PETITION BY MTITO ANDEI COMMUNITY ON DESTRUCTIONS BROUGHT ABOUT BY WILDLIFE ANIMALS

1. MTITO ANDEI COMMUNITY:

Mtityo andei community is made up of several locations i.e Kambu, Kathekani, Mtito andei, Nthongoni among all of them in Mtito Andei Division. Majority of its residents are Kamba who dwell in livestock keeping and cultivation of short rain crops i.e Maize, beans, sorghum, millet, green grams etc. The community is tirelessly venturing into fruit farming for example mango farming, orange farming etc.

2. COMMUNITY ELECTED COMMITTEE:

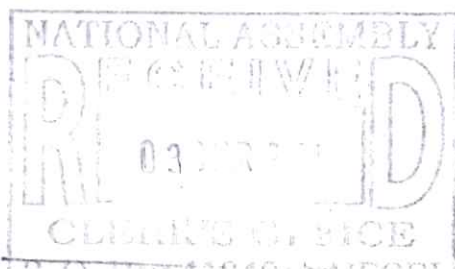

The community held a special meeting on 19th, 12, 2020 at 10.00am at Kyusani Market and elected an interim committee to act upon the wildlife animals' trespass to community's farms and homesteads.

The following are the community elected committee members.

3. Tsavo National parks:

Mtito Andei borders the said National Park both to West and East. Every now and then very destructive and dangerous wildlife animals are trespassing from this park and bring about

unmeasurable destructions to activities being done by Mtito Andei people. For example, crop and fruits damage by elephants, livestock attacks by hyenas, leopards, cheetahs, lions among others. The community has in decades of years recorded losses both in crops cultivations as well as their livestock animals. However, the community is experiencing lots of injuries from the said dangerous wildlife animals.

4. Kenya wildlife service:

This is the body that manages wildlife animals in Kenya. Mtito Andei community takes this greatest opportunity to appreciate the efforts being taken by Mtito Andei KWS officers to curb these animals from interfering with the people's activities. The community in particular recognizes Mr. Maganga together with his few colleagues who are spending sleepless nights **patrolling in our areas for proper monitoring of the wildlife animals. However, the community pleads with the KWS senior warden Mtito Andei as well as the national government through the assistant county commissioner Mtito Andei division to come on board and install extra control measures.**

5. David Shedrick, Tsavo Trust, Kravoss, Mary, Marcus Dunn:

These are KWS partners who intent to help in wildlife conservation. They are based in Mtito Andei Division along Athi river. Upon their arrival, these said KWS partners did not mind the good relationship with the community neither did they mind the corporate social responsibility of the area. The said KWS partners have 100% mistreated the community by beating the community **members whom they falsely claim that they are hunting wildlife animals. They are actually being very much negligent on controlling the wildlife animals from trespassing to people's farms and homes. Their core intension is for the wildlife animals to feed on people's crops and livestock animals. We want to be very much categorical that these KWS partners are 100% liable for any loss and damage brought to community by the wildlife animals. The existing poverty within the community members is as a result of the said KWS partners who are intentionally letting the wildlife animals to regularly trespass to community's farms so that they can feed. Sadly enough, they import new wildlife animals from other national parks and dump them to the community which are becoming so canning that they have started bringing people's deaths.**

6. Losses encountered by the Mtito Andei community:

The entire Mtito Andei Community has undergone a very strenuous situation as a result of wildlife animals:

- A. Crops destruction by elephants. A minimum of six acres per household in this case end up being **completely destroyed.**
- B. Livestock attacks by hyenas, leopards, cheetahs, lions among others have being a biggest threat to the community. The community sends sleepless nights as they watchdog their livestock animals from being attacked. Every household has lost tens of livestock animals as a result.
- C. Some members of the community have undergone serious injuries as they try to rescue their crops and livestock animals from the wildlife animals
- D. Not to forget water tanks breakages as a result of elephants looking for water to drink. Hundreds of plastic tanks have been damaged.

The poverty amongst the community members is purely brought about by wildlife animals as a result of these KWS partners

Community's Appeal:

1. Electrical Installation

Mtito Andei is hereby requesting for an electric fence along Athi river all the way to Mtito Andei town. We appreciate our County Government Makueni for initiating this some months ago. **Much appreciation to National Environmental Impact Assessment for their successful well done job as well as the gazettelement for the said electric fence.**

However, the community is worried because this electric fence could be having barriers from some individuals in Mtito Andei Location. The Mentioned KWS partners are approaching the enlightened community members and lobby opposition in this electric fence installation. **These KWS partners to achieve their hidden opposition in this case, have started individual three acre electric wire installation to some members of the community.** In addition to these, these KWS partners are enticing community members with some case so that they may oppose the electric fence initiative by the Makueni County Government.

With regards to this, the community is calling upon the county government Makueni and the **National Government to use their special intelligence and deal accordingly to any person who may be working against the electric fence installation from Athi river to Mtito Andei Town.**

2. Kenya Conservancy Association. The Mtito Andei Community is requesting for total review of the said KWS partners so that the community get to know if they wildlife conservancies or tourism investor. Also we request this Office to strictly monitor their activities because they are ever against the Kenya Conservancy Act of 2013.

3. Kenya Investment Authority. The Mtito Andei Community is requesting for total review of the said KWS partners so that the community get to know if they wildlife conservancies or tourism investor. Also we request this Office to strictly monitor their activities because they are ever against the Kenya Investment Promotion Act 2004.

The following are the petitioners on behalf of the community:
