borrowing mix the BPS and MTDS of 2023. The MTDS of 2023, proposed 50:50 net external and domestic borrowing mix, while the BPS of 2024 borrowing mix 78:27, domestic to external. In addition, this proposal was later changed by the national government to a greater emphasis on external financing.

iii. *The preferred deficit financing strategy*

97. The optimal deficit financing strategy derived from the results of analysis of various options is 50:50 net external and domestic borrowing mix (option 4) as it leads to the best costs and risks characteristic combination. The strategy recommends suggests allocation of Ksh. 360 billion to both external and domestic sources; use of medium to long term Treasury bonds as domestic financing tool and maximization of external concessional borrowing while commercial debt is rolled over before eventually being minimized. This strategy is positioned for flexibility in financing the deficit from both sources should one source fail, and depending on domestic and global debt markets condition and takes into account the continued tightening of domestic debt market liquidity.

Source: MTDS 2023

Recommendation: We propose that the BPS of 2024 align with the proposed financing strategy in the MTDS to ensure sustainable and optimal borrowing in the coming financial year.

3. Growing Deficits as key drivers of Public Debt Burden

The yearly budget deficit of the national government determines the size of borrowing undertaken each year. Where there are persistent deviations between national government expenditure and revenue collection, the budget deficit that results necessitates growth in borrowing to bridge the resource gap. The BPS 2024 proposes a decrease in the fiscal deficit (excluding grants) of KES -761.1 billion as envisaged at the start of the FY2023/24, to KES -753.2 billion – a 1% decrease in absolute terms. Including grants the deficit is expected to fall from KES -718.9 billion to KES -703.9 billion equivalent to 2% decrease. The intended decrease in the deficit is in line with the national government efforts to narrow the fiscal deficit (including grants) to 3.9% of GDP in FY 2024/25. To the extent that this target deficit will impact of the sustainability of Kenya's public debt, the target is welcome.

However historically, the achievement of this target has been affected by in-year increases in expenditure and under performance of revenue. As shown by the Table 2, Kenya has a historical pattern of in-year fiscal deficit increases. When revenue targets are unmet, and expenditure allocation rise during the year through supplementary budgets, the need to borrow more than planned increases. Without urgent action to align expenditures to available resources, the deficit will continue to grow, increasing the public debt levels.

Given the underperformance in revenue in FY 2023/24, the size of the deficit is likely to increase within the year, which is not encouraging for the fidelity of national government to the proposed deficit in FY2024/25.

There needs to be a commitment by the government to reduce the fiscal deficit as a percentage of GDP in the effort to consolidate the existing fiscal deficits (see figure 3). Failure to do so will perpetuate the current tendency to spend more than available tax revenues worsening the growth in our public debt burden.

Table 2: In-year budget revisions, 2014-2024

Year (Billions)	Proposed Budget Deficit *(incl. grants)* in the BPS (beginning of the year)	Deficit At the end of the Year	Increase in the deficit within the year
2014/15	-367	-732	99%
2015/16	-533.2	-732.6	37%
2016/17	-555.4	-871.6	57%
2017/18	-582.4	-670.4	15%
2018/19	-638.2	-760.6	19%
2019/20	-629.9	-789.9	25%

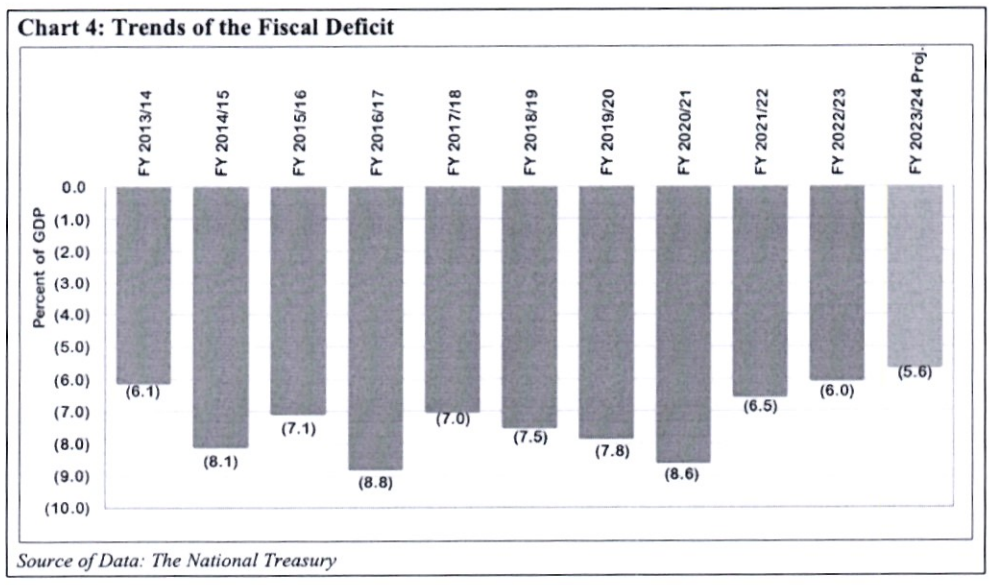
2024/25	-703.9	-	-

*Source: Various National Treasury Publications. *Figure as currently indicated in the BPS 2024*

Figure 3: Trends in Fiscal Deficit



Source of Data: The National Treasury

The significant growth in Kenya's public debt over a short period has generated a vicious cycle, necessitating more expenditure on debt servicing and repayment each year. This has and will continue to affect the national governments ability to disburse fund to county governments over the medium term.

Recommendation: The National Treasury should employ realistic revenue targets and ensure adherence to the proposed fiscal deficit in FY 2024/25. On the expenditure side, options to reduce

increases through supplementary budgets are included in the Office of the Auditor General's Special Audit Report on Supplementary Budgets here . Among these is adherence to Article 223 (5) of the Constitution of Kenya provides that the National Government may not spend more than ten per cent (10%) of the sum appropriated by Parliament for any financial year, unless in special circumstances Parliament has approved a higher percentage.

4. **Kenya's public debt continues to be unsustainable, warranting more prudent borrowing practices over the medium term.**

Kenya's public debt stock stood at KES 11.14 trillion as at the end of December 2023.[1] Of this, domestic and external debt stock accounted for 45.3% and 54.7% respectively. Overtime, Kenya's public debt burden has become increasingly unsustainable shown by its gradually worsening Risk of Debt distress rating. According to the International Monetary Fund, (IMF) debt distress refers to a situation where a country is unable to fulfill its financial obligations and debt restructuring is required.[2] Kenya is currently at a high risk of debt distress, by exceeding 3 of our 4 external debt substitutability indicators as shown in the snippet below.

Table 9: Kenya's debt risk levels and debt carrying capacity

Source: *The National Treasury & IMF country report*

However, the sustainability of public debt is premised on the choices of financing decisions made each year in the BPS and MTDS documents. Recently, Kenya has taken to the commercial markets in order to refinance its 2014 debut sovereign bond due in June of 2024. This includes the issuance of a brand-new

[1] The National Treasury & Economic Planning Monthly Debt Bulletin, December 2023
[2] https://www.imf.org/en/Publications/fandd/issues/2020/09/what-is-debt-sustainability-basics

Eurobond worth $1.5 billion at a 9.85% interest rate – notably higher than the 2014 Eurobond rate of 6.85%, and additional loans form the Trade Development Bank. In addition, the national government has been borrowing on the domestic front at relatively high rates, with the most recent 8.5-year infrastructure bond (IFB1/2024/8.5) earning an interest rate **of 18.46%.** These recent fiscal decisions have two significant impacts:

1. ***Continuing trend of borrowing for refinancing as opposed to development:*** As seen in the case of the Eurobond I, II and now VII, expensive commercial external loans have the additional risk to public services that they are not likely to realize the development of the economy that will in turn ensure their repayment. Often these loans are used as budgetary support to refinance existing loans, as opposed to direct expenditure.
2. ***Increase the cost of public debt over the medium term:*** As much as the impending payment of maturing loans presents a risk to the fiscal outlook, the national government should be careful not to precipitate another financing crisis in the future in order to avoid one in the present FY 2024/25. The use of costly domestic debt and commercial loans creates a vicious cycle of repayments, where more expensive debt is used to service older debt.

The BPS and MTDS of 2024, both show an intended dependence on domestic debt as financing mechanism over the medium term, as shown in the snippets below. Furthermore, the BPS 2024 indicates that the budget deficit for FY 2024/25 will be met through more domestic borrowing, Ksh 377.7 billion (53%), than external financing, Ksh 326.1 billion (46%).

> 78. The PDMO will continue to spearhead key reforms to deepen the domestic debt market and diversify the investor base. To enhance the growth of the non-bank financial institutions such as pension, insurance and mutual funds, the PDMO will consider expanding the volumes and initiate new financial products such as post-retirement medical funds and contributory pension schemes.

Source: MTDS 2024

> 22. Limited access coupled with illiquid international capital market and domestic market may hinder the Government's plan to finance the FY2024/25 Budget. Thus, there is need for adequate prioritizations and rationalization in the budget should resources not be available. In addition, the on-going implementation of reforms in the domestic debt market are expected to support Government against the downside's risks emanating from external debts as it provides an alternative, though costlier funding source.

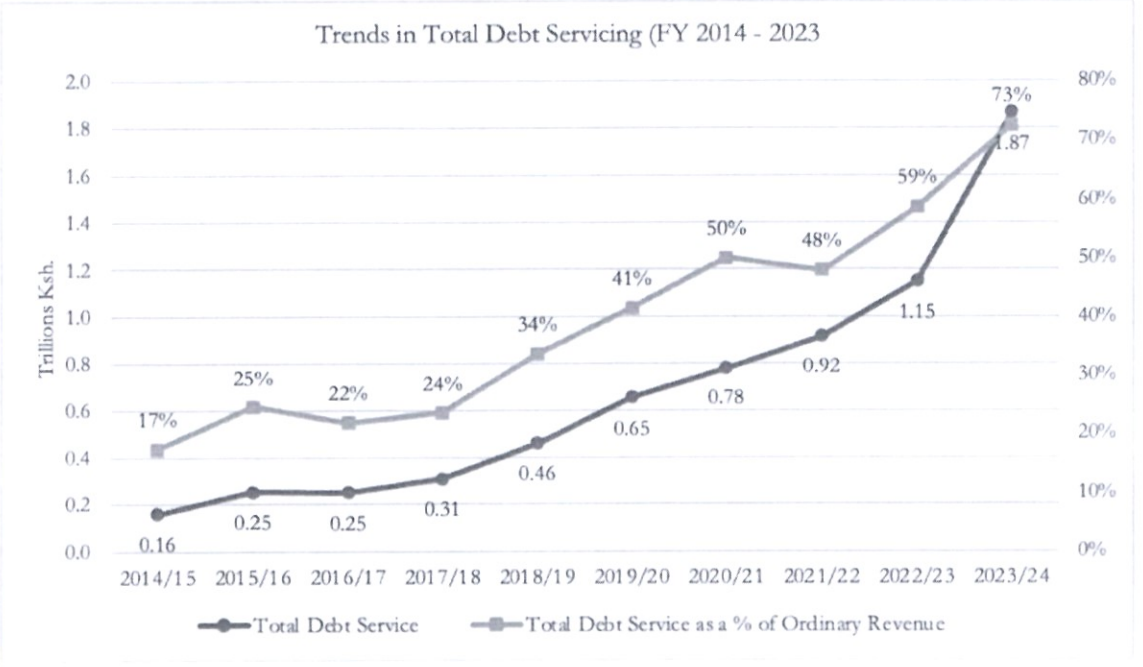
Source: BPS 2024

Recommendation: Beyond fiscal consolidation measures, the national government must seek more affordable borrowing options over the medium term given the projected resource envelope and cost of borrowing. This includes reducing the prominence of commercial and domestic debt in our debt portfolio, exploring alternative sources of financing that are lower cost e.g. Samurai and Panda bonds, and attached to specific development objectives e.g. green and blue bonds.

5. **Expenditure on public debt obligations continues to pose a risk to the timely delivery of public services, demanding restructuring of public debt payments.**

One consequence of Kenya's borrowing decisions in the past has been the astronomical growth in Kenya's

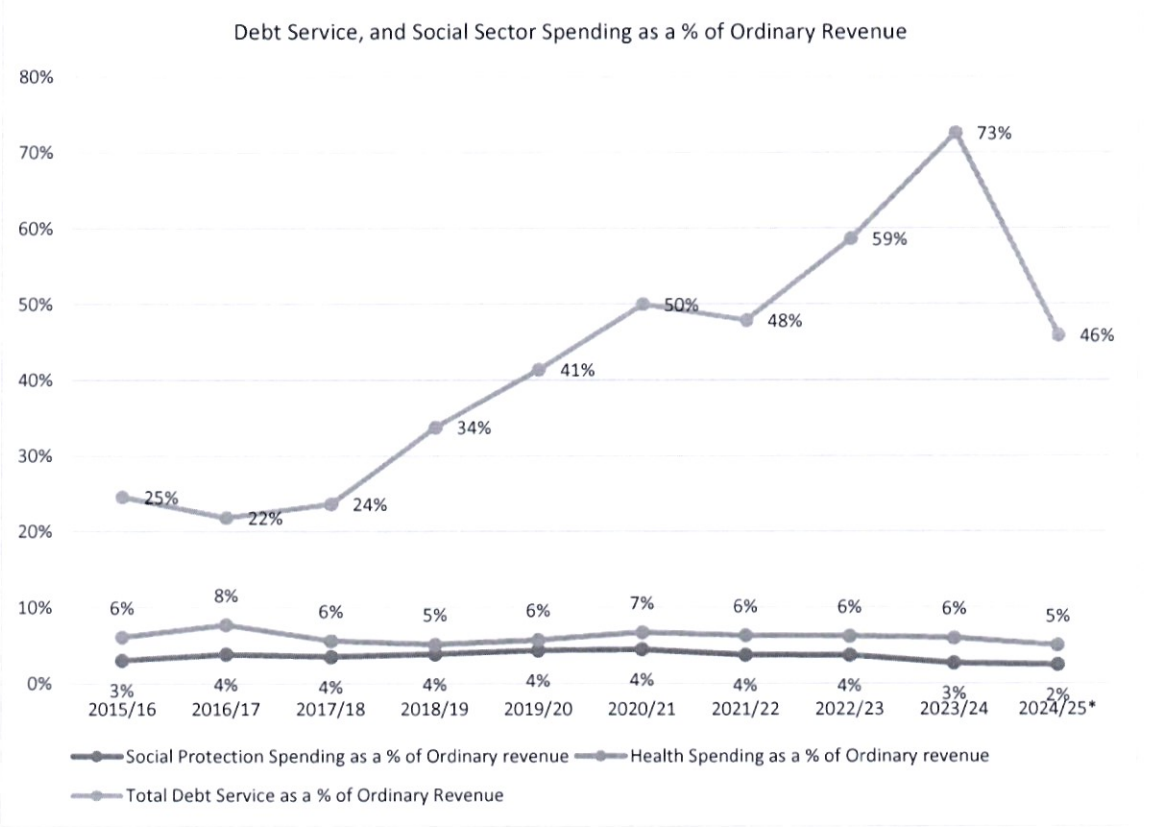
allocation to public debt servicing through the Consolidated Fund Services (CFS). Between FY 2014/15 and FY 2023/24, the amount allocated to debt servicing each year rose by 1068.8% or KES 1.71 trillion. Currently, 73 out of every 100 shillings collected in ordinary revenue will be go towards servicing public debt, leaving little for national and county governments to county governments to deliver services.



The impact of the growing public debt burden can be seen in the expenditure projections contained in the BPS 2024, which shows a rise in the proportion of expenditure on CFS (+2%), and a fall in allocations to the Executive (-1%) and County Governments (-1%).

	Approved 2023/24	%propotion of total expenditure	BPS Projection	%propotion of total expenditure
Executive	2,400,067	60%	2,438,939	59%
Parliament	40,742	1%	41,623	1%
Judiciary	22,784	1%	23,690	1%
National Government Kshs.	**2,464,474**	**62%**	**2,511,464**	**61%**
Consolidated Fund Services	*1,131,650*	*28%*	*1,241,152*	*30%*
County Government	385,425	10%	391,117	9%
Total Government Kshs.	**3,981,549**	**100%**	**4,143,732**	**100%**

Source: BPS 2024



Recommendation: We propose that debt repayments be restructured in the medium term to create less pressure on available tax revenues. It is clear that in the medium term, there will be limited fiscal space if the current CFS spending is sustained. The available windows should be utilized, and the public should be informed of what measures are being taken.

6. There is need for a closer focus on Government Owned Enterprises and Corporations

The MTDS does not dig deeper into the debt portfolio and attendant risks owed by GOEs. This is of concern since a huge portfolio of public and public guaranteed debt is held by these institutions. The reforms envisioned to rationalize the GOEs need to happen immediately to avert deepening of the crisis.

Recommendation: MTDS should present the actual debt portfolio and effect the reforms that are necessary to reduce the risk exposure presented by the GOEs.

Dr. Abraham Rugo Muriu.

Executive Director - International Budget Partnership Kenya.

OFFICE OF THE AUDITOR-GENERAL

Enhancing Accountability

PRESENTATION BY THE AUDITOR-GENERAL TO THE PUBLIC DEBT AND PRIVATIZATION COMMITTEE OF THE NATIONAL ASSEMBLY ON THE 2024 MEDIUM-TERM DEBT MANAGEMENT STRATEGY

20 February 2024

The Chairman, Public Debt and Privatization Committee, Hon. Abdi Omar Shurie, M.P.

Honorable Members of the Committee

A. Introduction

1. The Office of the Auditor-General received your letter Ref: NA/PBO/PD&PC/2024/001 dated 15 February, 2024 inviting the Auditor-General to a meeting to provide insight into the proposed borrowing strategy as well as proposals on reducing the risks and costs of existing stock of debt in line with the Debt Management Objectives.
2. We thank the Committee for giving the Office the opportunity to provide our insight into the proposed borrowing strategy and proposal on reducing the costs and risks in line with the Debt Management Objectives.

B. Mandate of Auditor- General

Honorable Chair

Honorable Members

3. The Office responds to this requirement through Article 229(4) of the Constitution of Kenya, 2010 which mandates the Auditor-General to audit the accounts of the National and County Governments, National Assembly and County Assemblies, all Funds and authorities of National and County Governments, accounts of all Courts, Public debt and all institutions, programmes or projects funded by public funds. Article 229(6) further mandates the Auditor-General to confirm whether or not public money has been applied lawfully and in an effective way.
4. Article 249(3) bestows the following responsibilities to the Auditor-General as an Independent Office;
    - protect the sovereignty of the people;
    - secure the observance by all state organs of the democratic values and principles;
    - promote constitutionalism;
5. Article 252 (1) (a) and (b) of the Constitution of Kenya, 2010 empowers the Office to:
    - Conduct investigations on own initiative or on complaint by a member of the public.
    - Carry out conciliation, mediation and negotiation pursuits.

6. Article 254 (2) of the Constitution of Kenya 2010 state that at any time the President, the National Assembly or the Senate may require a commission or holder of an Independent Office to submit a report on a particular issue.
7. The Auditor-General's mandate therefore extends beyond accounts certification and is key in influencing the development of our nation by ensuring sustainable growth and delivery of continuous high quality services to the citizens of Kenya through oversight.

C. Medium-Term Debt Management Strategy

Honorable Chair

Honorable Members

8. Section 33 (1) of the Public Finance Management (PFM) Act, 2012 provides that on or before the 15th February in each year, the Cabinet Secretary shall submit to Parliament a statement setting out the debt management strategy of the National Government over the medium term with respect to its actual liability and potential liability in respect of loans and guarantees and its plans for dealing with those liabilities.
9. Section 33(2) of PFM Act, 2012 states that the Cabinet Secretary shall ensure that the Medium-Term Debt Management Strategy (MTDS) is aligned to the broad strategic priorities and policy goals set out in the Budget Policy Statement (BPS).
10. Section 33(3 a-e) of PFM Act, 2012 further states that the Cabinet Secretary shall include in the statement, information in respect to the total stock of debt as at the date of the statement, sources of loans made to the National Government and the nature of guarantees given by the National Government, principal risks associated with those loans and guarantees, the assumptions underlying the debt management strategy and an analysis of the sustainability of the amount of debt, both actual and potential.
11. Section 33(4) of PFM Act, 2012 states that within fourteen (14) days after the debt strategy paper is submitted to Parliament under this section, the Cabinet Secretary shall submit the statement to the Commission on Revenue Allocation and the Intergovernmental Budget and Economic Council and publish and publicize the statement.

D. Auditor- General Not to Question Government Policy Objectives

Honorable Chair

Honorable Members

12. Section 42 of the Public Audit Act, 2015 bars the Auditor-General from questioning the merits of a policy objective of the National Government or County Government or any other public entity. However, Article 229(6) mandates the Auditor-General to confirm whether or not public money has been applied lawfully and in an effective way. This entails assessment of implementation of Government policies and programmes.

E. Previous Audits on Public Debt

Honorable Chair

Honorable Members

Growing Debt Levels

13. The public debt accumulation is attributed to high fiscal deficits. The Government's commitment to achieving reduced fiscal deficits over the medium term remains key to Kenya's debt sustainability.
14. The Office has continually raised concerns over the growing level of public debt in Kenya. The outstanding amount of public debt has increased over the years from Kshs.4,801,416,851,482 reported in the year 2017/2018 to Kshs.10,264,939,001,661 reported in the year 2022/2023. This represents an increase of Kshs.5,463,522,150,179 or approximately 114% over the six (6) year period as shown in **Table 1**:

Table 1: Growth of Public Debt for the Period 2017/2018 to 2022/2023

Financial Year	External Debt (Kshs.)	External Debt % of Total	Domestic Debt (Kshs.)	Domestic Debt % of Total	Guaranteed Loans (Kshs.)	Guaranteed Debt % of Total	Total Debt (Kshs.)	Annual % increase
2017/2018	2,403,899,102,184	50.07%	2,397,517,749,298	49.93%	0	0.00%	4,801,416,851,482	
2018/2019	2,752,467,840,668	50.49%	2,698,685,962,748	49.51%	0	0.00%	5,451,153,803,416	14%

15. As at 30th June 2023, the outstanding amount of public debt of Kshs.10,264,939,001,661 represents 102.6% of the then maximum ceiling of Kshs.10,000,000,000,000 approved by Parliament through Legal Notice No.89 of 26 May, 2022 which provided that the National public debt was not to exceed ten trillion shillings. However, in October 2023, the Kenyan Government amended the absolute debt ceiling and replaced it with a debt anchor at 55% of debt to Gross Domestic Product (GDP) ratio in present value terms.
16. The optimal strategy of the 2022/2023 MTDS was to minimize costs and risks through a net financing mix of 32 per cent from external sources and 68 per cent from domestic market in the medium-term. On the external debt market, the main objective of the strategy was to optimize concessional borrowing and reduce commercial borrowing, with an intention to reduce the cost of debt. On the domestic market, the strategy sought to reduce refinancing risk through maintaining the existing stock of Treasury bills at the current levels while issuing medium to long term debt securities under the benchmark bond programme.
17. This strategy sought to achieve 25 percent and 75 percent in external and domestic financing in gross borrowing terms, respectively. The larger proportion of the gross domestic borrowing accounts for rollover of Treasury Bills within the financial year. The actual drawdowns for FY 2022/2023 was Kshs.2,582,291,921,096 comprising of Kshs.504,263,462,785 in respect to external debt and Kshs.2,078,028,458,311 in respect to domestic debt. This gives a ratio of 20:80 in external to domestic financing respectively.
18. 2023/2024 Medium- Term Debt Strategy indicates that the optimal deficit financing strategy is 50:50 net external and domestic borrowing mix as it leads to the best costs and risks characteristic combination.
19. The public debt expenditure has over the years increased from Kshs.516,547,493,884 reported in 2017/2018 to Kshs.1,200,608,836,164 reported in 2022/2023 with the average annual percentage of approximately 88% of the Consolidated Fund Services total expenditure as shown in **Table 2.**

Table 2A: Consolidated Fund Services Expenditure for the Period 2017/2018 to 2022/2023

Increasing Cost of Euro Bonds

20. The Government of Kenya has now issued four Eurobonds each with a higher coupon rate reflecting the likely unsustainability of the current debt portfolio. The cost of these Eurobonds goes beyond the interest rate. Issuing and servicing these debts involves additional fees and commissions. Additionally, fluctuations in foreign exchange rates impacts the actual cost of repayment.
21. Of the current Eurobonds, the first was issued in 2014 and matures in June, 2024, with a coupon rate of 6.875% and an initial value of USD 2 billion. This bond is due for repayment soon, and the Government recently issued a new Eurobond to manage this liability. The second was issued in 2019 and matures in May 2027, with a coupon rate of 7% and an initial value of USD 900 million. The third one was issued in 2018

and matures in February 2028, with a coupon rate of 8.500% and an initial value of USD 2 billion.

22. The fourth and the newest Eurobond was issued in February 2024 and matures in 2031, with a coupon rate of 10.375% and a value of USD 1.5 billion (approx.. Kshs.233,250,000,000 at an exchange rate of 155.5Kshs/USD). This bond was issued to finance the offer to buy back the maturing bond (June 2024). The higher interest rate reflects current market conditions and Kenya's risk profile.
23. Kenya's reliance on Eurobonds has raised concerns about debt sustainability. There is heightened vulnerability in 2024 which coincides with Eurobond maturities. While Eurobonds offer access to funds for development projects, managing repayment obligations remains a crucial challenge especially because of the shorter maturity periods and increasing coupon rates.
24. Other factors that affect debt sustainability include export revenue patterns, climate-related shocks, exchange rate movements, and general performance of the economy.

Previous Audit Issues on Public Debt

25. The Office has raised various issues pertaining to accountability and sustainability of public debt expenditure. Section 50(1) of the Public Finance Management Act, 2012 requires that guaranteeing and borrowing of money must be done at the lowest possible cost in the market and considering risks while ensuring that the overall level of public debt is sustainable.
26. The Office submits annual financial audit reports on public debt expenditure. These are the amounts used to redeem or service current debt. The Office has also carried out six (6) comprehensive performance audit reports on public debt sustainability, being;
    i. Effectiveness in the Management of Public Debt in Kenya, issued in 2017
    ii. Public Debt Servicing Activities, issued in September 2022
    iii. Special Audit on Utilization of Commercial Loans in Kenya for the period 1 July 2010 to 31 December, 2021, issued in September 2022.
    iv. Deficit Financing Operations by The National Treasury, issued in July 2023
    v. Efficiency in Utilization of Debt Funds by the Ministry of Agriculture and Livestock Development: Case of Kenya Climate Smart Agriculture Project (KCSAP), issued in October 2023

vi. Contracting of External Loans for Public Development Projects by The National Treasury, issued in October 2023

27. The audits have revealed among other issues that:

i. **Financial Statements to show Debt Position**-There are no specific financial statements prepared to show the complete debt position (Debt stock). Currently, the status of public debt is only included as an annexure in the Consolidated Fund Services - Public Debt. Other government liabilities or obligations such as pending bills/ accounts payable, pension arrears etc. are not included in the Debt stock. Pending bills arise from goods and services provided to the Government but not paid for at the end of the financial year which may be termed as a form of borrowing.

ii. **Finance (Debt) Costs -** The finance cost has over the years increased from Kshs.322,007,322,696 reported in 2017/2018 to Kshs.617,714,104,137 reported in 2022/2023 which is equivalent to a 92% increase as shown in **Table 3**.

Table 3A: Finance (Debt) Costs for the Period 2017/2018 to 2022/2023

Details	2017/2018	2018/2019	2019/2020	2020/2021	2021/2022	2022/2023
Interest Payments on Foreign Borrowings	84,461,030,044	108,004,813,414	115,798,697,298	106,265,999,668	121,494,973,256	154,679,317,708
Domestic Costs						
Interest on Domestic Borrowings (Non-Govt)	138,307,103,161	210,721,345,304	240,772,652,464	299,194,020,253	385,939,372,011	457,206,007,991
Interest on Short-Term Borrowing (T-Bills)	36,104,826,935	-	62,932,237,645	-	-	-
Interest on Borrowings from other Government Units - Pre-1997 Government Overdraft Loan (CBK)	725,206,095	694,597,465	665,006,173	626,529,945	592,006,095	558,706,095
Interest on CBK Overdraft	2,493,536,827	2,523,255,059	3,244,911,268	2,207,659,996	2,063,728,517	5,160,905,847
Switch Costs	19,491,632	20,576,454	56,049,977	-	-	109,166,496
Interest on M-Akiba	-	42,735,000	90,960,000	44,567,500	-	-
Sub Total	**177,650,164,650**	**214,002,509,282**	**307,761,817,527**	**302,072,777,694**	**388,595,106,623**	**463,034,786,429**
Finance Costs including Loan Interest	**262,111,194,694**	**322,007,322,696**	**423,560,514,825**	**408,338,777,362**	**510,090,079,879**	**617,714,104,137**

Table 3B: Foreign and Domestic Costs as a Percentage of Total Finance Costs for the Period 2017/2018 to 2022/2023

Foreign Borrowing Costs(External Debt)	32.22%	33.54%	27.34%	26.02%	23.82%	25.04%
Domestic Debt Costs	67.78%	66.46%	72.66%	73.98%	76.18%	74.96%
TOTAL	100.00%	100.00%	100.00%	100.00%	100.00%	100.00%

iii. **Cost of Domestic Vs External Debt** –The cost of domestic debt has become more expensive than the cost of external borrowings. During the period 2017/2018 to 2022/2023, the cost of external borrowing averaged 28% while that of domestic debt averaged 72% of total finance costs. For the financial year 2022/2023, interest on internal debt was 75% compared to that of external debt which was 25% of the total finance costs. The cost of domestic debt averaged three times the cost of external borrowings despite it constituting 47% of the total debt. We have recommended that the National Treasury put in place measures to guard against the excessive internal borrowings which may have a negative impact on the country's interest rates, inflation rates and may lead to crowding out of private investors due to reduced loanable funds in the market.

iv. **Commitment Fees** - The Government continues to pay commitment fees incurred on undrawn amounts in respect of loans signed between the Government of Kenya and foreign lenders. A total of Kshs.4,985,885,892 was paid as commitment fees for undrawn amounts for the years 2020/2021 to 2022/2023. The amount of Kshs.4,985,885,892 comprises of Kshs.2,063,104,537, Kshs.1,486,813,083 and Kshs.1,435,968,272 for the years 2020/2021, 2021/2022 and 2022/2023 respectively. These amounts are included in the Interest Payments on Foreign Borrowings for the respective years as tabulated in **Table 3**.

Had the implementing Agencies put proper mechanisms in place to enable absorption of the committed credit within the agreed timeframes, the payment of commitment fees would have been minimized. The National Treasury, having fiduciary responsibility over Government Ministries, Departments and Implementing Agencies should ensure that programmes and projects are ready for execution before committing funding. The Office has also recommended that

key stakeholders be involved during pre-loaning. This will enable stakeholders to be cognizant of the significance of some of the processes and the importance of adhering to the agreed loan conditions.

v. **Debt Servicing and Foreign Exchange Loss**- Debt servicing is prone to foreign exchange loss exposure on payment of external debt. The Office has recommended that the Government considers hedging mechanisms on foreign exchange risks. This will help in reducing the risk associated with fluctuation in the exchange rates between the Kenyan shilling and lenders' currencies.

vi. **Default on Debt Repayment:** As previously reported, review of records held by The National Treasury's Commonwealth Secretariat Debt Recording and Management System as at 30 June, 2023 revealed that the Government has defaulted on servicing an amount of Kshs.11,039,138,761 in respect of three (3) loans advanced by an international commercial bank towards the construction of three (3) dams as shown in **Table 4**:

Table 4: Default on Debt Repayment

Project	Disbursed Amount Euro	Principal Defaulted Euro	Interest Defaulted Euro	Total Arrears Euro	Equivalent Kshs
Arror Dam	91,852,267	3,196,591	9,874,612	23,071,203	2,861,297,485
Itare Dam Project	141,552,608	36,388,094	6,735,832	43,123,926	5,348,242,211
Kimwarer Dam	71,878,751	15,380,277	7,435,335	22,815,612	2,829,599,065
Total	**305,283,626**	**64,964,961**	**24,045,779**	**89,010,741**	**11,039,138,761**

The Office recommends management to provide a roadmap on how it intends to resolve the dispute with minimal cost to the public.

Audit Recommendations from Previous Audits

28. In addition to the recommendations above, proposals on reducing the risks and costs of the stock of debt in line with the Debt Management Objectives may include the following: -

    (a) Acquisition of land, relocation of utilities and wayleave compensation should be financed in-advance through timely disbursement of GOK counterpart funding before signing of financing agreements.

    (b) The time between feasibility studies and actual time for signing financing agreements is reduced to avoid costs of redoing feasibility studies.

    (c) Implementing agencies should involve project beneficiaries during projects identification and designs through public participation in order to enhance ownership, social accountability and sustainability of the projects.

    (d) In instances where a project has several loans attached to it, there should be clear segregation and utilization of funds.

    (e) Establishment of a Debt Sinking Fund in foreign currency (USD) to be used in debt repayment.

    (f) The capacity and skills of PDMO are enhanced for adequate evaluation and negotiation of favorable credit terms and conditions, and for adequate monitoring and evaluation of loan projects.

    (g) To ensure adequate project oversight, the implementing agencies should enhance monitoring and evaluation of debt-funded projects.

F. Conclusion

29. Countries go to debt when the taxes collected are not able to meet their expenditure. Current collection of tax not sufficient to meet financial needs (to finance the deficit).

30. Debt Management is critical in ensuring that we minimize the expenditure and devote adequate funds for development of crucial public goods and services that will spur economic growth and development.

31. The Office is currently carrying out the following audits:

    a. Special Audit on "Debt Servicing of External Loans in Kenya"

    b. Performance Audit on "Cash Management' while focusing on Domestic Debt

We expect to issue the two (2) reports before the end of this financial year.

32. The Office will continue conducting audits on public debt through the annual financial and compliance audits and periodic performance audits.

I thank you for this opportunity.

FCPA Nancy Gathungu, CBS
AUDITOR-GENERAL

20 February, 2024

ANNEX 6: NEWSPAPER ADVERTISEMENTS CALLING FOR MEMORANDA

Court hands back grabbed land to Kakamega Primary School

Private developers had already started constructing a high-rise building on the disputed land.

Applicants were duped into buying land from third parties knowing well it belonged to the public school.

ATHAN OCHUNGE

The Court of Appeal in Kisumu has reverted land grabbed by private developers to Kakamega Primary School.

This is after a three-judge bench dismissed an application lodged by two private developers namely Yako Supermarket (K) Limited and Sudhir Khetia.

They listed the National Land Commission (NLC), the Lands and Housing Cabinet Secretary, the Chief Land Registrar (Board of Management), and Kakamega Primary School as respondents.

Appellate judges Hannah Okwengu, Hellen Omondi and Joel Ngugi unanimously dismissed the application on February 9, thereby handing back the disputed prime plot back to the school, which has a population of more than 4,500 pupils.

The private developers had already started constructing a high-rise building on the disputed land.

"In their original suit before the Land Court, the applicants did not attempt to show that the original allottees who sold the suit properties to them had valid titles. Neither did they attempt to demonstrate how the suit properties were allocated to the initial allottees," the judgment reads in part.

The judges ruled that that the private developers did not attempt to show that the correct process of alienation and allocation of the suit properties was followed.

"It is, therefore, a little-disguised afterthought for them to belatedly seek to introduce evidence aimed at strengthening the weak links in their case identified by this Court of Appeal. Our review jurisdiction must never be used to permit a party a second bite at the cherry," the judgment further reads in part

"The upshot is that the application dated July 23, 2023 is without merit. It is hereby dismissed with costs to the fourth respondent (Kakamega Primary) who is the only one who responded to the application."

The school Board of Management Chairman Godfrey Mamalia and head teacher Dickson Wanyangu welcomed the court's decision.

They said the case has taken many years and "now justice has been served and our request is to have the structure demolished and give our pupils back their playing field."

Earlier, Justices Mumbi Ngugi, Patrick Kiage, and Francis Tuiyott ruled that Yako Supermarket and Sudhir Khetia held illegal claims to Kakamega Town Block 11/292 and 11/252 after they were duped into buying them from third parties. They applied for a review of this judgment on grounds that "they had discovered new evidence that can be considered."

Yako and Khetia purchased the prime plots from Michael Odwoma and Kito Pharmaceuticals Limited on February 5 and August 20, 2011.

But on February 17, 2012, the Registrar of Lands in Kakamega issued a gazette notice revoking their titles after the public raised the red flag. The developers moved to court to challenge the decision.

Justice Juma Chitembwe, then a judge in Kakamega ruled in their favour saying the Land Registrar had no powers to revoke the developers' titles and his decision was therefore null and void.

The case wound up before Justice Nelly Matheka of the Kakamega Land Court, who on July 29, 2020, ruled that the developers illegally acquired the plots and reverted the land to the school. Disgruntled, they appealed before the three Kisumu judges.

TRAGEDY

Man hacks lover to death, attempts to kill himself in Juja

A man hacked his girlfriend to death at Mung'etho in Mirimaini estate, Juja, Kiambu County, before attempting to take his life.

The man identified as Timothy Kipkosgei, 30, is said to have traced Faith Chebet to an apartment in Mung'etho where he committed the heinous act on Saturday evening.

Hezbon Litalanga, a witness, said Chebet, 25, had visited a friend.

"At around 4pm I saw a man chasing a woman believed to be his lover. They accessed our apartment through the open gate and went to room 12 which was wide open. The man locked the door and what we heard later were screams from the woman," said Litalanga.

"When we went to inquire what was happening, we found the man had slit the woman's throat and stabbed her," said the witness.

Juja sub-county Police Commander Michael Mwaura said Kipkosgei attempted to commit suicide by cutting himself on the head and neck.

Mwaura said officers from Juja Police Station rushed the man to Thika Level 5 Hospital.

"Beside her body, was the suspect who was also writhing in pain and bleeding profusely from the head with visible physical injuries," the Juja police boss said.

A blood-stained knife and machete were recovered at the scene.

[Gitau Wanyoike]

COUNTY GOVERNMENT OF MURANG'A

TENDER NOTICE

Murang'a County Government is in the process of initiating the implementation of various projects. The rationale for these programs is to ensure improved service delivery in the County. The Program entails implementation of development projects prioritized by the local communities. The Program puts emphasis on devolved functions that have impact on local communities.
The Murang'a County Government hereby invites bids from eligible Contractors/Suppliers for the following tenders:

	TENDER NO.	Item description	Negotiation /IFMIS number	Eligibility
1.	MCG/341/2023-2024	Supply and Delivery of black pure leather shoes for ECDE learners	1461834-2023-2024	Special Group
2.	[illegible]9/2023-2024	Supply and delivery of teaching and learning materials for ECDE learners	1422044-2023-2024	Special Group
3.	[illegible]4/2023-2024	Request for proposal for call center at Murang'a level five for all county services	1440737-2023-2024	Open
4.	MCG/346/2024-2026	Framework tender for the supply and delivery of sports equipment	Manual Submission	Special Group
5.	MCG/347/2023-2024	Request for proposal for consultancy services, structural and architectural designs for Mumbi stadium	Manual Submission	Open
6.	MCG/343/2023-2024	Supply, delivery and installation of skip bins	1462569-2023/2024	Open
7.	MCG/348/2023-2024	Framework contract for the supply of seedlings	Manual Submission	Open
8.	MCG/349/2023-2024	Framework contract for the supply of cleaning materials & equipment	Manual Submission	Open
9.	MCG/350/2023-2024	Supply and Delivery of 1No. (one) telescopic aerial lift truck, 4x2, 3-5 ton	1462395-2023/2024	Open
10.	MCG/351/2023-2024	Supply and delivery of material and equipment for the repair of streetlights and high masts	1462391-2023/2024	Open
11.	MCG/352/2023-2024	Tender for lease of 1 (one) telescopic aerial lift truck, 4x2, 3-5 ton, to carry out maintenance works on street lights and high masts throughout Murang'a county	1462725-2023/2024	Open (Tender closing date 28th Feb, 2023)
[illegible]	MM00[illegible]3-2024	Proposed installation of cabro paving blocks at Muwasco Junction – Township ward	1461941-2023/2024	Special category
[illegible]	MM005/2023-2024	Proposed beautification within Murang'a town– Township ward	1461954-2023/2024	Special category

Interested bidders may examine and obtain detailed tender documents free of charge from our website www.muranga.go.ke and also the public procurement information web-portal **https://tenders.go.ke/website.**

1. Certificate of Registration/ Incorporation
2. Valid Tax Compliance Certificate
3. Copy of a Current Single Business Permit.
4. Valid Registration Certificate From National Treasury (AGPO) For Special Category groups
5. Provide valid NCA certificate– **where applicable**
6. Tender Security of Kenyan Shillings 1,000,000 valid for 120 days from the Tender closing date – Original and Copy– **where applicable**
7. Current Manufacturers Authorization –**where applicable.**
8. Comprehensive Catalogues of equipment offered (highlight type / model offered) – Original and Copy in use–**where applicable.**
9. Attach Certified copies of Audited Accounts for the last 3 years (2020,2021 and 2022)–**where applicable**
10. Details of company directors **(CR12 ISSUED WITHIN SIX MONTH FROM THE TENDER OPENING DATE)**
11. Copies of National identification documents (ID or Passport) for all Directors
12. **Bidders shall sequentially serialize all pages of each tender submitted**

Tenders must be submitted through the **IFMIS** supplier portal (where Negotiation/IFMIS no. is provided) and **ONE Original** of complete tender documents enclosed in plain sealed envelopes marked with tender name and reference number should be deposited in the tender box located at the Murang'a County government headquarter offices, ground floor or be addressed to:

THE COUNTY SECRETARY
MURANGA COUNTY GOVERNMENT
PO BOX 52-10200, MURANGA

as to be received on or before Thursday 7th March, 2024 at 11.00 am
ders will be opened immediately thereafter in the presence of bidders or their representatives who wish to attend.
All interested bidders are required to continually check the Murang'a County Government website: www.muranga.go.ke for any tender addendums or clarifications that may arise before submission date.

n COUNTY SECRETARY

REPUBLIC OF KENYA
THIRTEENTH PARLIAMENT- THIRD SESSION (2024)
THE NATIONAL ASSEMBLY

IN THE MATTER OF ARTICLE 118(1) (b) OF THE CONSTITUTION
AND
IN THE MATTER OF CONSIDERATION BY THE NATIONAL ASSEMBLY OF THE 2024 BUDGET POLICY STATEMENT AND THE 2024 MEDIUM-TERM DEBT MANAGEMENT STRATEGY

INVITATION TO SUBMIT MEMORANDA

WHEREAS, Article 118(1)(b) of the Constitution requires Parliament to facilitate public participation and involvement in the legislative and other business of Parliament and its Committees;

AND WHEREAS, pursuant to section 25(2) and section 33(1) of the Public Finance Management Act, 2012, the Cabinet Secretary for the National Treasury and Economic Planning submitted the **2024 Budget Policy Statement** and the **2024 Medium-Term Debt Management Strategy** to the National Assembly on **Thursday, 15th February 2024** which were referred to the relevant Committees for consideration and reporting to the House;

IT IS NOTIFIED that—

(1) The **2024 Budget Policy Statement** articulates the broad strategic priorities and policy goals that will guide the national government and county governments in preparing their budgets for the 2024/25 Financial Year and over the medium-term; and

(2) The **2024 Medium-Term Debt Management Strategy** provides the borrowing strategy for the for the 2024/25 Financial Year and underscores the public debt management objectives that will minimize the costs and risks of the current public debt portfolio

NOW THEREFORE, in compliance with Article 118(1) (b) of the Constitution, the Clerk of the National Assembly hereby invites the public and stakeholders to submit memoranda on the **2024 Budget Policy Statement** and the **2024 Medium-Term Debt Management Strategy** to the respective Committee listed below—

S/No.	PAPER	COMMITTEE
1.	The 2024 Budget Policy Statement	Budget and Appropriations
2.	The 2024 Medium-Term Debt Management Strategy	Public Debt and Privatization

The Memoranda should clearly indicate the name of the person or organization submitting it and their contact details. The Memoranda should be hand-delivered to the **Office of the Clerk, First Floor, Main Parliament Buildings, Nairobi** or emailed to **cna@parliament.go.ke** to be received **on or before Monday, 26th February 2024 at 5.00 pm.**

The **2024 Budget Policy Statement** and the **2024 Medium Term Debt Management Strategy** are available at the **National Assembly Table Office, First Floor, Main Parliament Building** and on **the Parliament Website (http://www.Papers Laid | The Kenyan Parliament Website.)**

S. NJOROGE, CBS
CLERK OF THE NATIONAL ASSEMBLY
16th February 2023

"For the Welfare of Society and the Just Government of the People"

nning mate in 2027 in place of DP Rigathi Gachagua

lividES Mt Kenya

t to be drawn into the poli- of the region's kingpin.

e first term governor said s more focused on trans- ming his county through pro- mmes such as Kangatacare, rtnership between his ad- stration and the National th Insurance Fund and Mu- a Youth Service, which of- work-study opportunities to less youths.

lindi is my brother on ac- it of our deep historical con- ions while Rigathi is our and ave the duty to re- ct hi e. The real political gpin is wanjiku [ordinary cit-]" he told *Nation*.

wever, despite the succes- politics cooling down, Gov- r Kahiga has fired a warn- shot to the President over his liance with Western region plans to split the deputy leader position into three.

says on wants back Unite ocratic Alliance DA) secretary-general posi- that is currently held by for- Kakamega Senator Cleop- Malala, who replaced nomi- d senator Veronica Maina.

We want to feel we are in UDA only by name. We are in this party for our political interests and let it be clear that, if our interests are not taken care of, then there is no point in remaining in the party."

The political upheavals in Mt Kenya evokes memories of the aftermath of the death of Jomo Kenyatta in 1978.

The death of the founding President threw the region into political turmoil after Moi managed to outsmart the Kiambu elites to become President.

During the re-organisation of the region's politics, Matiba emerged with his Ford Asili party, which had split from the original Forum for the Restoration of Democracy (Ford) in May 1992. But Kibaki decided to form the Democratic Party of Kenya, taking advantage of Matiba's absence from Mt Kenya and a fallout with other top leaders in the region.

The 1992 election saw Matiba and Kibaki divide the Mt Kenya votes, with Matiba commanding Murang'a, Kiambu and Nakuru while Kibaki took Nyeri, Laikipia and Nyandarua.

While Matiba emerged as the Leader of Official Opposition in 1992, Ford Asili lost its clout in the Mt Kenya region and by 1997 elections, it was Kibaki who would command the Mt Kenya bloc. The rivalry between the two leaders played into Moi's hands giving him 10 more years at the helm.

Kibaki became President five years later and went on to hand over the Mt Kenya kingpin mantle to Uhuru. Uhuru dominated Mt Kenya politics for 10 years but his decision to back Mr Odinga's presidency in 2022 saw him lose part of that clout.

AT A GLANCE

Upheaval harks back to 1978

The political upheavals in Mt Kenya evokes memories of the aftermath of the death of Jomo Kenyatta in 1978. It threw the region into turmoil after Moi managed to outsmart the Kiambu elites to become President.

We will soldier on without Raila, Kalonzo now declares

BY CECIL ODONGO

Wiper party leader Kalonzo Musyoka said yesterday Azimio will remain intact and soldier on should opposition chief Raila Odinga clinch the position of the African Union Commission chairperson.

Mr Musyoka said there will be no vacuum in the opposition as Mr Odinga, who was the Azimio presidential candidate in the 2022 General Election but lost to President William Ruto, prepares to launch his bid for the African Union top job.

On Thursday last week, Mr Odinga, in the company of former Nigerian President Olusegun Obasanjo, announced his interest in the position. The current AUC chairperson, Moussa Faki of Chad, is serving his second and final term in office.

"Raila will have a higher position and we pray for his success. We are looking at the interests of Kenya and not Kenya Kwanza or Azimio la Umoja because Raila is now above local politics," he said.

"I want to assure you as Azimio la Umoja that we are united. Two days after Raila announced his candidacy, we met and agreed that we must stand firm and defend the rights of Kenyans."

The former vice-president made the remarks while addressing traders at Kenyatta Market in Lang'ata Constituency, Nairobi County after attending a service at Nairobi Baptist Church.

Mr Musyoka said the meeting of Azimio luminaries after Mr Odinga declared his candidacy was a symbol of unity and there should be no fear that opposition politics would disintegrate in the absence of the former Prime Minister. The meeting on Thursday was attended by Mr Musyoka, Narc Kenya leader and Mr Odinga's running mate in the last election Martha Karua and former Meru Governor Peter Munya.

Others were DAP leader Eugene Wamalwa, Roots Party leader George Wajackoya and Jubilee party Secretary-General Jeremiah Kioni, among others.

Wiper party leader Kalonzo Musyoka (left) and Nairobi Senator Edwin Sifuna address members of the public at Kenyatta Market in Nairobi yesterday. BILLY OGADA I NATION

CLERK OF THE NATIONAL ASSEMBLY

16th February 2023

"For the Welfare of Society and the Just Government of the People"

Mitchell Cotts

A member of the FCC Group

February 17, 2024

MEDIA STATEMENT

The attention of Mitchell Cotts has been drawn to media articles suggesting that contaminated sugar earlier imported into the country may have been irregularly released to the market from our facilities.

From the onset, we assure and categorically state that no such consignment has been irregularly released to the market nor was there ever any attempt to do so.

As a responsible corporate citizen, we wish to provide the following background details to put this matter into context and provide public assurance:-

1. The cargo referred to in the media reports was imported to Kenya by our client late last year from Port Louis, Mauritius, with the relevant pre-shipment inspection documents ascertaining its quality status. The cargo, comprising **forty-six 20 foot containers** loaded with food-grade bagged sugar, was shipped aboard the container carrier **MSC Eagle F** earmarked for delivery to **Mitchell Cotts CFS** from Mauritius.
2. Unfortunately on **October 9, 2023** the ship suffered engine failure and ran aground as she was entering Kilindini port. This incident was widely covered by the media following the successful efforts by Kenya Ports Authority marine crew to refloat and tow the ship into the port for repairs and cargo recovery.
3. As the nominated Container Freight Station, Mitchell Cotts had, prior to the ship's arrival in Mombasa, processed the relevant container transfer documentation and paid the port charges as per laid down procedures.
4. During the off-loading operations at the port on **12th and 13th October, 2023** it was noted that a number of containers had been affected by water which had seeped into the ship when she ran aground.
5. The importer was duly notified of this matter for the purposes of follow up with the ship's agent and their insurers. In order to determine the extent of the water intrusion on the cargo it was necessary to strip all the 46 containers in a warehouse and separate the bags as appropriate.
6. On **6th December 2023** the Shipper in Mauritius issued a letter of indemnity authorizing the transfer of the containers to Mitchell Cotts CFS for the survey exercise to proceed. The containers were transferred on **20th and 21st December 2023**. On **9th of January 2024, KRA Customs** department gave conditions under which the stripping was to be carried out and **on 11th of January 2024** the exercise was done in the presence of officials from KRA Customs Department, KEBS, SGS, Port Health and the Ship's Agent M/s Ocean Freight East Africa Ltd.
7. Arising out of this exercise the following observations were noted:

a) 33X20FT Containers found in sound condition		*b) 13X20FT Containers found to have water ingress*	
Number of 50kgs bags stripped	11,766	Number of 50kgs bags stripped	5,164
Number of 25kgs bags stripped	7,675	Number of 25kgs bags stripped	2,861
Total number sound bags	19,441	Total number waterlogged bags	8,025

8. Subsequently, a seizure notice was procedurally issued by Port Health Services Department for the **8,025 waterlogged bags from 13 containers.** These were segregated and stored in our warehouses pending destruction which will be done under the supervision of the relevant authorities.
9. The other **19,411 sound bags from 33 containers** are presently also stored in warehouses awaiting the requisite laboratory and quality assurance test results from KEBS prior to release authorization by KRA.

Mitchell Cotts reiterates that no contaminated sugar has been released from its facilities to the local market, as suggested in the media. Engagements with all the Regulatory and Oversight authorities also continue to be maintained as per established and standard procedures and protocols. Mitchell Cotts is committed to and upholds utmost integrity as a fundamental operating value in all its engagements as the leading end-to-end logistics solutions provider.

Signed,

James Rarieya
Director, Operations.

FOREWORD

The Medium-Term Debt Management Strategy (MTDS) is a policy document that guides government borrowing and public debt management in ensuring its sustainability. It is prepared and published annually to guide the government in pursuing the desired structure of the public debt portfolio which reflects its choice on cost and risk trade-offs in the medium-term. Additionally, the strategy reflects on the government's commitment to develop and implement viable strategies designed to maintain public debt at sustainable levels.

The preparation of 2024 MTDS is in accordance with the requirements of Section 33(2) of the Public Finance Management (PFM) Act, 2012 and the guidelines outlined in the public debt and borrowing policy. The strategy is anchored on the Budget Policy Statement (BPS) as provided for in the Public Finance Management. The objective is to reduce the fiscal deficit and public debt vulnerabilities and lower Kenya's high risk of debt distress to moderate in the medium-term.

The 2024 MTDS has been prepared on the background where the economy has been facing major shocks, among them, the geopolitical conflicts that disrupted global trade leading to increased fuel, fertilizer and food prices; the lingering of the post COVID-19 pandemic effects; and a severe drought witnessed in the region and most parts of the country associated with climate change which exerted more strain on the country's resources. The practice of reviewing MTDS on a regular basis demonstrates government's commitment to promote transparency and accountability in public debt management that considers new debt policy direction on emerging economic environment.

In preparing the 2024 MTDS, several financing options were evaluated based on costs and risks underlying various alternative strategies. The most optimal cost-risk trade-off is determined by considering a range of financing alternatives. Key consideration included potential sourcing from domestic and foreign financial market with an objective of minimizing costs and risks.

The strategy recognizes a diversified debt structure and development of the domestic debt market which is necessary to mitigate against exchange rate risks on a country's external debt. In relation to this, the government successfully implemented the DhowCSD system that will broaden the Kenyan market to include retail investors hence mobilizing domestic savings to support development and inclusive growth which is consistent with Vision 2030. Kenya has also made a deliberate effort to consider diversifying sources of external borrowing in the international capital markets targeting instruments such as green and blue bonds, Samurai bonds, Panda bonds, Sukuk bonds among others.

Reducing fiscal deficit is necessary to stem escalation of debt accumulation and maintain debt at sustainable levels. To achieve this, the government is on a fiscal consolidation path consistent with the approved debt anchor which pegs public debt as a percentage of Gross Domestic Product (GDP) in net present value.

NJUGUNA NDUNG'U, EBS
CABINET SECRETARY/THE NATIONAL TREASURY AND ECONOMIC PLANNING

SECRET

ACKNOWLEDGEMENT

The Medium-Term Debt Management Strategy (MTDS) is prepared and revised annually to guide public debt management in the medium-term. In-depth consideration and reflection of the costs and risks of public debt amidst the continuous paradigm changes in the global financial markets informed the development of 2024 MTDS. The analysis employed is cognizant to the objectives of Public Debt and Borrowing Policy with an emphasis to minimized costs and risks of the evolving debt portfolio.

The development of the 2024 MTDS involved the use of analytical tools to analyze the existing debt portfolio; debt risks characteristics and potential borrowing alternatives of which an optimal borrowing strategy was determined. The analysis takes into account the macro-economic assumptions underpinned in the 2024 Budget Policy Statement.

The resources mobilized through borrowing shall facilitate the achievement of the government development agenda while minimizing the cost of public debt management. Further, emphasis will be on promoting development and deepening of the domestic debt market institutions and enhance intergenerational equity.

The preparation of the 2024 MTDS was a collaborative effort involving various Departments within the National Treasury and the Central Bank of Kenya. I would like to appreciate the invaluable leadership and guidance provided by the Cabinet Secretary, National Treasury and Economic Planning towards the development of this Strategy. Moreover, I recognize the untiring effort of the Governor Central Bank of Kenya and the Director General, Public Debt Management Office for providing the technical guidance and putting together the core team that worked tirelessly to develop this document while maintaining esteemed professionalism.

The 2024 MTDS and previous years' versions of the Medium-Term Debt Management Strategies are available for reference and information in the National Treasury website: www.treasury.go.ke.

EXECUTIVE SUMMARY

The 2024 Medium-Term Debt Strategy (MTDS) has been prepared as per the requirements of Section 33(2) of the Public Finance Management Act, 2012 that guides borrowing activities of the government over the medium-term. This strategy covers the period 2024/25-2026/27 and it outlines the strategies and initiatives to be implemented, aiming at minimizing costs and risks of debt management.

The strategy was developed in the face of ongoing global uncertainties, which includes high but gradually declining inflationary pressures, an unfavourable outlook for global growth, elevated geopolitical tensions, concerns about the stability of the financial sector in advanced economies and rise in food insecurity as a result of climate change related shocks.

The strategy is aligned to 2024 Budget Policy Statement (BPS) whose aim is to support economic recovery through a growth friendly fiscal consolidation plan aimed at slowing the public debt accumulation without compromising service delivery to citizens.

The government's plan in the fiscal year 2024/25 and over the medium-term is to implement priority economic policies, structural reforms, fiscal consolidation plan and sectoral expenditure programs outlined in the 2024 BPS, through a Bottom-Up approach for a socioeconomic transformation, economic turnaround and inclusive growth. Special focus will be placed on increased employment, more equitable distribution of income, social security while also expanding the tax revenue base, and increased foreign exchange earnings.

The scope of coverage of this strategy is the existing debt portfolio, non-performing guarantees, and the projected fiscal deficits in the 2024 BPS.

Public and publicly guaranteed debt in nominal terms as at end June 2023 was Ksh. 10,278.7 billion (70.8 percent of GDP). This comprises external debt stock of Ksh. 5,446.5 billion and domestic debt stock of Ksh. 4,832.1 billion. Kenya's debt remains sustainable with high risk of debt distress as per the Debt Sustainability Analysis (DSA) report by International Monetary Fund (IMF) as at June, 2023.

The present value of public debt was 68.2 percent of GDP against the approved debt anchor of 55 percent of debt to GDP. The domestic debt was 36.5 percent while external debt was 31.7 percent of GDP in PV terms.

Preparation of the 2024 MTDS to guide borrowing in the medium-term is in line with the PFM Act, 2012. The 2024 optimal strategy seeks to achieve gradual reduction of Treasury bills stock with domestic financing mainly sourced from medium to long-term Treasury bonds. Externally, the strategy focuses more on budget financing through concessional borrowing. In terms of net financing, the option assumes 45 percent domestic and 55 percent external borrowing.

The strategy will meet the government requirements while repaying its debt maturities. The outcomes of the optimal strategy are:

i. It has the least cost of debt in terms of interest payments as a percent of GDP and implied interest rate.

ii. It has least PV of debt to GDP as a resulting outcome of the fiscal consolidation plan.

iii. To minimize refinancing risk by lengthening the total portfolio Average Time to Maturity (ATM) through issuance of medium to long-term bonds and concessional loans with longer maturities.

iv. To minimize interest rate risk in terms of average time to re-fixing.

v. To deepen the domestic bond market through issuance of more medium to long-term instruments as the main source of domestic financing.

Changes in global economic and market conditions may result to deviation from the optimal strategy. Appropriate measures will be taken to align the strategy to policy actions at the time. Implementation of the strategy will be monitored and evaluated closely to factor any changes as they evolve based on market realities and fiscal adjustments.

I. INTRODUCTION

1. Article 225 (1) of the Constitution of Kenya and Section 12 (1) (b) of the Public Finance Management (PFM) Act, 2012 give the National Treasury the mandate to manage the level and composition of national public debt, National Guarantees and other financial obligations of national government within the framework.

2. Section 62 (3) of the PFM Act, 2012 specifies objectives of the Public Debt Management to include: minimization of the cost of debt management and borrowing over the long-term taking account of risks; promote the development of market institutions for Government securities; and ensure the sharing of the benefits and costs of public debt between the current and future generations.

3. Section 63 (c) of the PFM Act, 2012 mandates the PDMO to prepare and update MTDS annually including Debt Sustainability Analysis (DSA). Additionally, Section 64 (2) (a) of the Act, requires the MTDS to be consistent with the Budget Policy Statement (BPS).

4. The National Treasury prepares and publishes the Medium-Term Debt Management Strategy every year, which sets optimal strategy to finance government's medium-term borrowing requirements at the most optimal combination of cost and risk. It links the medium-term fiscal framework of government to the annual borrowing plan to facilitate borrowing at the lowest cost and most prudent degree of risk.

5. The 2024 Medium-Term Debt Management Strategy (MTDS) is prepared in conformity to Section 33(3) of the PFM Act, 2012 and include: a) the total stock of debt as at the date of the statement; b) the category of loans made to the national government; c) the principal risks associated with those loans and guarantees; d) the assumptions underlying the debt management strategy; and e) an analysis of the sustainability of the amount of debt, both actual and potential. It highlights plans reforms to be implemented by the National Treasury and other key market players aimed at deepening the domestic debt markets and reducing costs and risks of borrowing and debt management, develop the domestic debt market and pursuit of intergenerational equity in costs and benefits of public debt.

6. The MTDS aims to minimize costs and risks of the existing domestic and external guaranteed debt and called-up guaranteed debt, projected debt and financing of the fiscal deficit for the period FY2024/25 to FY2026/27.

Background to Medium-Term Debt Management Strategy

7. Kenya's economic performance has remained stable amidst global shocks in relation to Russia-Ukraine conflict, climate-related shocks and rising uncertainties in the global economy due to ongoing geo-political dynamics. In 2023, the economy is expected to grow by 5.5 percent from 5.2 percent in 2022 and is expected to remain stable the medium-term. The steady economic growth is expected to be supported by recovery in the agricultural

sector and resilient service sector including information and communication, financial services and trade.

8. Inflation rate has largely been within the government target of 5±2.5 percent at 6.6 percent in December 2023 from 9.1 percent in December 2022 and this was supported by lower food prices, prudent monetary policy and other government policy interventions. The overall inflation is expected to remain within the target range in the medium-term with the support of muted demand pressures.

9. In 2023, Kenya sovereign rating is at B by both Standard and Poor's (S&P) and Fitch Ratings. Moody's rated Kenya at B3 with a negative outlook. The variations in the credit rating scores were due to the influence of subjectivity and the perceptions on the qualitative analysis. Nevertheless, Kenya's public debt is within sustainable levels. The fiscal consolidation path is aimed at lowering fiscal deficit to curtail growth in the public debt.

10. The total revenue for the FY 2024/25 is estimated at Ksh. 3,435.0 billion, equivalent to 19.1 percent of GDP while total expenditure is projected at Ksh. 4,188.2 billion, equivalent to 23.2 percent of GDP. The deficit is projected at 3.9 percent of the GDP and expected to decline to 3.3 percent in the medium-term.

11. As at end June 2023, the public debt in nominal terms amounted to Ksh. 10,278.7 billion, equivalent to 70.8 percent of GDP. Total external debt was Ksh. 5,446.6 billion, equivalent to 37.5 percent of GDP, whereas domestic debt totalled Ksh. 4,832.1 billion, equivalent to 33.3 percent of GDP.

12. Kenya's public debt remains sustainable but with high risk of debt distress (IMF December 2023). Kenya is ranked a medium performer, in terms of Debt Carrying Capacity, with a Composite Indicator (CI) of 3.01 Implementation of ongoing fiscal consolidation program through domestic revenue mobilization and spending rationalization measures will stem debt accumulation.

13. The next chapters include: reviews of the costs and risks characteristics of public debt; debt sustainability analysis; macroeconomic assumptions and key risks under the 2024 BPS; potential sources of financing; costs and risks of alternative debt management strategies; and the implementation work plan.

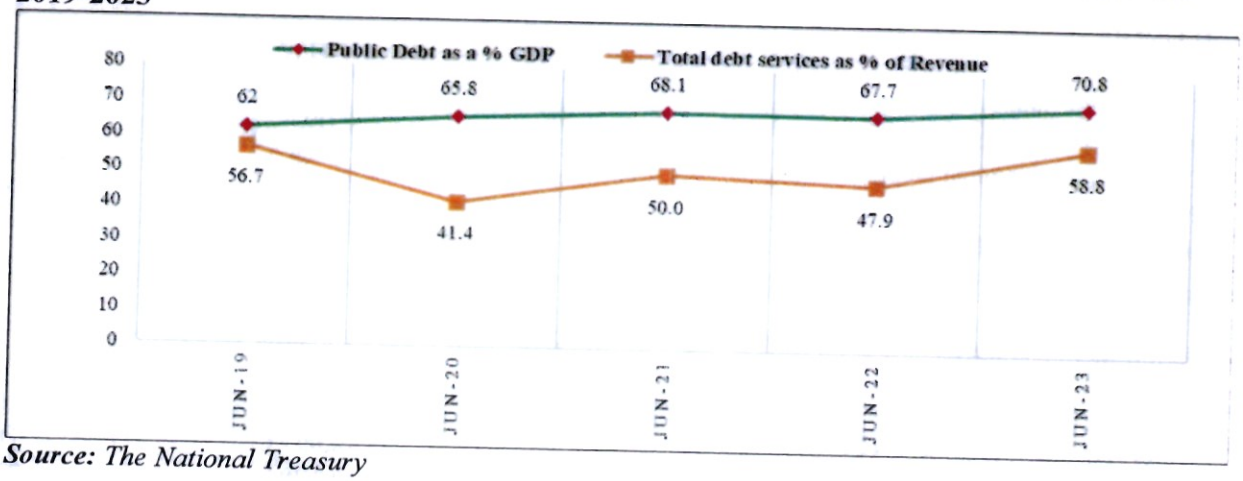
SECRET

II. STOCK OF PUBLIC AND PUBLICLY GUARANTEED DEBT

14. As at end June 2023, the stock of public debt was Ksh. 10,278.7 billion, equivalent to USD 73.1 billion in nominal terms of which, domestic debt was Ksh. 4,832.1 billion while external debt was Ksh. 5,446.5 billion **(Table 5).**

15. As at end June 2023, the public debt as a percentage of GDP stood at 70.8 percent while total debt service as a percentage of revenue was 58.8 percent (**Figure 1**).

Figure 1: Debt to GDP ratio percent and Total Debt Service as percent of Revenue from 2019-2023



***Source:** The National Treasury*

16. The 2024 MTDS analysis considers a debt stock of Ksh. 10,091.6 billion or USD 71.8 billion excluding Ksh. 187.0 billion of which uncalled guaranteed debts of Ksh.82.0 billion, Government overdraft at CBK of Ksh.76.5 billion, Suppliers credit of Ksh.14.8 billion and Bank advances of Ksh.7.3 billion.

17. External public debt comprise multilateral, bilateral and commercial creditors while the domestic debt comprise Treasury bonds and bills. As a proportion of total external debt, multilateral, commercial debt (including international sovereign bond) and bilateral accounted for 48.7 percent, 26.4 percent and 24.6 percent respectively. **(Figure5.** Treasury bonds accounted for 83.1 percent and Treasury bills accounted for 12.7 percent of total domestic debt. The other domestic debt includes pre-1997 government loan of Ksh.17.8 billion and IMF on-lent loan of Ksh 95.5 billion.

18. As at end June 2023, the stock of domestic debt was Treasury bills Ksh. 614.7 billion, while Treasury bonds with various tenors was Ksh. 4,013.9 billion.

III.REVIEW OF THE COSTS AND RISKS OF KENYA PUBLIC DEBT

Review of the implementation of the 2022 MTDS.

20. The 2022 Medium-Term Debt Management Strategy guided borrowing in the FY 2022/23. The Strategy aimed to reduce the cost of debt by optimizing on concessional borrowing and minimizing commercial borrowing. Additionally, it sought to reduce the refinancing risk by lengthening the maturity profile of public debt and supporting the deepening of domestic market through issuance of medium to long-term debt securities.

21. The external and domestic financing was to account for 25 percent and 75 percent respectively, in gross terms. The composition of gross external financing consisted of concessional and commercial sources at 22 percent and 3 percent respectively, with no borrowing from semi-concessional sources. The stock of Treasury bills was projected to decrease over the medium-term.

22. The 2022 MTDS achieved 22:78 percent external to domestic financing, deviating from the projected 25:75 percent, in gross borrowing terms (Table 3. This was on account of unfavourable global market conditions.

Table 3: 2020-2023 MTDS Targets against borrowing outturn (percent)

Borrowing source		FY2019/20	FY2020/21	FY2021/22	FY2022/23
External	MTDS	38	28	27	25

	Actual	72	81	85	78
	Deviation	**-10**	**-9**	**-12**	**-3**

Source: *National Treasury*

23. The total net borrowing to fund the fiscal deficit was Ksh.758.0 billion. This comprises actual net foreign borrowing of Ksh. 310.8 billion against a target of Ksh. 280.7 billion and actual net domestic borrowing of Ksh. 447.2 billion against a target of Ksh. 475.0 billion.

24. As at end June 2023, the actual gross domestic borrowing was Ksh. 1,957.5 billion while gross external borrowing was Ksh. 548.2 billion.

SECRET

SECRET

Table 4: Gross borrowing for FY 2022/23

	2022 MTDS Targets (%)	FY2022-2023 Actual (%)	FY2022-20223 (Ksh. millions)
Gross domestic borrowing	75.0	78.0	1,957,479
Gross external borrowing	25.0	22.0	548,171
o/w Concessional and Semi concessional	22.0	18.0	445,953
Commercial borrowing	3.0	4.0	102,218

Source: *National Treasury*

25. The total actual gross external borrowing was 22.0 percent of the total borrowing against a target of 25.0 percent. This comprises disbursements from multilateral and bilateral sources in form of program loans, project AIA, cash loans and IMF SDR allocation (**Table 4**.

26. The actual gross domestic borrowing was 78.0 percent of the total borrowing compared to 75.0 percent optimal strategy target.

27. The 2022 MTDS aimed at lowering the debt service cost and minimizing the refinancing risk. However, there was an increase in both the debt service cost and the refinancing risk due to appreciation of major currencies against the Kenya shilling and elevated interest rates in the domestic market (**Table 5**).

SECRET

SECRET

Table 5: Review of costs and risks indicators

Risk Indicators		Baseline June 2021	2022 MTDS Targets	Actual End June 2023	Deviation (4-3)	Remark on deviation
Interest costs as % of GDP		4.6	4.3	5.5	+1.2	Increased debt service cost due to increase in interest rates in the international and domestic debt market and accumulation of debt and exchange rate depreciation
Refinancing risk	Debt maturing in 1yr (% of total debt)	14.8	10.1	12.7	+2.6	Increased refinancing risk due to increased issuance of short-term instruments.
	Debt maturing in 1yr (% of GDP)	10.2	6.4	10.0	+3.6	
	ATM External Portfolio (years)	10.8	14.1	9.3	-4.8	
	ATM Domestic Portfolio (years)	6.9	9.1	7.5	-1.6	
	ATM Total Portfolio (years)	9.0	11.5	8.5	-3.0	
Interest rate risk	ATR (years)	8.3	11.3	7.7	-3.6	Marginal increase in interest rate risk indicators
	Debt re-fixing in 1yr (% of total)	25.4	14.1	26.7	+12.6	Worse off due to $2bn maturing in 2024
	Fixed rate debt (% of total)	87.7	95.3	84.5	-10.8	Worse off
Foreign exchange (FX) risk	FX debt as % of total debt	51.3	47.1	51.5	+4.4	Increased foreign exchange rate exposure due to currency depreciation

Source: The National Treasury

28. The interest payment as a share of GDP increased by 1.2 percentage points due to accumulation of debt and increase in interest rates by Central Banks both in the domestic and international capital markets, to contain inflationary pressures.

29. The increase in refinancing risk is reflected by the increase in the proportion of debt maturing in one year as a percentage of total debt from 10.1 percent to 12.7 percent. This indicates an increase in the issuance of short-term instruments. In addition, the Average time to Maturity (ATM) of the total debt portfolio reduced from 11.5 years to 8.5 years.

30. Marginal increase in interest rate risk indicators is echoed by the reduction of Average Time to Re-fixing (ATR) from 11.3 years to 7.7 years. Additionally, the debt re-fixing in 1 year as a percentage of total debt rises to 26.7 percent against a target of 14.1 percent.

SECRET

31. The Kenya shilling depreciating against major currencies exacerbated the foreign exchange risk. Foreign debt as a percentage of total debt increased to 51.5 percent from 47.1 percent (**Table 5**).

Average terms of new external debt

32. Global markets rates have tightened from the hardening borrowing terms. The worsening market conditions due to global and geopolitical economic shocks including monetary policy tightening in major economies and uncertainties related to war. The new external debts average maturity reduced to 15.7 years as at end June 2023 from 25.9 years in June 2022. The weighted average interest rate increased to 3.2 percent from 0.8 percent in June 2022. However, the grace period increased to 4.8 years from 4.2 years during the same period **(Table 6).**

Table 6: Average Terms of New External Debt

Terms	2016	2017	2018	2019	2020	2021	2022	2023

IV. COSTS AND RISKS ANALYSIS OF THE EXISTING PUBLIC DEBT PORTFOLIO

33. This section highlights the costs and risks characteristics of the existing public debt portfolio as at end June 2023.

34. Nominal debt as a percentage of GDP increased to 70.8 percent in June 2023 from 67 percent in December 2022 due to depreciation of Kenya shilling against major currencies and new borrowing to finance fiscal deficit while the present value of public debt to GDP increased to 68.2 percent from 60.0 percent in the same period. **(Table 7).**

Table 7: Cost and risk indicators for existing debt as at end June 2023

Risk Indicators		Dec-22			Jun-23		
		External debt	Domestic debt	Total debt	External debt	Domestic debt	Total debt
Nominal debt as percentage of GDP		34.4	32.6	67.0	37.5	33.3	70.8
PV as percentage of GDP		26.8	33.2	60.0	31.7	36.5	68.2
Cost of debt	Interest payment as percentage of GDP	1.4	3.9	5.3	1.7	3.8	5.5
	Weighted Av. IR (percentage)	3.9	11.4	7.6	4.5	11.4	7.7
Refinancing risk	ATM (years)	9.8	7.8	8.8	9.3	7.5	8.5
	Debt maturing in 1yr (percentage of total)	5.1	18.7	11.7	9.7	16.8	12.7
	Debt maturing in 1yr (percentage of GDP)	1.9	6.5	8.4	4.4	5.6	10.0
Interest rate risk	ATR (years)	8.4	7.8	8.1	7.7	7.5	7.7
	Debt re-fixing in 1yr (percentage of total)	27.0	18.7	23.0	33.9	16.8	26.7
	Fixed rate debt incl T-bills (percentage of total)	75.3	100.0	87.2	73.2	100.0	84.5
	T-bills (percentage of total)	0.0	15.3	7.4	0.0	13.0	5.5
FX risk	FX debt (percentage of total debt)			49.0			51.5
	ST FX debt (percentage of reserves)			23.9			55.1

Source: *The National Treasury*

35. The total interest payments as a share of GDP increased to 5.5 percent as at end June 2023 from 5.3 percent as at end December 2022. External interest payments as a share of GDP increased to 1.7 percent as at end June 2023 from 1.4 percent as at end December 2022 while domestic interest payments as a percentage of GDP decreased to 3.8 percent from 3.9 percent during the same period. This increase is explained by increased interest rates in the domestic market and depreciation of Kenya shillings against major currencies.

36. The main refinancing risk indicators are: debt maturing in one year as a percentage of total public debt; and Average Time to Maturity (ATM). As at end June 2023, the ATM of

SECRET

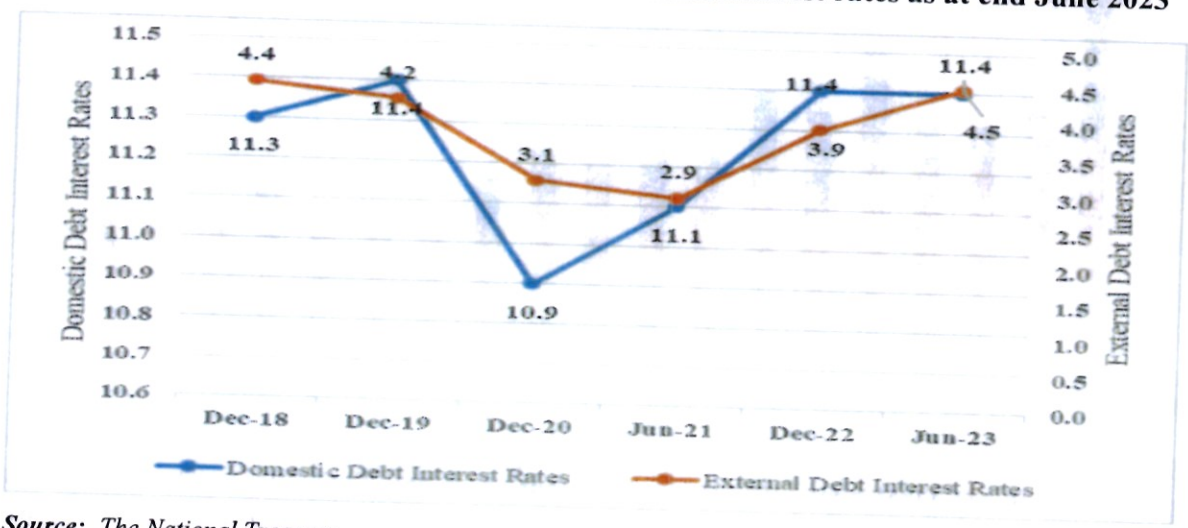
external and domestic debt portfolio reduced to 9.3 years and 7.5 years as at end June 2023 from 9.8 years and 7.8 years as at end December 2022 respectively. This was due to investors' preference for short-term debt instruments.

37. Overall, the average time to maturity of the existing public debt portfolio (external and domestic debt) reduced from 8.8 years as at end December 2022 to 8.5 years as at end June 2023.

38. Domestic debt maturing in one year as a percentage of total debt decreased to 16.8 percent in June 2023 from 18.7 percent in December 2022. External debt maturing in one year as percentage of the total debt increased to 9.7 percent from 5.1 percent as at end June 2023, due to large bullet maturity of USD 2 billion maturing in June 2024.

39. The Average Time to Re-fixing (ATR) of total public debt (external and domestic) reduced from 8.1 years in December 2022 to 7.7 years in June 2023. The Weighted Average Interest Rate (WAIR) for external debt increased from 3.9 percent to 4.5 percent while domestic debt remained same during the same period (**Figure 2**). In a volatile interest rate environment, a shorter ATR is risky because interest rates may change to a higher rate in a short time resulting into higher debt service costs.

Figure 2: Weighted Average Domestic and External Interest rates as at end June 2023



Source: *The National Treasury*

40. The maturity structure of domestic debt improved as at end June 2023. The proportion of instruments with less than one year to maturity reduced to 16.7 percent as at end June 2023 from 19.5 percent as at end December 2022. Further, instruments with the remaining years to maturity between 2-3 years, 4-5 years and 6-10 years increased by 5.2 percentage points, 7.3 percentage points and 4.3 percentage points respectively. However, the proportion of instruments with longer than 11 years to maturity as at end June 2023 reduced by 14 percentage points from 40.9 percent as at end December 2022 to 26.9 percent as at end June 2023. This was attributed to the investor's preference to short-term instruments (**Table 8**).

SECRET

SECRET

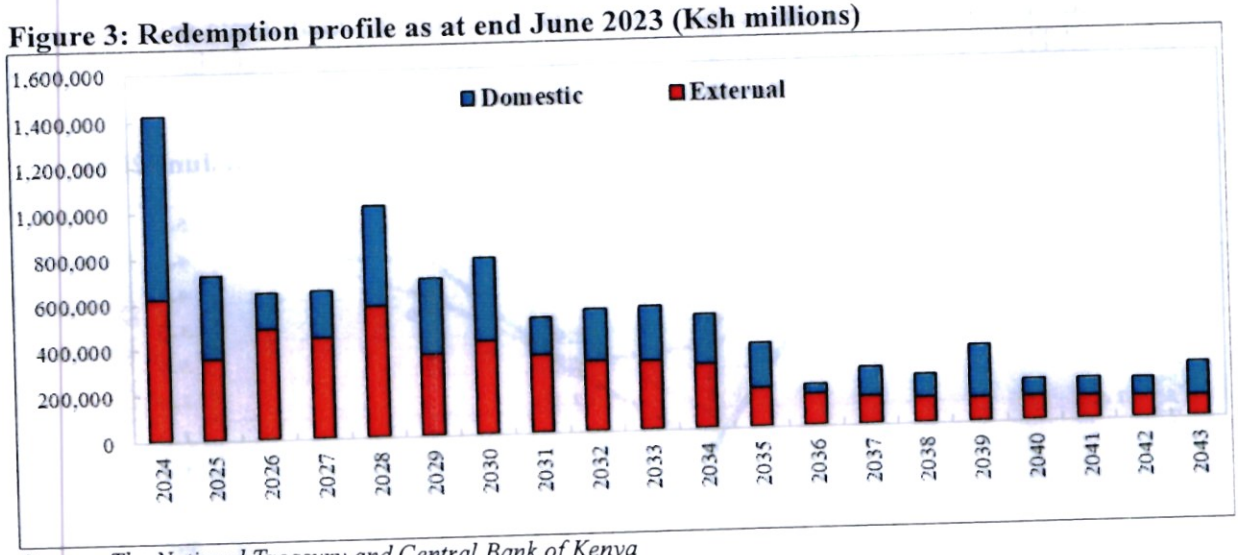
Table 8: Domestic Debt by Maturity Profile, in USD equivalent

Remaining Maturity in Years	End Dec 2022 In million USD	As Percent of Total	End June 2023 In million USD	As Percent of Total
Less than one year	6,963	19.5	5,645	16.7
2 to 3 years	3,598	10.1	5,143	15.3
4 to 5 years	3,119	8.7	5,407	16.0
6 to 10 years	7,401	20.8	8,465	25.1
Above 11 years	14,587	40.9	9,085	26.9
Total	35,668	100	33,745	100.0

Source: *The National Treasury*

41. Debts maturing in 2024 and 2028 are relatively elevated due to bullet maturing government securities and the International Sovereign Bond (ISB). (**Figure 3**)

Figure 3: Redemption profile as at end June 2023 (Ksh millions)



Source: *The National Treasury and Central Bank of Kenya*

42. Foreign currency denominated debt as a percentage of the total debt increased from 49.0 percent as at end December 2022 to 51.5 percent as at end June 2023. The increase is attributed to net new external borrowing to finance expenditure requirements in FY 2022/23 and appreciation of major foreign currencies against the Kenya shilling.

43. Short-term foreign debt as a percentage of reserves increased from 23.9 percent to 55.1 percent in the same period. The share of major foreign currency denominated debt as at end June 2023 is as shown in Figure 4.

V. DEBT SUSTAINABILITY ANALYSIS

Introduction

44. Debt Sustainability Analysis (DSA) conducted in December 2023 indicates that Kenya's public debt remains sustainable but with a high risk of debt distress. The scope of the analysis covers public debt from central government, Central Bank of Kenya debt contracted on behalf of the Government, and National Government guaranteed debt. The analysis excludes non-guaranteed debt of the public sector and arrears, which are disclosed in the annual debt management report.

Kenya's Debt Carrying Capacity

45. Kenya is assessed as a medium performer in terms of Debt Carrying Capacity (DCC), with an estimated Composite Indicator (CI) of 2.98 (**Table 9**). The CI captures the impact of various factors through a weighted average of an institutional indicator (measured by the World Bank's Country Policy and Institutional Assessment (CPIA)), real GDP growth, remittances, international reserves, and global growth.

46. The December 2023 DSA CI score was marginally higher than the June 2023 DSA CI score and this was due to stronger projected path of import coverage of reserves. The applicable thresholds for the Public and Publicly Guaranteed (PPG) external and total public debt benchmark for a medium performer are shown on **Table 10**.

47. As shown in **Table 9**, Kenya's debt carrying capacity has remained medium since March 2021, a downward revision from Strong, largely reflecting the impact of COVID-19 crisis on the global and domestic economies. The downgrade from Strong to Medium performer resulted to lower debt sustainability thresholds for external debt and benchmarks for total public debt. The rating also moved to high risk of debt distress in 2020 from moderate risk in 2019, reflecting the impact of the global COVID-19 crisis which exacerbated existing vulnerabilities (**Table 9 and Table 10**).

Table 9: Kenya's debt risk levels and debt carrying capacity

	2017	2018	2019	May-20	Mar-21	Dec-21	Dec-22	Jun-23	Dec-23

	PV of debt in % of GDP	55	**40**
	Debt service in % of Exports	21	**15**
	Debt service in % of Revenue	23	**18**
Total Public Debt Benchmark	PV of total public debt in % of GDP	70	**55**

Source: *Guidance Note on Bank-Fund Debt Sustainability Framework for Low Income Countries*

External Debt Sustainability Analysis

48. External DSA indicate that the Present Value (PV) of PPG external debt-to GDP ratio remains below the 40 percent indicative threshold throughout the projection period. This solvency indicator is projected to decline from 31.7 percent in 2023 to about 28.3 percent in 2028, reflecting the impact fiscal consolidation and a borrowing mix biased towards concessional borrowing (**Table 11**).

49. However, external debt indicators in terms of exports and revenues exceed their respective thresholds under the current trend (baseline), resulting to a mechanical high-risk signal (**Table 11**). The PV of PPG external debt-to-exports (solvency indicator) remains above the threshold (180 percent) through 2029, with the ratio expected to decline gradually as the exports recover.

50. Debt service-to-exports (liquidity indicator) exceeds its threshold (15 percent) in the medium-term on account of Eurobond repayments in 2024 and 2028, and rollover of external bank loans (in 2025-26). Additionally, the anticipated rollovers of maturing commercial financing will cause the PPG debt service-to-revenue ratio (liquidity indicator) to exceed its threshold (18 percent).

51. The breaches in the debt thresholds in terms of exports indicate increased vulnerability of public debt to export and financing shocks. This underscores the importance of broadening the export base given the volatility in export commodity prices as well as continuation of the recent practice of contracting loans with amortizing repayment terms and lengthening of the maturity profile of domestic debt through issuance of longer dated bonds.

Source: The National Treasury & IMF country report

Total Public Debt Sustainability Analysis

52. PV of debt to GDP ratio is projected to remain above the 55 percent benchmark until 2029, resulting in a high-risk signal (Table 12). The PV of public debt-to-GDP ratio is projected to decline steadily reflecting the impact of fiscal consolidation. To improve the ratio, the Government is implementing a multi-year growth-friendly fiscal consolidation program supported by measures to enhance revenue collection and curtail overall spending while safeguarding priority high-impact social and investment expenditure.

Table 12: Kenya's Public Debt Sustainability Analysis

Indicators	Benchmark	2022	2023	2024	2025	2026	2027	2028	2033
		Actual		Projection

Source: The National Treasury & IMF country report

53. Kenya's debt burden indicators are projected to improve in the medium-term, supported by the ongoing fiscal consolidation program that is expected to reverse the primary balance

SECRET

SECRET

from a deficit to a surplus, in the context of continued strengthening of global and domestic economic activity and robust exports receipts.

54. The Government will continue to optimize use of concessional funding, lengthen the maturity profile of public debt through issuance of medium to long dated bonds, and deepen domestic debt market to reduce cost of public debt and borrowing. Additionally, a steady and strong inflow of remittances and a favourable outlook for exports will play a major role in supporting external debt sustainability. The newly rolled out Central Securities Depository system (DhowCSD) is expected to bolster implementation of market development initiatives by improving the process in government securities auction and settlement, broadening investor base, improving liquidity, and reducing segmentation in the interbank market.

55. Additionally, although Kenya's public debt continues to be sustainable, annual borrowing limits (fiscal deficits) must be reduced to limit the rate of accumulation of public debt.

SECRET

SECRET

VI. MACROECONOMIC ASSUMPTIONS AND KEY RISKS

Baseline Macroeconomic Assumptions

56. The macroeconomic assumptions outlined in the 2024 Budget Policy Statement (BPS) (**Table 13**) are the integrated into the 2024 MTDS assumptions.

57. Economic growth in the FY 2024/25 is projected at 5.5 percent. This growth will be supported by implementation of priority programmes outlined in the Bottom-Up Economic and Transformational Agenda (BETA) and the fourth Medium-Term Plan of Vision 2030.

58. Over the medium-term, growth is projected to remain above 5.5 percent supported by inclusive growth through increased employment, more equitable distribution of income, enhanced social security and expansion of the tax revenue base.

Table 13: Baseline Macroeconomic Assumptions

	Unit	2021/22	2022/23	2023/24	2024/25	2025/26	2026/27	2027/28

Inflation

59. Inflation as at end June 2023, inflation increased above the government target range of 5 ± 2.5 percent. The overall inflation returned to target band from July 2023 declining to 6.9 percent in October 2023, and is expected to remain within the target supported by lower food prices, prudent monetary policy and other government policy interventions.

SECRET

SECRET

Revenue and deficits

60. The government will continue implementing growth responsive fiscal consolidation through broadening of tax revenue base and rationalization of expenditures in order to reduce the fiscal deficits. To this end, the fiscal deficit is projected to decline to 3.9 per cent of GDP in the FY 2024/25 and further to 3.1 percent of GDP over the medium-term.

61. The 2024 MTDS's alternative debt management strategies are aligned to the 2024 BPS's policy objectives.

Risks to the 2024 BPS baseline macroeconomic assumptions

62. Kenya's debt sustainability is vulnerable to exogenous shocks e.g. export, revenue patterns, climate related shocks and exchange rate movements. To reduce debt vulnerabilities, the government is committed to finance capital investments using concessional borrowing and to deepen domestic market through setting up of an OTC exchange among other strategies. Additionally, a steady inflow of remittances and a favourable outlook for exports will play a major role in supporting external debt sustainability.

63. Performance of the economy and government revenues has a direct impact on debt sustainability. A slowdown in the growth of the economy may elevate debt indicators.

64. Inflation induced high interest rates in both domestic and international markets thus increasing the cost of borrowing. Continued pattern may pose a challenge to government's financing of the FY2024/25 Budget and performing liability management operations on its debt portfolio as well as increasing its debt service costs. Government will continue to monitor market conditions with the view of taking appropriate actions when the conditions are favourable. Additionally, the government will continue to implement reforms to strengthen the domestic debt market to cushion against the downside risks emanating from international capital markets.

65. Investor preference for short-term instruments has resulted in increased refinancing risk through accumulation of more short-term debt.

66. The continued appreciation of major currencies against the Kenya shilling may increase the cost of debt service as over 50 percent of the total debt portfolio is in foreign currencies.

67. Materialization of fiscal risks especially from contingent liabilities arising from State-Owned Enterprises (SOEs) debts and Public Private Partnership (PPPs) projects remain a key risk to the budget. Continuous monitoring of these exposures is important to mitigate against any risks before they materialize.

68. The PDMO will continue to monitor evolving public debt risk profile and advice the National Treasury on appropriate remedial interventions.

SECRET

SECRET

VII. ASSESSMENT OF POTENTIAL SOURCES OF FINANCING

Sources of financing of the fiscal deficit

69. Borrowing from domestic and external markets remains the main source of funding budget deficits.

70. External borrowing mainly through loans from multilateral, bilateral and commercial lenders as well as bond issuances while domestic borrowing will be through Treasury bills refinancing and bonds issuance.

71. The Government will issue benchmark Treasury instruments (with tenors of 2, 5, 10, 15, 20 and 25 years), retail bonds and infrastructure bonds. However, off-benchmark bonds may be issued depending on the prevailing market conditions mainly through reopening of existing series. Treasury bills will be used for cash management purposes.

72. Non-bank institutions (pension funds, insurance firms, parastatals and retail investors) and commercial banks remain the major investors as they held 52.5 percent and 47.5 percent of the outstanding Treasury Bills and bonds as at end June 2023 respectively.

73. Multilateral, bilateral and commercial (including International Sovereign Bond, ISB) share in external debt was 50.5 percent, 23.8 percent and 25.4 percent respectively. Suppliers Credit accounted for 0.3 percent (**Figure 5**).

74. The main multilateral lenders comprise of International Development Association (IDA), International Bank for Reconstruction and Development (IBRD), African Development Bank (ADB), African Development Fund (ADF) and International Monetary Fund (IMF) while dominant bilateral lenders included China, France and Japan as at end June 2023.

Figure 5: Existing share of external debt as at end June 2023

SECRET

SECRET

Potential sources to finance the medium-term budget

i. Domestic Sources

75. Over the years, the PDMO has successfully mobilized domestic debt as it contributed 59.7 percent of net new funding requirement in the FY 2022/23 through issuance of government securities.

76. To supplement traditional sources of funding, the PDMO will explore alternative funding sources including issuance of a Kenya shilling syndicated debt, foreign currency denominated domestic bond, and private placement for both local and external markets, among others.

77. The newly launched DhowCSD, which is a versatile market infrastructure, will improve monetary policy implementation and transmission and enhance operational efficiency in the domestic debt market. This will further promote capital market growth and deepen financial market through expanded digital access for broader financial inclusion, positioning Kenya as the preferred financial hub in the region. Additionally, the government will leverage on the DhowCSD to promote a national savings culture and to democratize access to government securities through re-engineering issuance of the retail bonds.

78. The PDMO will continue to spearhead key reforms to deepen the domestic debt market and diversify the investor base. To enhance the growth of the non-bank financial institutions such as pension, insurance and mutual funds, the PDMO will consider expanding the volumes and initiate new financial products such as post-retirement medical funds and contributory pension schemes.

ii. External Sources

79. External sources remain a key source of financing the fiscal deficit as it contributed 40.3 percent of net new funding requirement in the FY 2022/23.

80. Global shocks as a result of supply chain disruptions, monetary policy tightening in the USA and European countries, continue to have impact on Kenya's medium-term prospects negatively. Spikes in oil and commodity prices are exerting pressure on inflation and the exchange rate leading to increased cost of external finance.

81. The PDMO will continue to source concessional financing for development expenditure from multilateral financial institutions and bilateral lenders.

82. The PDMO may also explore the issuance of green, sustainability-linked, and blue bonds to finance climate related or environmental sustainability projects. Additionally, the PDMO may explore the possibility of issuing a Panda and Samurai Bonds as part of instrument diversification.

SECRET

SECRET

83. A shift in the international financing landscape has created new challenges and opportunities and options for developing countries. Kenya will focus on leveraging the involvement of the private sector in infrastructure financing such as public-private partnership.

84. Other emerging funding sources such as debt swaps especially debt for nature swaps and debt for food security swaps are under consideration between the government of Kenya and the United Nations Development Partners to fund the budget deficit for FY 2024/2025.

85. The Government will endeavour to maintain its presence in the international financial markets through refinancing the existing commercial maturities and mobilizing resources for budget support.

SECRET

VIII.PUBLIC DEBT RISKS AND COSTS EVALUATION UNDER ALTERNATIVE PUBLIC DEBT MANAGEMENT STRATEGIES

Public Debt costs and risks evaluation

86. In order to manage costs and risks associated with public debt, an evaluation of the risks and costs under various alternative debt management options has been undertaken to inform the optimal strategies. The results of the evaluation are used to populate the matrix of risks and costs of public debt, (**Table 14**), to help identify the optimal public debt management and deficit financing strategies that provide the best projection of costs minimization and risks optimization against the current indicators.

Table 14: Costs and risks charateristics matrix

Source: *National Treasury*

Baseline Pricing Assumptions and Description of Shock Scenarios

87. The pricing assumptions under the baseline scenario for interest rates and the exchange rates are as follows:

i. ADF loans are priced at an average fixed rate of 0.75 percent, with a 40-year tenor and up-to 10-year grace period.

ii. IDA/IFAD loans are priced at an average fixed rate of 1.75 percent, with a 35-year tenor and up-to 8-year grace period.

iii. Other concessional loans are priced at an average fixed rate of 1.17 percent, with a 28-year tenor and up-to 7-year grace period.

iv. Semi-concessional loans are assumed to be contracted at a fixed interest rate of approximately 2.3 percent and a maturity of 23 years including a grace period of up to 5 years.

v. Commercial borrowings and Export Credit Agencies financing with floating rates are contracted at a reference rate plus a margin.

vi. The pricing of Kenya's International Sovereign debt is based on the average of prevailing Sovereign Bond yields for October 2022 to October 2023.

vii. Pricing on the domestic debt instruments is based on the prevailing market yield curve during the month of October 2023.

88. The outlook on the baseline interest rates and exchange rates is based on the following considerations;

i. The exchange rate (Ksh/USD) is assumed to depreciate annually at an average of 3.1 percent.

ii. The fixed interest rates of market-based instruments in the international capital markets were based on the average of prevailing Sovereign Bond yields for October 2022 to October 2023. The domestic market yields were based on the average of FY 2022/23

iii. The interest rates for fixed rate loans are assumed to remain priced as per the existing portfolio.

89. Three risk scenarios are evaluated as follows:

i. The risk scenario for interest rates assumes moderate interest rate shock of 2.5 percent over the baseline projections and a stand-alone extreme shock of 5 percent which remains constant thereafter.

ii. The risk scenario for exchange rate assumes a stand-alone extreme shock of 25 percent in 2024 which was applied on the baseline exchange rate projections.

iii. The combined exchange rate and interest rate risk shock scenario assumes an increase in interest rate by a moderate shock of 2.5 percent combined with a 12.5 percent exchange rate depreciation in 2024.

SECRET

Description of Alternative Debt Management Options

90. The preparation of the 2024 MTDS considered four alternative financing strategies to fund the fiscal deficits for the FY2024/2025 and the medium-term borrowing.

91. The domestic financing sources include a combination of Treasury bills and bonds while external financing alternative sources include a mix of concessional, semi-concessional, commercial loans and international debt securities.

i. **Strategy 1 (S1) – The Medium-Term debt management strategy is maximizing use of concessional external funding and deepening domestic debt market to reduce costs of Kenya's public debt:** This strategy will be optimized by a gross external borrowing of 28 percent and gross domestic borrowing of 72 percent. The composition of gross external financing consists of concessional, semi-concessional and commercial sources at 13 percent, 3 percent and 12 percent respectively. The net domestic borrowing is 60 percent while net external borrowing is 40 percent. Domestic borrowing is through issuance of Treasury bonds while maintaining the stock of Treasury bills to continue mitigating refinancing risk. From external sources, the strategy aims to maximise concessional funding while minimising commercial borrowing to reduce the cost of debt.

ii. **Strategy 2 (S2) – Increased External Commercial Borrowing and Reduction of Treasury bills Stock:** This strategy would maximize external commercial borrowing and reduce refinancing risk in the domestic debt portfolio. The option involves issuing medium to long-term Treasury bonds. In terms of net financing, the strategy assumes 63 percent domestic and 37 percent external financing. In gross borrowing terms, external and domestic financing accounts for 30 percent and 70 percent, respectively. Gross external financing would be composed of 9 percent concessional, 3 percent semi-concessional and 18 percent commercial borrowing.

iii. **Strategy 3 (S3) – Maintaining the Stock of Treasury bills and Increasing External Commercial Borrowing:** The strategy envisages 50 percent each from net domestic and net external borrowing. The strategy aims at maintaining the stock of Treasury bills and issuing medium to long-term Treasury bonds while maximizing on external commercial borrowing. In gross borrowing terms, external and domestic financing accounts for 35 percent and 65 percent, respectively. Gross external financing would be composed of 11 percent concessional, 3 percent semi-concessional and 21 percent commercial borrowing.

iv. **Strategy 4 (S4) – Maximizing on External Concessional Borrowing and Reducing Refinancing Risk:** The strategy seeks to achieve gradual reduction of Treasury bills stock with domestic financing mainly sourced from medium to long-term Treasury bonds. Externally, the strategy focuses more on budget financing through concessional borrowing. In terms of net financing, the option assumes 45 percent domestic and 55 percent external borrowing. In gross borrowing terms, external and domestic financing accounts for 37 percent and 63 percent, respectively. Gross external financing would be

SECRET

SECRET

composed of 16 percent concessional, 6 percent semi-concessional and 15 percent commercial borrowing.

Cost-Risk Analysis of Alternative Debt Management Options

92. The cost and risk indicators generated by the MTDS Analytical Tool (MTDS AT) under each of the four alternative funding strategies provides the output of the evolution of the debt costs and risks characteristics in the medium-term. The Tool also provides the projected characteristics of the debt portfolio under standard shock scenarios. In addition, the MTDS AT provides projected stock and cash flow of the debt profile.

i. Baseline projection and alternative options

93. The average gross borrowing in each alternative strategy during the period ending FY 2025/26 is presented in **Table 15**.

Table 15: Average new borrowing by instrument under alternative strategies (in percent of gross borrowing by end of FY 2026/27)

New debt in % of Total Gross Borrowing	S1	S2	S3	S4
ADF	1	0	1	1
IDA/IFAD	6	4	5	8

Source: *The National Treasury*

97. Across all the alternative options projections, both nominal and Present Value (PV) of debt to GDP ratios are lower than the levels in June 2023. This is driven by projected higher GDP growth and government's commitment to fiscal consolidation in the medium-term.

98. As shown in Table 17, Strategy 4 (S4) has greater projected benefits to debt management objectives than the other three strategies in terms of the following attributes;
    i. Has the least cost of debt in terms of interest payments as a percentage of GDP and implied interest rate.
    ii. Has least PV of debt to GDP as a resulting outcome of the fiscal consolidation plan.
    iii. Minimizes refinancing risk by lengthening the total portfolio ATM attributed to issuance of medium to long-term bonds and concessional loans with longer maturities.
    iv. Minimizes interest rate risk in terms of average time to re-fixing.
    v. Deepens the domestic bond market through issuance of medium to long-term instruments as the main source of domestic financing and setting up of OTC platform for government securities.

99. Overall, Strategy 1 indicated minimized foreign exchange risks in terms of FX debt as a percentage of total debt.

100. Strategy 2 minimizes refinancing risk by lengthening the ATM of domestic portfolio.

101. Strategy 3 projects undesirable results in the trade-off between all costs and risk indicators and may be unrealistic to implement.

SECRET

102. The projected redemption profiles of the alternative strategies by end 2027 are shown in **Figure 6**. High maturities of both domestic and external debt are observed in 2027, 2028 and 2030. These maturities are associated with maturing domestic debt and International Sovereign bonds as well as other commercial loans.

iii. The preferred financing strategy

105. Strategy 4 is the optimal strategy selected as it results in optimization of majority of costs and risks indicators. The Strategy aims at achieving a net financing mix of 55 percent from net external sources and 45 percent from domestic market. The objective is to optimize on the use of concessional and reducing commercial borrowing, thereby reducing the cost of debt. In the domestic market, the strategy seeks to reduce refinancing risk through issuance of medium to long-term Treasury bonds.

SECRET

SECRET

IX. PUBLIC DEBT MANAGEMENT REFORMS

106. **Shift from a debt limit to a debt anchor:** The National Treasury amended the numerical debt limit and replaced it with a debt anchor of 55 percent of debt to Gross Domestic Product ratio in Present Value terms. A debt anchor is a desired level of public debt as a ratio of GDP that is supportive of economic growth and development, the debt carrying capacity and ability to service debt.

107. **Operationalization of sinking fund:** The National Treasury is developing Sinking Fund Regulations for purposes of operationalization of the Sinking Fund. The Fund's objective is redemption of government loans and securities, and payment of expenses of, or incidental to redemption of an issue of national government loans.

108. **Liability Management Operations:** In order to lower costs and risks associated with existing public debt portfolio, the government will apply Liability Management Operations (LMOs) targeting the existing debt portfolio. The operations will include amongst others; Debt swaps, buy-backs etc. The government also endeavour to maintain its presence in the international financial markets through refinancing the existing commercial maturities and mobilizing resources for budget support.

109. **Diversified sources of borrowing:** The government will explore alternatives financing sources to the conventional bonds that are more flexible and less costly. Examples of these include the Sukuk bonds, Green and sustainability linked bonds, Samurai bonds, Panda bonds and Diaspora bonds.

110. **Strengthen the institutional arrangement and operational capability of the PDMO:** The PFM Act, 2012 seeks to establish PDMO within the National Treasury, but with some degree of independence or autonomy, regarding the management of the portfolio and of the office. This will be achieved by developing a Policy, Financial and Administrative Framework (PFAF) within which the PDMO would operate, and delegating the operational decisions on borrowing and debt management and the day-to-day management of the Office from the Cabinet Secretary to the Head of the PDMO.

111. **Expanding coverage of public debt reporting:** The government is committed to expanding coverage in reporting of public debt to include non-guaranteed debt owned by State-owned Enterprises (SOEs), fiscal risk and contingency liability posted by Public-Private Partnerships (PPPs) and guarantees through a gradual approach to promote debt transparency and accountability. Since FY 2020/21, the PDMO has been reporting non-guaranteed debt and has institutionalized to annual reporting.

SECRET

SECRET

Domestic debt market reforms

112. The National Treasury has been undertaking a number of reforms in collaboration with other financial sector players, which include the Capital Market Authority (CMA), the Central Bank of Kenya (CBK) and market participants. These reforms include:

i. **Publication of an issuance calendar:** Regular publication of an issuance calendar for government securities to support predictability in the issuance process and provide a guide for investor planning. The National Treasury together with the CBK coordinates the preparation and publication of an issuance calendar for the financial years.

ii. **Separation of the Retail and Wholesale Market for government Securities:** The new Central Securities Depository system called DhowCSD went live on 31st July 2023. It sets the foundation for the separation of the retail and wholesale market. It will facilitate the retail investors to directly access government securities market including buying and selling Treasury bills and bonds online. The DhowCSD is a versatile market infrastructure that will improve monetary policy transmission, implementation and operational efficiency in the domestic debt market. The system is accessible via CBK website and App Store.

iii. **Retail-Bond Issuance Re-engineering:** The National Treasury is currently undertaking Retail-bond issuance re-engineering process in coordination with the CBK to further deepen the government securities at the retail level. The re-engineering process is intended to among others incorporate recommendations spelt out in the post M-Akiba Issuance survey report while addressing the challenges therein. The re-engineering of Retail bond issuance will contribute to democratization of investment opportunities and improve efficiency and access in the government securities market.

iv. **Establishment of the Over-The-Counter (OTC) Market for government Securities:** The development of the OTC trading platform for government securities is being undertaken. Treasury bills have been trading on OTC. The Capital Market Authority in collaboration with market participants has developed OTC trading guidelines, which will support implementation of the OTC for Treasury bonds trading platform. The establishment of OTC platform is envisaged to boost liquidity in the bond market.

v. **Establishment of an Efficient Horizontal Repo Market and Securities Lending and Borrowing (SLB):** The CBK DhowCSD system will now allow full transfer of securities ownership for Repo transactions through a collateral management module. The launch of Repo market and securities lending and borrowing through DhowCSD system will provide a critical anchor to the financial sector in Kenya. It will promote the distribution of liquidity among the capital markets stakeholders and enhance uptake of government securities in financial market.

SECRET

SECRET

Other pending Initiatives in the Domestic Debt Market include:

vi. Initiate local private placements for government securities targeting specific segment of the market; and

vii. Establishment of offshore issuance of local currency denominated debt instrument to diversify investor base without elevating foreign currency risk.

viii. Development of policies to streamline use of CBK overdraft facility

SECRET

SECRET

X. MTDS IMPLEMENTATION, MONITORING AND EVALUATION

Domestic and external borrowing Plan

113. The Government will implement the debt management strategy and the optimal fiscal funding strategy through the annual borrowing plan.

114. The PDMO will prepare domestic and external borrowing plan comprising of projected borrowing and settlement of maturities within the 2024/25 financial year.

115. The external borrowing plan will comprise of expected disbursements by creditor, the disbursement period and currency of disbursement within the financial year as per the 2024 MTDS.

116. The borrowing plan may be revised to include liability management operations to manage debt stock risks when the market conditions allow.

Review of the Borrowing Plan

117. Review of the outcome of implementation of the borrowing plan will be done on weekly basis (weekly debt bulletins), monthly and annual basis to provide data for strategy evaluation and for public information.

118. The progress of implementation of the 2024 MTDS will be monitored and reported through monthly and annual public debt management reports. The Annual Public Debt Management Report is regularly prepared and published after end of each financial year.

Monitoring and Review of Cost and Risk Indicator Outturn of the Strategy

119. The actual costs and risks characteristics of debt will be assessed against sustainability threshold indicators and any deviations will be used to inform strategy review in the next MTDS cycle.

120. The costs and risks outcome characteristics in the 2024 MTDS are evaluated semi-annually and annually against sustainability threshold indicators to determine deviations and suggest mitigation measures. **Table 18** outlines the costs and risks parameters to be evaluated.

121. The evolving public debt structure and fiscal deficit will inform review of strategy for management of costs and risks of the public debt going forward.

122. Likewise, guaranteed State corporations' debt, fiscal commitments and contingent liabilities will be tracked and assessed against overall sustainability levels.

County Borrowing

124. Article 212 of the constitution of Kenya allows County Governments to borrow only if the borrowing is approved by the County Assembly and guaranteed by the National Government. Section 58 of the PFM Act, 2012 gives power to the Cabinet Secretary to issue a loan guarantee of a county government or any other borrower on behalf of the national government and that loan shall be approved by Parliament.

125. County borrowing should conform to the fiscal responsibility principles prescribed in the PFM Act, 2012. Borrowing by County Governments should be informed by County Medium-Term Debt Strategy. As the National Treasury and Economic Planning prepares the MTDS that takes into account public debt and borrowing by the national government, respective county governments are required by law to do the same.

XI. ANNEXES

ANNEX I: Publication of the Debt Management Strategy

Section 33 of the Public Finance Management Act, 2012 provides:

1)On or before 15th February in each year, the Cabinet Secretary shall submit to Parliament a statement setting out the debt management strategy of the national government over the medium term with respect to its actual liability in respect of loans and guarantees and its plans for dealing with those liabilities.

2)The Cabinet Secretary shall ensure that the medium-term debt management strategy is aligned to the broad strategic priorities and policy goals set out in the Budget Policy Statement.

3)The Cabinet Secretary shall include in the statement the following information: -

a)The total stock of debt as at the date of the statement;

b)The sources of loans made to the national government and the nature of guarantees given by the national government;

c)The principal risks associated with those loans and guarantees;

d)The assumptions underlying the debt management strategy; and

e)An analysis of the sustainability of the amount of debt, both actual and potential.

4)Within fourteen days after the debt strategy paper is submitted to Parliament under this section, the Cabinet Secretary shall submit the statement to the Commission on Revenue Allocation and the Intergovernmental Budget and Economic Council, publish, and publicize the statement.

5)PFM Act 2012, 'General responsibilities of the National Treasury' Section 12. Provides that: (1) Subject to the Constitution and this Act, the National Treasury shall— (b) manage the level and composition of national public debt, national guarantees and other financial obligations of national government within the framework of this Act and develop a framework for sustainable debt control.
